Summary of Financial Statements for the Year Ended March 31, 2012 [Japanese Standards]

May 14, 2012

Listed Company Name: Nisshin Seifun Group Inc. Registered on Tokyo Stock Exchange and Osaka Securities
 Code: 2002
 URL: http://www.nisshin.com
 Representative: Hiroshi Oeda, President
 Contact: Izumi Inagaki, Director, Division Executive, General Administration Division
 General Manager, Public Communications Department (General Administration Division)
 Tel.: +81-3-5282-6650

Date to hold the Ordinary General Meeting of Shareholders to approve results: June 27, 2012
 Date to start distributing dividends: June 28, 2012
 Date to submit the Securities Report: July 27, 2012
 Supplementary documents for this summary of financial statements: Yes
 Results briefing for financial results: Yes (for analysts and institutional investors)

(Figures shown are rounded down to the nearest million yen.)

1. Consolidated Financial Results for the Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

(1) Consolidated Business Results (The percentages indicate the rates of increase or decrease compared with the previous fiscal year.)

	Net sales		Operating income		Ordinary income		Net income	
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%
Fiscal 2012	441,963	4.2	23,113	(8.8)	26,132	(6.1)	13,326	(6.1)
Fiscal 2011	424,156	(4.4)	25,335	(4.7)	27,839	(5.1)	14,187	(15.7)

(Note) Comprehensive income: Fiscal 2012: ¥17,962 million (43.7%) Fiscal 2011: ¥12,503 million (down 43.9%)

	Net income per share	Diluted net income per share	Return on shareholders' equity	Ordinary income to total assets	Operating income to net sales
	Yen	Yen	%	%	%
Fiscal 2012	53.63	-	4.7	6.4	5.2
Fiscal 2011	57.09	57.09	5.1	7.1	6.0

(Reference) Equity in earnings of affiliates: Fiscal 2012: ¥800 million Fiscal 2011: ¥591 million

(2) Consolidated Financial Position

	Total assets	Net assets	Equity ratio	Net assets per share
	Millions of yen	Millions of yen	%	Yen
March 31, 2012	431,956	298,798	67.5	1,172.72
March 31, 2011	389,418	285,249	71.6	1,121.98

(Reference) Equity capital: Fiscal 2012: ¥291,390 million Fiscal 2011: ¥278,799 million

(3) Consolidated Cash Flows

	Net cash provided by (used in) operating activities	Net cash provided by (used in) investing activities	Net cash provided by (used in) financing activities	Cash and cash equivalents at end of period
	Millions of yen	Millions of yen	Millions of yen	Millions of yen
Fiscal 2012	26,078	(15,244)	(6,134)	46,387
Fiscal 2011	34,856	(16,067)	(6,373)	42,087

2. Dividends

	Dividend per share					Total dividends paid (annual)	Payout ratio (consolidated)	Dividends to net assets (consolidated)
	1Q End	2Q End	3Q End	Year-End	Annual			
Fiscal 2011	Yen -	Yen 10.00	Yen -	Yen 10.00	Yen 20.00	Millions of yen 4,971	% 35.0	% 1.8
Fiscal 2012	-	10.00	-	10.00	20.00	4,970	37.3	1.7
Fiscal 2013 (forecast)	-	10.00	-	10.00	20.00		34.0	

3. Forecasts of Consolidated Business Results for the Year Ending March 31, 2013 (April 1, 2012 to March 31, 2013)

(The full-year percentages indicate the rates of increase or decrease compared with the previous fiscal year; the percentages for the first half are comparisons with the same period of the previous fiscal year.)

	Net sales		Operating income		Ordinary income		Net income		Net income per share
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%	Yen
First half	224,600	4.7	10,600	1.7	11,900	0.1	7,100	6.3	28.57
Full year	459,100	3.9	23,500	1.7	26,300	0.6	14,600	9.6	58.76

*Notes

(1) Changes in important subsidiaries during the period under review (changes in specified subsidiaries involving a change in the scope of consolidation): None

(2) Changes in accounting policies, changes in accounting estimates and revisions restated

- 1) Changes in accounting policies associated with the revision of accounting standards, etc.: Yes
- 2) Changes in accounting policies other than the above: None
- 3) Changes in accounting estimates: None
- 4) Revisions restated: None

Note: For details, please refer to (Changes in accounting policy) of "Basis of Presentation of Consolidated Financial Statements" on pages 27-30 of the Attachment.

(3) Number of shares issued and outstanding (common stock)

- 1) Number of shares issued and outstanding (including treasury shares)
- 2) Number of treasury shares
- 3) Average number of shares outstanding

As of March 31, 2012	251,535,448	As of March 31, 2011	251,535,448
As of March 31, 2012	3,062,310	As of March 31, 2011	3,045,423

I. Business Performance

(1) Analysis of Business Performance

1) Overview of the Period under Review

During the fiscal year ended March 31, 2012, the Japanese economy showed some signs of recovery owing to the demand associated with efforts for reconstruction after the Great East Japan Earthquake, but the market environment continued to be harsh due to sluggish consumer spending reflecting the extensive damage caused by the earthquake, continued deflation and fears of deceleration within the Japanese economy as a result of the European debt crisis and other issues. The company has made the utmost efforts to ensure the stable supply of wheat flour — a staple food — and various products, and has made sales promotion efforts with the aim of further strengthening ties with customers. In all of the company's business segments, cost-cutting measures continued throughout the entire process of business operations, including production and distribution. Meanwhile, in response to the government's 18% average increase in prices for five brands of imported wheat in April 2011, with a 2% increase in October, we revised our product prices.

