## Notice of Revision to Dividend Forecast (Dividend Increase)

Information Services International-Dentsu, Ltd. (ISID), based on recent results performance, announces a revision to its dividend forecast for the fiscal year ended March 2015, as follows.

### 1. Reasons for the Dividend Forecast Revision

ISID recognizes that returning profits to shareholders is an important management issue, and has established a basic policy for continually providing an appropriate and stable dividend, while retaining earnings to realize sustainable growth.

As indicated in “Notice of Posting Extraordinary Loss and Revision to Forecasts” released today, the ISID Group anticipates increases in net sales, operating income, and ordinary income for the fiscal year ended March 2015. Although net income is expected to decrease, the extraordinary loss that is the main reason for this decline arose from a loss on non-current assets, and is not related to a cash outflow.

Under such circumstances, the Company, inconsideration of such factors as the above mentioned dividend policy, the earnings forecast, and future capital requirements, has decided to further enhance shareholder returns, and revise its year-end dividend to ¥14 per share, from the initial forecast of ¥12 per share. As a result, the full-year dividend per share is expected to be ¥26 per share, an increase of ¥4 from the previous fiscal year.

### 2. Details of the Revision

Date of Record	Dividends per share (Yen)		
	End of 2nd quarter	Fiscal year-end	Full year
Previous forecast		12.00	24.00
Revised forecast		14.00	26.00
Actual dividends for fiscal year ended March 31, 2015	12.00		
Actual dividends for fiscal year ended March 31, 2014	10.00	12.00	22.00

#### Forward-Looking Statements

The forecast figures for sales and earnings presented in this document were determined in accordance with industry trends, client situations, and other judgments and assumptions made with information available at the time of preparation. Accordingly, actual sales and earnings may differ from forecasts as a result of uncertainties inherent in the forecasts, as well as internal and external fluctuations in business operations.
