1. Qualitative Information on Consolidated Business Results, etc., during the Period under Review

(1) Qualitative Information on Consolidated Business Performance

[Overview of the Period under Review]

During the period under review, the Great East Japan Earthquake, which occurred on March 11, 2011, depressed production activities at Japanese manufacturers on the whole, and the widespread mood of voluntary restraint caused sluggish consumer spending. In these severe business conditions, the company made the utmost efforts to ensure the stable supply of wheat flour — a staple food — and various products. The Flour Milling Segment continued to engage in promotional efforts such as reinforcing relationships with customers. In the Processed Food and other businesses, continued cost-cutting measures were provided in the areas of production and distribution.

Meanwhile, in response to the government's 18% average increase in prices for five brands of imported wheat in April 2011, the company changed its prices for commercial wheat flour. We also announced price revisions effective from July 1, 2011, for processed foods.

As a result, due to robust shipment in both our Flour Milling and Processed Food segments, net sales increased 2.6% year-on-year to \$108,570 million. Profits were negatively affected by low prices for bran and the increase of sales promotion expenses in the Flour Milling Segment. Operating income decreased 6.2% year-on-year to \$6,791 million, and ordinary income declined 4.4% from the same period of the previous year to \$7,824 million. Net income advanced 3.8% to \$4,552 million, reflecting Oriental Yeast Co., Ltd., and NBC Meshtec Inc. becoming 100% subsidiaries of the company in 2010.

[Business Overview by Segment]

1) Flour Milling Segment

Focused efforts to strengthen ties with customers and other aggressive sales promotion efforts, pushed commercial wheat flour shipments beyond the level of a year ago. In response to the government's 18% average increase in prices for five brands of imported wheat in April 2011, the company changed its prices for commercial wheat flour in June 2011.

In production and distribution, the company continued to carry out measures to enhance productivity, while making focused efforts to secure the safety and reliability of its products.

The price of bran, a by-product of the milling process, remained low throughout the period, partly due to the Great East Japan Earthquake.

In overseas operations, the completion of productivity enhancement work of the subsidiary in Canada in 2010 resulted in aggressive sales expansion efforts leading to an increase in shipments from the previous year.

As a result, net sales of the Flour Milling Segment increased 3.3% from the same period of the previous year to ¥42,080 million, and operating income declined 30.3% to ¥2,361 million.

2) Processed Food Segment

In a severe business environment, including weak personal consumption due to increasingly tight spending to protect livelihoods, the Processed Food business continued to develop and launch new processed food products that address consumer needs, while conducting in-store promotional activities. As a result, shipments of household-use flour, prepared mix products, frozen food products, and other products performed well, achieving a sales increase from the previous year. For the prepared dishes and other prepared foods business, we continued to promote efforts for sales expansion. We are also committed to the expansion of overseas businesses, especially in the ever-growing Chinese and Southeast Asian markets, as represented by the enhancement of prepared mix production capacity and expansion of the R&D Center in Thailand in 2010.

Sales of the yeast business were the same level as a year earlier, as weak sales of filling and mayonnaise were offset by the strong performance of yeast, mineral yeast and bread improvers, etc. Sales of the biotechnology business fell below those of the previous year chiefly due to the sluggish performance of base materials for culture media and consignment production of feed, etc.

Sales of the healthcare foods business exceeded the previous year's level, despite a severe market environment, reflecting focused efforts to expand sales of consumer products mainly by mail order.

As a result, net sales of the Processed Food Segment increased 3.0% from the same period of the previous year to ¥58,101 million, whereas operating income jumped 12.2% to ¥3,886 million.

3) Others Segment

Sales of the pet food business decreased from the previous year due to a continued harsh market environment, including poor consumption and a decline in store prices, despite sales expansion efforts.

Sales of the mesh cloth business surpassed the previous year's level, as the weak sales of forming filters, affected by the stagnant demand of the automotive parts industry, were surpassed by strong sales of industrial-use materials and mesh cloths for screen-printing applications owing to growing demand for stainless mesh cloths.