As a result, consolidated net sales increased 4.2% year on year to ¥441,963 million for the fiscal year under review, partly due to the aforementioned revisions of product prices following the rise in the government's prices for imported wheat. Despite positive results from cost cutting efforts, profits in the Flour Milling Segment were negatively affected by a variety of factors including low prices for bran and deterioration in the wheat flour sales environment. Operating income decreased 8.8% year on year to ¥23,113 million, ordinary income declined 6.1% to ¥26,132 million, and net income decreased 6.1% to ¥13,326 million.

In addition, we acquired a 100% equity interest in the U.S.-based flour milling company Miller Milling Company, LLC in March 2012. With this initiative, we entered the U.S. flour milling market in earnest, which is an issue of considerable ongoing importance in efforts to expand our overseas business.

[Business Overview by Segment]

(1) Flour Milling Segment

Under severe market conditions resulting from consumer gravitation toward low prices and other factors, sales promotion activities including the introduction of distinctive new products and efforts to cultivate markets through exhibitions and workshops pushed commercial wheat flour shipments beyond the level of a year ago. In response to the government's 18% average increase in prices for five brands of imported wheat in April 2011, with a 2% increase in October, the company revised its prices for commercial wheat flour in June and December 2011.

In production and distribution, the company continued to carry out measures to enhance productivity, while making focused efforts to secure the safety and reliability of its products.

The price of bran, a by-product of the milling process, remained low throughout the period.

In overseas operations, the aggressive sales expansion efforts led to an increase in shipments from the previous fiscal year.

As a result, net sales of the Flour Milling Segment increased 6.6% from the previous fiscal year to ¥172,024 million, but operating income declined 26.0% to ¥8,000 million.

(2) Processed Food Segment

Regarding the processed food business, in response to the diversified needs of consumers, we launched new household-use products despite a severe business environment that reflected weak personal consumption. In parallel, we conducted a consumer campaign and in-store promotional activities in addition to other events. In response to the government's increase in prices of imported wheat, we made revisions to the prices of household-use wheat flour and other products. For the prepared dishes and other prepared foods business, we continued to promote efforts for sales expansion. We also maintain our commitment to the expansion of overseas businesses, especially in the growing Chinese and Southeast Asian markets. As a result, sales climbed above the previous fiscal year's level.

As for the yeast and biotechnology business, sales of the yeast business increased from the previous fiscal year, as the decline in shipments of such products as flour paste and mayonnaise was more than offset by an upswing in shipments of other products including yeast and butter cream. Sales of the biotechnology business exceeded the previous year's level due to the favorable performance of immunochemical and other products. In January 2012, we established a company in India, a market that is experiencing growth, aimed at expanding the biotechnology business and developing markets for the food business.

Sales of the healthcare foods business fell below the previous fiscal year's level as the severe market environment continued, despite aggressive promotional efforts to expand sales of consumer products by introducing new mail order products.

As a result, net sales of the Processed Food Segment increased 1.3% from the previous fiscal year to ¥227,586 million, and operating income edged up 0.1% to ¥11,865 million.

(3) Others Segment

Sales of the pet food business decreased from the previous fiscal year due to a continued harsh market environment, including poor consumption and a decline in store prices, despite sales expansion efforts including the aggressive launch of new products.

Regarding the engineering business, sales rose over the previous fiscal year's level due to favorable results in its mainstay plant engineering business. In addition, a business partnership agreement was made with Hosokawa Micron Corporation with the aim of further developing and growing business after an expansion of the machinery lineup and of orders in November 2011.

Sales of the mesh cloth business surpassed the previous fiscal year's level owing to strong sales of materials for screen-printing applications driven mainly by the growing demand for stainless mesh cloths for solar cells, as well as steady sales of industrial application products and forming filters reflecting the recovery in demand for use in automobile parts.

As a result, net sales of the Others Segment increased 11.3% to ¥42,351 million. Operating income jumped 38.4% to ¥3,305 million.

2) Business Outlook

Despite the favorable effects of such factors as reconstruction demand following the earthquake disaster, the Japanese economy faces numerous challenges including concerns surrounding the European economy and the sharp rise in energy and resource prices. In addition, anxieties concerning an increase in social security expenses and taxes as well as expectations of a period of prolonged deflation will likely continue the gravitation of consumers toward lower-priced products and savings. These factors will result in a severe business environment for the Nisshin Seifun Group. Moreover, and in the context of electric power, there is a need to secure stable supply and to address any impact on costs. Under these circumstances, we will continue to fulfill our mission of securing stable supplies of wheat flour and other staple foods for the Japanese people, and will strive to provide customers with safe products from all of our businesses. Meanwhile, in response to the government's decision to reduce the prices of five brands of imported wheat by an average of 15% in April 2012, we announced details of a revision to the price of our commercial wheat flour.

In order to ensure long-term growth, we launched our medium-term management plan, "NNI*-120, Speed, Growth and Expansion" from the current fiscal year. Expanding both our top-line (net sales) and overseas business are priority strategies positioned at the heart of the Plan. We will also implement individual strategic measures.

