NEXON Co., Ltd.

Nexon Computer Museum to Open in Jeju City, Korea

TOKYO– July 11, 2013 – NEXON Co., Ltd. (“Nexon”) (3659.TO), a worldwide leader in free-to-play online games, announced today that NXC Corporation, Nexon’s parent company, will open the Nexon Computer Museum in Jeju City, Korea, in late July of this year.

Computers have undergone a dynamic and fast-paced evolution during the last few decades. The Nexon Computer Museum was established to share the rich history of computer technology with the local community and children, under the premise that tracking and displaying the digital revolution – which has increasingly become a pivotal segment of society – is a valuable educational experience for current and future generations. The museum will display 1,800 items of significant technological importance, such as a fully operational Apple I. Other exhibits will include a special showroom documenting the history of arcade games; Computers as Theatre, featuring a human-sized computer motherboard; The Real Revolutionary, a look at the history of computers where visitors can experience the groundbreaking programs GW-BASIC and MS-DOS; and Between Reality and Fantasy, examining the evolution and future of first-person shooter games. Visitors will also have a chance to engage in interactive exhibits beginning in 2014, including playing the first version of *The Kingdom of the Winds*, which was awarded a Guinness World Record for the longest-running commercial graphical MMORPG.

Nexon values the community connections that it has fostered through its regional services and engagement, and believes strongly in the importance of creating a positive social environment. Nexon will continue to expand its activities that provide an opportunity to connect with society in the regions it provides service.

Opening: Late July 2013

Address: 86 Nohyung-dong, Jeju City, Jeju Province, Korea

About NEXON Co., Ltd. <http://company.nexon.co.jp/>

NEXON Co., Ltd. ("Nexon") (3659.TO) is a worldwide leader in free-to-play online games. Founded in Korea in 1994, Nexon developed one of the world's first graphics-based massively multiplayer online games. Nexon also pioneered the concept of microtransactions and the free-to-play business model, setting a new standard in which play is free, and users have the option to purchase in-game items to enhance their experience. Nexon currently services nearly 60 online games in more than 100 countries and since its founding, Nexon has generated more than 1.4 billion player registrations. The Company is headquartered in Tokyo, Japan and its shares are listed on the Tokyo Stock Exchange.