As a result, net sales of the Others Segment decreased 3.0% to \$8,388 million. Operating income advanced 71.8% to \$614 million.

(2) Qualitative Information on Consolidated Financial Position

The company's consolidated assets, liabilities and net assets at the end of the period under review were as follows.

Current assets increased \$2,435 million from the previous year end to \$197,649 million. The company posted decreases in cash and deposits and notes and accounts receivable – trade, and increases in short-term investment securities and inventories. Noncurrent assets increased \$2,207 million to \$196,412 million, primarily due to an increase in property, plant and equipment. As a result, total assets increased \$4,642 million from the previous year-end to \$394,061 million. Meanwhile, current liabilities increased \$1,464 million to \$75,893 million, reflecting an increase in notes and accounts payable – trade. Noncurrent liabilities increased \$402 million to \$30,141 million, primarily due to an increase in long-term loans payable. As a result, total liabilities increased \$1,866 million from the previous year-end to \$30,141 million from the previous year-end to \$30,141 million, primarily due to an increase in long-term loans payable. As a result, total liabilities increased \$1,866 million from the previous year-end to \$288,026 million, reflecting an increase due to net income for the period, and a decrease due to the payment of dividends.

(3) Qualitative Information on Consolidated Performance Forecasts

The Japanese economy faces numerous challenges, including a nationwide power shortage and soaring prices of fuels and raw materials. As the severe employment situation will likely continue and future economic prospects remain uncertain, the gravitation of consumers toward low prices and greater savings is expected to continue, leading to continued sluggishness in personal consumption. These factors will continue to constitute an uncertain business environment for the Nisshin Seifun Group. Nevertheless, we will continue to fulfill our missions of securing stable supplies of wheat flour and other staple food supplies for the Japanese people, and will strive to provide customers with safe products in all of our businesses. In addition, to achieve further growth for the Nisshin Seifun Group, we will devote focused efforts to increasing our domestic market share and promote measures to enhance cost competitiveness, while working to accelerate overseas business development.

As a result, the company has not revised its business forecasts for the fiscal year ending March 2012 that were announced on May 12, 2011: net sales of ±447.4 billion, up 5.5% from the previous year; operating income of ±24.6 billion, down 2.9%; ordinary income of ±27.0 billion, down 3.0%; and net income of ±15.1 billion, up 6.4%.

2. Matters Concerning Summary Information (Other)

 Changes in Important Subsidiaries during the Period under Review (Changes in specific subsidiaries involving a change in the scope of consolidation) None.

(2) Adoption of Special Accounting Treatment for Preparing Quarterly Consolidated Financial Statements

Tax expenses are calculated in accordance with Paragraph 12, "Method for Using the Statutory Effective Tax Rate," of the Practical Guidelines on Tax-Effect Accounting for Preparation of Interim Financial Statements, pursuant to the provision of Paragraph 19 of the Guidance on the Accounting Standard for Quarterly Financial Reporting.

The amount of "Income taxes - deferred" is included in "Total income taxes."

(3) Changes in Accounting Policies, Changes in Accounting Estimates and Revisions Restated

(Changes in accounting policies associated with the revision of accounting standards)

Effective from April 1, 2011, the company applied the Accounting Standard for Earnings per Share (ASBJ Statement No. 2, released on June 30, 2010) and the Guidance on Accounting Standard for Earnings per Share (ASBJ Guidance No. 4, released on June 30, 2010).

We have changed the method of calculating quarterly diluted earnings per share. By the new method, the stock options—for which the vesting date comes after a certain period of service—are evaluated by including a portion of the estimated fair value of the stock options that is relative to the future services given to the company in the amount of money to be paid in if the stock options are exercised.

There was no effect of this application during the period under review.

(Additional Information)

Effective from April 1, 2011, the company applied the Accounting Standard for Accounting Changes and Error Corrections (ASBJ Statement No. 24, released on December 4, 2009) and the Guidance on Accounting Standard for Accounting Changes and Error Corrections (ASBJ Guidance No. 24, released on December 4, 2009).