*NNI: New Nisshin Innovation

Considering the aforementioned factors, the impact of revisions to the price of commercial wheat flour and efforts to expand shipments in each business segment, consolidated net sales for the fiscal year ending March 31, 2013 are forecast to rise 3.9% year on year to ¥459,100 million. From a profit perspective, operating income is projected to climb 1.7% to ¥23,500 million. Ordinary income is anticipated to edge up 0.6% to ¥26,300 million, while net income is expected to increase 9.6% from the fiscal year under review to ¥14,600 million.

(1) Flour Milling Segment

In the flour milling business, we will further increase our market share by continuing with efforts to: stably supply products, develop products that accurately address customer needs, capture new customers, further strengthen customer relationships and engage in other aggressive sales promotion activities. From the production and distribution perspectives, we will implement productivity improvement and other cost-cutting measures while striving to secure earnings. As a part of efforts to enhance productivity by consolidating production at optimal locations, we commenced construction of a new plant in Suzaki Wharf, Chuo-ku, Fukuoka City in May 2012.

In addition, we will revise the price of our commercial wheat flour in July 2012 in response to the government's decision to reduce the prices of five brands of imported wheat by an average of 15% in April 2012.

In response to a projected shortfall in production capacity following steady business growth at Nisshin-STC Flour Milling Co., Ltd. in Thailand, we will engage in enhancement work during the current year with a view to increasing productivity by around 20% at Nisshin-STC Flour Milling. . Meanwhile, in connection with the acquisition of Miller Milling Company, LLC and its inclusion in the Group's scope of consolidation as a wholly owned subsidiary in March 2012, we will undertake productivity enhancement work in order to address future shipment growth. Through these and other means, we will continue to expand our overseas business.

(2) Processed Food Segment

In the processed food business, we will develop new products that respond to customers' more restrained spending patterns and diversifying values. We will also aggressively undertake advertising and promotion activities. Through these collective measures, we will work to expand sales. In addition, we will continue to promote cost-cutting measures across each of purchasing, production and distribution business processes. For the prepared dishes and other prepared foods business, we will strive to increase sales by developing and recommending new menus meeting customer needs. Overseas, we will continue to focus on business expansion in the growing Chinese and Southeast Asian markets.

As for the yeast and biotechnology business, we will continue to advance proposal-based marketing efforts and strengthen development of high-value-added products in the yeast business. At the same time, we will work to develop new markets, outside of bread making, and reinforce this strategy through the utilization of our newest filling plant in Tomisato City, Chiba Prefecture, which came online in February 2012. In addition to actively engaging in services that support the comprehensive research and development of new drugs, the biotechnology business will work diligently to expand its business by bringing new products to market, focusing mainly on diagnostic reagents, and actively exploring potential markets through our overseas bases.

The healthcare foods business will strive to further improve productivity and strengthen its sales system, and, as a healthcare foods manufacturer distinguished by its scientific approach, search for new materials and develop new products, while seeking to expand sales of consumer products primarily by mail order.

(3) Others Segment

The pet food business will continue its efforts to become a premium pet food manufacturer and continue initiatives based on the LIFE20 program for promoting the longevity of pets. At the same time, energies will be channeled toward developing distinctive products and actively promoting their market launch.

For the engineering business, we will endeavor to expand orders for plant engineering services not only in the field of food manufacturing in which we have an advantage, but also in the non-food field. We will also pursue growth in contract processing and equipment sales.

The mesh cloth business will continue efforts aimed at strengthening its business structure through cost reduction and other measures. In addition to ramping up the pace of business development activities in such growth fields as the environment, convenience and medicine, we will concentrate on expanding sales in foreign markets.

(2) Analysis on Financial Position

1) Overview of the Period under Review

The status of assets, liabilities and net assets on a consolidated basis at the end of the year ended March 31, 2012, was as follows.

Current assets climbed ¥18,217 million from the previous fiscal year-end to ¥213,431 million. The company posted a decrease in short-term investment securities, and increases in such accounting line items as notes and accounts receivable – trade and inventories. Noncurrent assets rose ¥24,320 million to ¥218,525 million, primarily due to increases in such items as goodwill, following the acquisition of a 100% equity interest in Miller Milling Company, LLC, and investment securities. As a result, total assets stood at ¥431,956 million, up ¥42,537 million from the previous fiscal year-end. Meanwhile, current liabilities grew ¥17,858 million to ¥92,287 million reflecting increases in notes and accounts payable – trade and other items. Noncurrent liabilities amounted to ¥40,869 million, ¥11,130 million higher than the balance as of March 31, 2011, mainly due to an increase in provision for retirement benefits. Accounting for these factors, total liabilities increased ¥28,988 million from the previous fiscal year-end to ¥133,157 million. Net assets climbed ¥13,548 million year on year to ¥298,798 million. Major movements included an increase due to net income for the period, a decrease owing to the payment of dividends and an upswing in accumulated other comprehensive income.

The status of consolidated cash flows for the fiscal year ended March 31, 2012, was as follows.

Net cash provided by (used in) operating activities

An increase in cash and cash equivalents mainly due to income before income taxes and minority interests of ¥24,361 million and depreciation and amortization of ¥13,636 million surpassed a decrease in cash and cash equivalents largely owing to the payment of income taxes and an increase in working capital resulting from the rise in the government's prices for imported wheat. This led to net cash provided by operating activities of ¥26,078 million for the period under review.

Net cash provided by (used in) investing activities

Although proceeds from the repayment and maturity of time deposits with terms exceeding three months and short-term investment securities surpassed their payments and purchases by ¥11,751 million, purchase of a 100% equity interest in Miller Milling Company, LLC totaling ¥10,578 million and other cash outflows including purchase of property, plant and equipment and intangible assets of ¥14,755 million led to net cash used in investing activities of ¥15,244 million.

