Press Release

Company Name: WirelessGate, Inc.  
(Code 9419: TSE First Section)  
Location: 5F Tennozu Yusen Bldg., 2-2-20  
Higashi Shinagawa, Shinagawa-ku, Tokyo  
Representative: Takehiro Ikeda,  
Founder and CEO  
Inquiries: Naoki Sunaga,  
CIRO and Member of the Board,  
Corporate Officer,  
Head of Investor Relations Department  
(Phone: 03-6433-2045)

## Release of Validation Kits for Industrial Use IoT

WirelessGate, Inc. (Head Office: Shinagawa-ku, Tokyo; Founder and CEO Takehiro Ikeda; hereinafter "WirelessGate"), a wireless broadband service provider, announces that progress has been made at LTE-X Inc. (Hereinafter "LTE-X"), its subsidiary, in the company's wireless business domain.

LTE-X, which established a system that provides a high-speed, large-capacity, and secure communication system at low cost by utilizing the LTE over Wi-Fi technology, has been validating the effectiveness of the system.

LTE-X had received requests for the supply of a validation kit from a client candidate that is considering the development of new IoT-based products and services and from a company that desires to build a business collaboration with LTE-X. The kit has been developed and will be released at the end of this month.

### ■ Details of the validation kit

- SDK for Linux, LTE-X agent software for clients  
(Android- and Windows-based SDK will be released in due course)
- Two units of client terminals (both wired/wireless versions)  
(incorporating the LTE-X agent software for clients)
- One unit of an Wi-Fi access point terminal (FON AP)

- One unit of an Edge eNodeB device (incorporating the LTE-X agent software for networks)
- Cloud-type EPC access authorization (for ten terminals)
- One set of user manuals

■ Sales price of the validation kit: 1,000,000 yen (excluding taxes)

■ Contact information for purchase: Sales division of LTE-X Inc. [sales@lte-x.co.jp](mailto:sales@lte-x.co.jp)

■ Configuration of the validation kit

### Future prospects

At this moment, this project will have a limited effect on WirelessGate's consolidated financial results for the year ending December 31, 2017. Any impact on the prospects of the company's consolidated performance due to large orders as a result of progress in the business, among other factors, will be promptly disclosed.

WirelessGate will make a reliable wireless broadband environment accessible to everyone by leveraging communication services that the company provides as an aggregator (integrated wireless carrier). With a goal of empowering Japanese industries with IoT provided through LTE-X, it will expand its services to make secure, high-speed, and large-capacity IoT platforms widely available, thereby helping Japan to lead the world again in many industries.

Reference: Consolidated earnings forecast for the current year (announced on February 13, 2017) and the results of the previous consolidated fiscal year

	Consolidated net sales	Consolidated operating profit	Consolidated ordinary profit	Net income attributable to owners of the parent
Consolidated earnings forecast of the current year (December 2017)	13,097 million yen	650 million yen	513 million yen	336 million yen
Consolidated performance of the previous fiscal year (December 2016)	12,239 million yen	1,250 million yen	1,098 million yen	693 million yen
