Expansion of Automotive Part Contract Manufacturing in Our Viet Nam Base

Construction of an ASEAN Production Structure to Support “China + 1”

NMS VIETNAM CO., LTD. (NMS VIETNAM), the Viet Nam base of the nms Group’s Nippon Manufacturing Service Corporation, has started the contract manufacturing of automotive parts and the scale of this production is expanding. The number of personnel in the firm is about three times of that what it was originally and this is planned to continue increasing further in the future.

1. Background

Automobile manufacturers are promoting the development and release of various applications with advanced technology in the pursuit of safety and security in automobiles. Technological development is also underway with this in mind for automobile parts.

In this, the production base strategies of manufacturers are very important from the perspective of speed from development to mass production and global costs. This has led to an accelerating trend for “China + 1.”

Under these circumstances, the nms Group is developing business with “human resource services + contract manufacturing” in the ASEAN region. NMS VIETNAM is steadily expanding the scale of its business as a base with these functions.

2. Current Situation

(1)	Details of work undertaken	Automotive part assembly work
(2)	Time at which work started to be undertaken	July 2016 • January 2016: Establishment of NMS VIETNAM CO., LTD. • June 2016: Completion and start of operation of the factory in Viet Nam • July 2016: Start of contract manufacturing
(3)	Number of production personnel	300 workers at the time when work started to be undertaken → 920 workers as of May 2017

3. Future Development

(1)	Number of production personnel	The firm is planning to increase its number of production personnel to 1,300 workers by the end of 2017 due to an increase in the production volume it is undertaking
(2)	New efforts	● Increase the scope of the business it undertakes (e.g. quality control and inspection work) ● Build a structure to provide education to local workers and promote the training of highly skilled professionals by taking advantage of the functions of NMS INTERNATIONAL RESOURCES CO., LTD. which provides human resource services to further improve the quality of the work it undertakes

The nms Group is working on building an optimal production structure to contribute to the overseas development of our customers in China and the ASEAN region. We will continue to develop services that provide all the processes involved in manufacturing in one stop both in Japan and overseas to meet the challenges and needs of our customers in the future.