Subtracting net cash used in investing activities from net cash provided by operating activities, free cash flow came to an inflow of ¥10,834 million.

Net cash provided by (used in) financing activities

To distribute profits to shareholders, the company paid dividends of ¥4,971 million and undertook other spending for the period, leading to net cash used in financing activities of ¥6,134 million.

As described above, cash provided by operating activities was allocated to the purchase of a 100% equity interest in Miller Milling Company, LLC, strategic capital investment, and the payment of dividends as returns to shareholders. Moreover, cash increased as maturities and redemptions of strategic investments including time deposits with terms exceeding three months and sales of short-term investment securities undertaken to enhance the management efficiency of funds exceeded payments and purchases into these investments. At the end of the fiscal year ended March 31, 2012, consolidated cash and cash equivalents totaled ¥46,387 million, an increase of ¥4,299 million from the previous fiscal year-end.

2) Outlook for the Next Fiscal Year

The company forecasts that cash and cash equivalents as of March 31, 2013, will remain almost unchanged from those as of March 31, 2012, because the funds increased mainly due to net income of ¥14,600 million that will be used for strategic capital investment and the return of profits to shareholders.

3) Cash-flow Indicators

The main cash flow indicators for the Nisshin Seifun Group are as follows:

	Fiscal 2009	Fiscal 2010	Fiscal 2011	Fiscal 2012
Equity ratio (%)	69.3	68.8	71.6	67.5
Market value-based equity ratio (%)	70.5	75.7	61.2	57.6
Ratio of interest-bearing debt to operating cash flow (years)	0.2	0.1	0.1	0.3
Interest coverage ratio (times)	121.1	488.7	461.6	304.7

Notes:

Equity ratio = Equity capital / Total assets

Market value-based equity ratio = Market capitalization / Total assets

Ratio of interest-bearing debt to operating cash flow = Interest-bearing debt / Operating cash flow

Interest coverage ratio = Operating cash flow / Interest expense

1. All of the above cash-flow indicators are calculated on a consolidated basis.
2. Market capitalization is calculated by multiplying the closing share price on the final trading day of the fiscal year by the total number of outstanding shares (excluding treasury common stock) as of the corresponding fiscal year-end.
3. Operating cash flow equals net cash provided by operating activities as stated in the consolidated statements of cash flows. Interest-bearing debt refers to bonds and debt as stated in the consolidated balance sheets. Interest expense is equal to interest payments as stated in the consolidated statements of cash flows.

(3) Basic Policy on Profit Distribution and Dividends for Fiscal 2012 and Fiscal 2013

The company aims to meet the expectations of shareholders to distribute profits, taking into consideration the current and future profitability of its business and financial position, by undertaking the continuous payment of dividends based on a targeted payout ratio of at least 30% on a consolidated basis.

For the fiscal year ended March 31, 2012, the company intends to maintain the per-share annual ordinary dividend at ¥20, the same amount paid for the previous fiscal year. Accordingly, the company will submit to the Ordinary General Meeting of Shareholders a proposal for distribution of surplus to pay a year-end dividend of ¥10 per share.

With the aim of raising corporate value, the company allocates retained earnings for aggressive strategic investment in priority fields that offer the potential for growth and expansion outlined under its medium-term management plan, “NNI-120, Speed, Growth and Expansion.” The company also adopts a flexible posture on shareholder returns.

Furthermore, the company operates a system of special privileges for shareholders. Under this system, shareholders may request the delivery of certain products of the Nisshin Seifun Group.

For the year ending March 31, 2013, the company plans to pay an annual dividend of ¥20 per share, in line with the aforementioned policy of profit distribution.

(4) Business Risks

Risks that could have an impact on the business performance, share price and financial position of the Nisshin Seifun Group are outlined below.

All matters relating to the future in the section below are based on the current views of the Nisshin Seifun Group as of the date of publication of the Summary of Financial Statements (May 14, 2012).

1) Economic conditions and industry environment

The Nisshin Seifun Group continues to work to reinforce its earnings base so as to minimize the impact of economic and industry conditions on business results. However, increased competition in the Japanese domestic market may cause shipment levels to fluctuate or prices of the company’s major products to decline. Other risks include losses caused by the failure of investment or business partners.

2) Progress of WTO, TPP, FTA, EPA and wheat policy reform

The Nisshin Seifun Group has undertaken structural reforms in its flour milling and processed food businesses to strengthen itself against risks inherent to these businesses. Future developments in, the government’s response to, and resulting outcomes of World Trade Organization (WTO) negotiations on agriculture, Trans-Pacific Partnership (TPP) and other Free Trade Agreements (FTAs) and Economic Partnership Agreements (EPAs) under negotiation with individual countries are expected to significantly impact wheat flour-related industries, which include the Group’s flour milling and processed food businesses. In addition, our flour milling and processed food businesses remain vulnerable to risks of domestic wheat flour and flour-related secondary processing market disruption, realignment of related industries, and unanticipated changes in wheat procurement by changes in the Japanese government’s domestic wheat policy. In April 2007, the Japanese government introduced a market-linked wheat pricing system. In October 2010, the government introduced a method of selling imported wheat immediately after it is imported without storing it for a specified period. Continued changes in the government’s wheat policy could significantly change the handling of wheat (including policies governing the government’s purchase, stockpiling and sale of wheat), which may also

constitute a risk factor for the company's flour milling and processed food businesses.

3) Product safety

Growing concerns over food safety put increasing pressure on the food industry to ensure the safety of the food it supplies. The Nisshin Seifun Group continues to upgrade efforts to improve its product quality assurance systems, but group operations are exposed to a variety of safety-related risks due to external and other factors. Events beyond the scope of the company's projections could lead to product recalls or the discovery of defective items. The Nisshin Seifun Group is exposed to similarly unpredictable risks, which could result in defective items, also on the raw material procurement side.

4) Sharp increases in raw materials prices

The Nisshin Seifun Group continues to aim to develop low-cost operations to ensure that earnings are more resistant to the possibility of future wheat market deregulation. Nevertheless, the company may not be in a position to achieve cost reductions in the event of fluctuations in raw material market conditions, movements in distribution costs as a result of crude oil price hikes and increases in the prices of such raw materials as packaging. In addition, the Group's business performance could be adversely affected if a significant rise in the cost of purchasing raw materials and products due to an increase in imported wheat prices and other reasons was not offset by revisions in the selling prices of wheat flour, processed foods and other products.

5) Foreign exchange movements (principally yen-dollar, yen-euro and yen-baht)

Although the Nisshin Seifun Group uses currency forwards and other hedging tools to minimize the impact of foreign exchange movements on results, the sourcing of some raw materials and other inputs from overseas exposes some group operations to the risk of variance in purchasing costs due to currency market fluctuations, particularly in processed food. The operational performance and financial position of overseas operations may also vary due to changes in the value of the yen. In flour milling business, the level of prices for imported bran, which vary according to foreign exchange movements, also affect the price of bran, a milling by-product.

6) Contract manufacturing

The Nisshin Seifun Group contracts out the manufacturing of some products to optimize production efficiency. Although the company makes suitable efforts to ensure that contract manufacturers adhere to the same levels of quality control and input purchase stability, the company remains exposed to the risk of the business failure of subcontractors due to circumstances beyond its control. Any such eventuality could result in higher purchasing costs or an interruption in product supply.

7) Information- and system-related risks

The Nisshin Seifun Group has established appropriate levels of management controls for its internal systems. Problems encountered with the operation of these systems have the potential to interrupt supplies to customers or to incur extra costs. Although the Nisshin Seifun Group maintains proper controls to thwart viruses and other computer-related problems and manage IT systems, any unforeseen attacks by viruses or unauthorized access to internal systems have the potential to interrupt supplies to customers. Other information- and system-related risks include the leakage of operationally sensitive data or confidential personal information, which could also result in higher costs or damage to the company's reputation.

8) Alliances with other companies

The Nisshin Seifun Group maintains alliances with other companies as part of efforts to optimize use of management resources and to maximize the benefits of technology. Disagreements with alliance partners could result in failure to realize such benefits.

9) Facility security and natural disasters

The Nisshin Seifun Group continues to work to upgrade its safety and site management systems to ensure the security of production plants and other facilities and to prevent accidents such as fires or explosions. We are implementing seismic strengthening initiatives and liquefaction countermeasures at our mainstay plants to prevent any injury to personnel or damage to facilities should such natural disasters as earthquakes, storms and floods occur. The Group is also undertaking a review of its capabilities including the additional formulation of a business continuity plan (BCP) in response to the future envisioned incidence of a major earthquake. However, events beyond the scope of the company's projections, including developments such as epidemics or pandemics of new strains of influenza, could lead to damage or to the interruption of product supplies to customers.

10) Regulatory compliance

Although the Nisshin Seifun Group continues to focus on upgrading legal and regulatory compliance, unforeseen events have the potential to result in higher costs.

11) Overseas incidents

Although the Nisshin Seifun Group makes efforts to prevent accidents at its overseas operations, the performance of these businesses is subject to various economic and political risks, and risks associated with developments such as epidemics or pandemics of new strains of influenza, that could result in higher costs.

12) Intellectual property

Ongoing efforts by the Nisshin Seifun Group to protect its intellectual property notwithstanding, the launch and sale of similar products by other firms could be potentially detrimental to the value of the company's brands. In addition, the company also faces the risk of possible future claims against it by other companies for intellectual property infringement.

13) Environmental management

The environmental impact of the Nisshin Seifun Group's businesses is relatively low compared to other industries. Nevertheless, the company continues to make assiduous efforts to improve the environmental profile of the Nisshin Seifun Group's business activities in terms of environmental management systems, energy efficiency and waste reduction. Despite such efforts, events beyond the scope of the company's projections could force the company to undertake measures that result in higher costs.

14) Great East Japan Earthquake

The Great East Japan Earthquake, which struck on March 11, 2011, is expected to have major long-term impacts on Japanese society as a whole. Risks moving forward include the following:

- Anxieties concerning prolonged power shortages
- Difficulty in procuring raw materials from suppliers
- Diminished consumer confidence in the Japanese market
- Other indirect impacts of the earthquake

Should any of these risks come to fruition, they could negatively impact the Nisshin Seifun Group's business performance in terms of lower sales, reduced production capacity utilization, etc.

II. Business Group Performance

The Nisshin Seifun Group consists of 50 subsidiaries and 16 affiliates. The following is a description of the businesses of the Group and the relationships among the subsidiaries and affiliates within their respective business segments. Business groupings are the same as those described in “4. Consolidated Financial Statements (7) Notes to Consolidated Financial Statements [Segment information, etc.]”

(1) Flour Milling Segment

Nisshin Flour Milling Inc., a consolidated subsidiary, produces wheat flour and bran, a by-product, and sells them through sales agents. Fresh Food Service Co., Ltd., a consolidated subsidiary, primarily sells frozen foods and their ingredients and operates restaurants serving food using wheat flour-based commercial ingredients. It purchases wheat flour and other ingredients from Nisshin Flour Milling. Yamajo Shoji Co., Ltd., a consolidated subsidiary, and Ishikawa Co., Ltd., an affiliate accounted for by the equity method, are Nisshin Flour Milling sales agents. Ishikawa also sells packaging materials to Nisshin Flour Milling.

Miller Milling Company, LLC in the U.S, Rogers Foods Ltd. in Canada and Nisshin-STC Flour Milling Co., Ltd. in Thailand, all of which are consolidated subsidiaries, produce wheat flour and sell it in the North American and Asian markets, respectively. Four Leaves Pte. Ltd., an affiliate accounted for by the equity method, operates bakeries, primarily in Singapore. Miller Milling Company, LLC became a consolidated subsidiary of the company following the purchase of an equity interest in March 2012.

(2) Processed Food Segment

Nisshin Foods Inc., a consolidated subsidiary, produces and sells prepared mix and other processed food products. It sells wheat flour for household use purchased from Nisshin Flour Milling and frozen foods and other processed foods procured from companies outside the Nisshin Seifun Group. Ma•Ma-Macaroni Co., Ltd., a consolidated subsidiary, produces pasta whose primary ingredient is wheat flour produced by Nisshin Flour Milling and sells the pasta through Nisshin Foods. Initio Foods Inc., a consolidated subsidiary, produces and sells frozen and prepared dishes and also directly operates concessions in stores including department stores. Daisen Ham Co., Ltd., also a consolidated subsidiary, produces and sells processed meat products.

Medallion Foods Inc., a consolidated subsidiary in the U.S., produces pasta and Thai Nisshin Seifun Co., Ltd., a consolidated subsidiary in Thailand, produces pasta sauce and frozen food products. Nisshin Foods is the primary importer and seller of these products in Japan. Thai Nisshin Technomic Co., Ltd., a consolidated subsidiary, manufactures prepared mix and sells it in Southeast Asia. Shin Nisshin Seifun Foods (Qingdao) Co., Ltd., a consolidated subsidiary in China, manufactures prepared mix and sells it in mainland China. Nisshin Seifun OYC (Shanghai) Co., Ltd. in China, a consolidated subsidiary, sells commercial bakery materials, such as bakery mix and bread improvers, to bakery customers in China.

Oriental Yeast Co., Ltd., a consolidated subsidiary, manufactures and sells cake and bread ingredients and biochemical products, as well as operating a life science business.

Nisshin Pharma Inc., a consolidated subsidiary, manufactures and sells healthcare foods and pharmaceuticals.

(3) Others Segment

Nisshin Petfood Inc., a consolidated subsidiary, manufactures and sells pet foods.

Nisshin Engineering Inc., a consolidated subsidiary, undertakes design, subcontracted construction and management of production and processing facilities for grain, food products, and chemical products. In addition, it manufactures and sells powder-processing machines and engages in powder-processing, as well as engaging in subcontracted construction for some Nisshin Seifun Group companies.

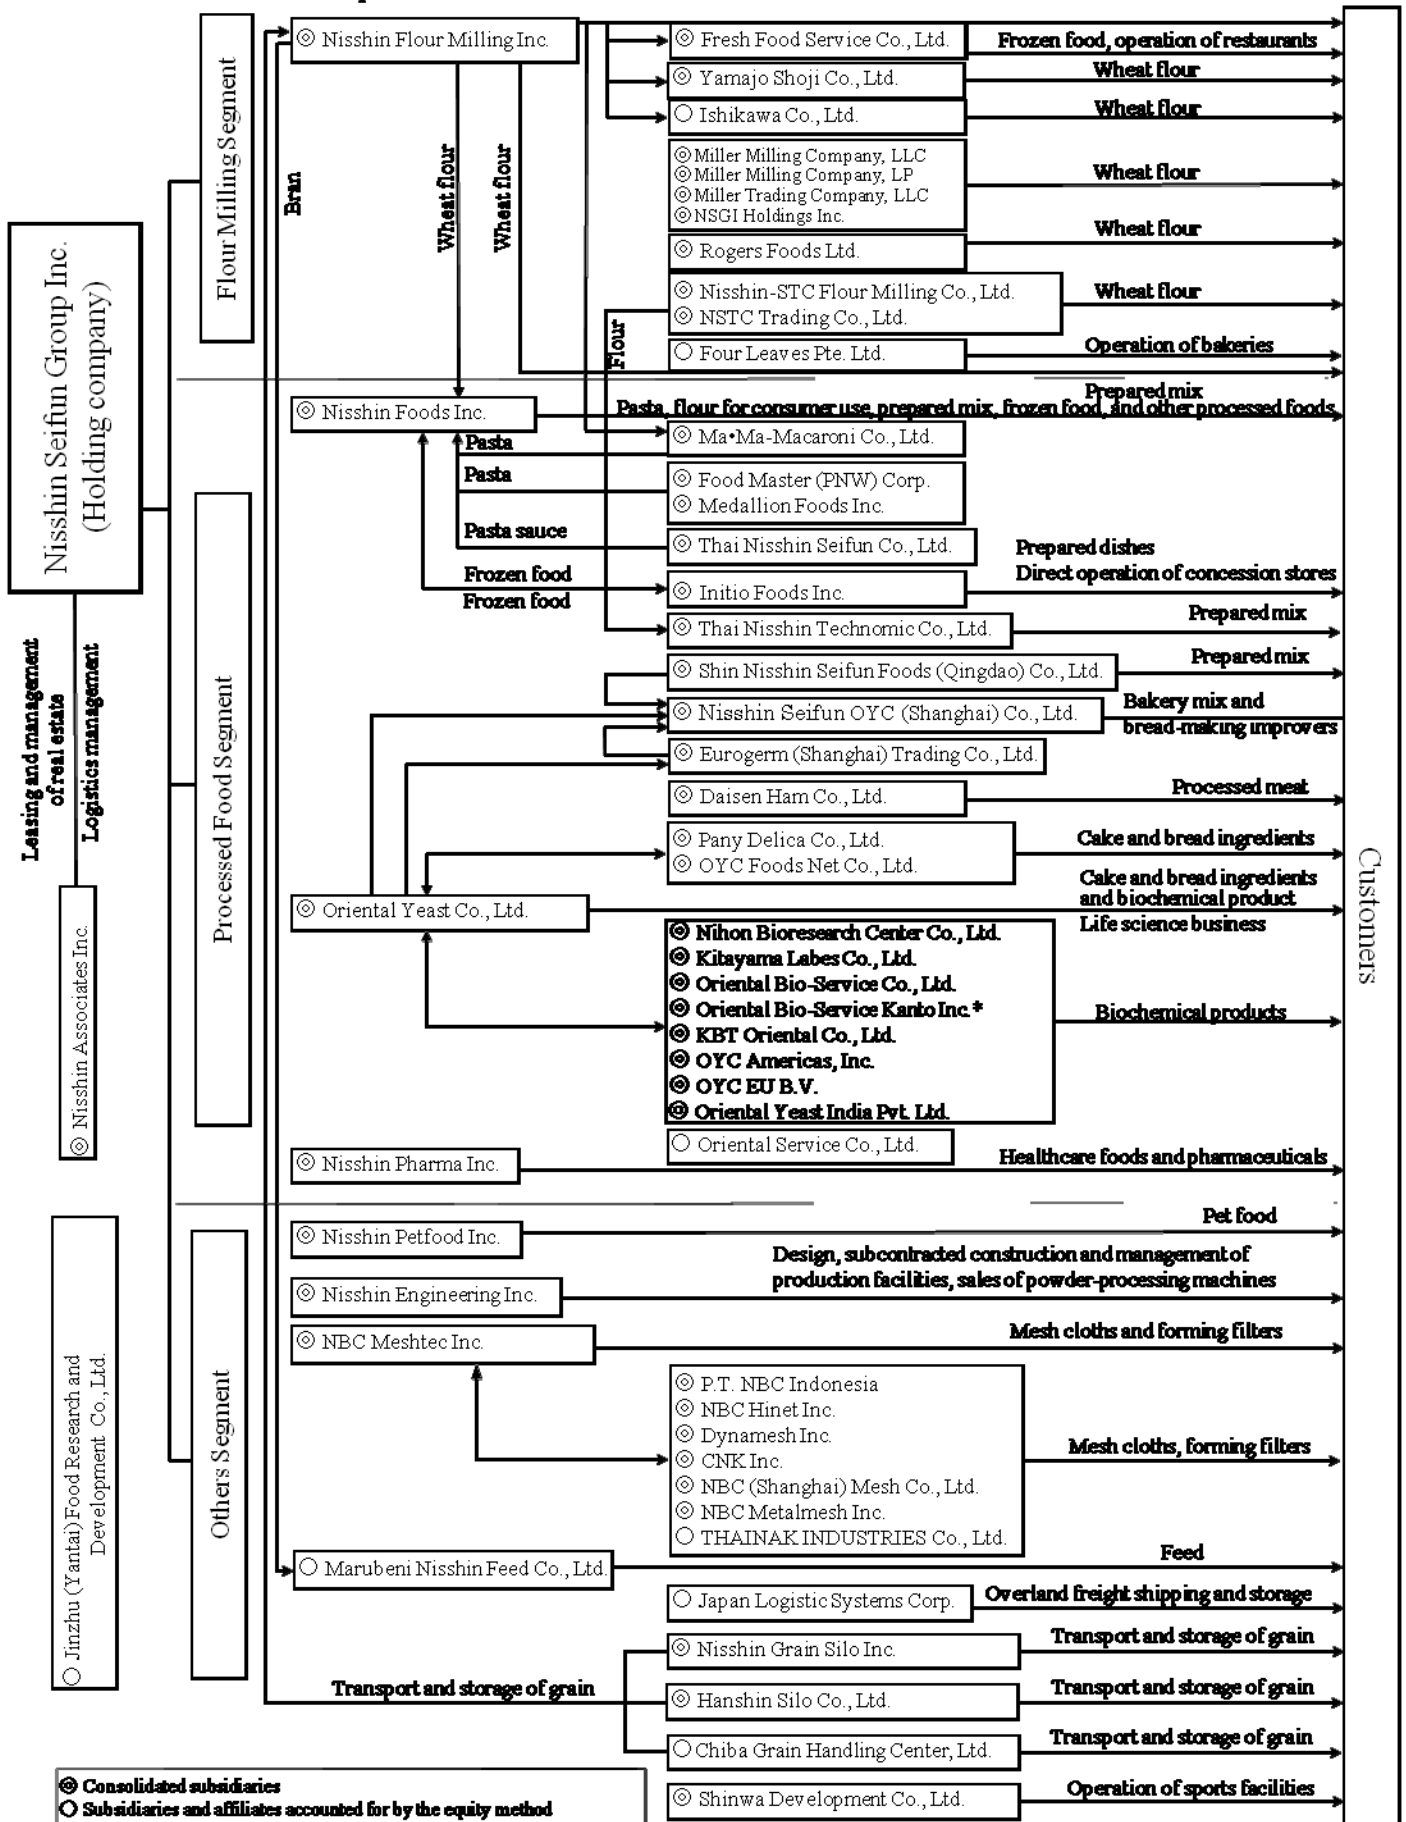

NBC Meshtec Inc., a consolidated subsidiary, manufactures and sells mesh cloths and forming filters.

Marubeni Nisshin Feed Co., Ltd., an affiliate accounted for by the equity method, manufactures and sells compound feed.

Japan Logistic Systems Corp., an affiliate accounted for by the equity method, is engaged in overland freight shipping and storage. It ships and stores some of the Group's products. Nisshin Grain Silo Inc. and Hanshin Silo Co., Ltd., both consolidated subsidiaries as well as Chiba Grain Handling Center, Ltd., an affiliate accounted for by the equity method, are engaged in transport and storage operations for grain. Shinwa Development Co., Ltd., a consolidated subsidiary, operates sports facilities.

The diagram on the following page illustrates the structure of the Nisshin Seifun Group.

Nisshin Seifun Group Structure

*Oriental Bio-Service Kanto Inc. was merged into Oriental Yeast Co, Ltd. on April 1, 2012.

3. The following company is listed on stock exchanges in Japan:
An affiliate accounted for by the equity method: Japan Logistic Systems Corp. (JASDAQ)

III. Business Policies

(1) Basic Business Policy

The Nisshin Seifun Group espouses two corporate philosophies: “the basis of business is built on trust” and “in tune with the changing business climate.” In combination with the principle “to contribute to a healthy and fruitful life for all,” these philosophies have formed the foundation for the Group to achieve continued growth and expansion of its businesses. In addition, the Group has adopted “Delivering Good Health and Reliability” as its corporate slogan. This expresses the commitment that every Nisshin Seifun Group member firm should strive to deliver products and services that contribute positively to health and build consumer trust.

Based on this philosophy, in its role as the holding company of the Nisshin Seifun Group, the company specifies long-term maximization of corporate value as the key business goal. Group management prioritizes the investment of resources in core operations and businesses with growth potential.

The Group also promotes internal reform while fulfilling its corporate social responsibilities in terms of enhancing its internal control systems, legal and regulatory compliance, food safety, environmental protection and social contribution. The Nisshin Seifun Group is fully committed to gaining the support of all stakeholders, including shareholders, customers, business partners, employees and local communities.

(2) Medium-to Long-term Business Strategy and Target Indicators

Taking a long-term perspective focused through 2020, our 120th year of operation, we commenced our new medium-term management plan, “NNI-120, Speed, Growth and Expansion,” which covers the three-year period from April 2012 to March 2015.

With the near-future goals of achieving net sales of ¥1 trillion and a ratio of overseas sales to total net sales of at least 30%, the Nisshin Seifun Group will continuously evolve as a robust and innovative organization while realizing growth and expansion.

Under this medium-term management plan, we have positioned top-line (net sales) growth and overseas business expansion as our first order of business. In order to accomplish our established goals, we will upgrade and bolster our internal organization and proactively pursue M&As and alliances. In addition, we will engage in both the production and supply of safe and reliable products while putting in place a competitive cost structure that is more than capable of confronting the pressures imposed by imported products. In this manner, we will remain competitive in any and all environments.

Based on the Group’s basic strategies, each Group company will carry out its own individual initiatives with a greater sense of urgency. By generating growth and expansion, we will continue our efforts toward becoming a corporate group that is vigorously supported by all stakeholders including customers.

Through the implementation of such strategies, the Group aims to achieve sustained growth in earnings per share (EPS) over the long term, while also greatly raising group value through raising net sales, ordinary income, net income and return on equity (ROE: defined as net income divided by shareholders’ equity).

(3) Issues to be Addressed

The Nisshin Seifun Group will further strengthen its core flour milling and processed food businesses. At the same time, we will proactively expand our activities in such growth fields as prepared dishes and other prepared foods, yeast and biotechnology, healthcare foods, pet foods, engineering and mesh cloths.

The Great East Japan Earthquake, which struck on March 11, 2011, is expected to have a prolonged

impact. In addition, an appropriate response to nationwide power shortages and any increase in utility charges as a result of the shutdown of nuclear power generation facilities is essential. Under these circumstances, the Nisshin Seifun Group will continue to fulfill its mission of securing stable supplies of wheat flour and other staple foods for the Japanese people, and will strive to provide customers with safe products from all of its businesses.

1) Segmental Overview of Business Strategy

To further solidify its overwhelming competitive advantage in the domestic market, the flour milling business will increasingly strengthen new product proposals and marketing initiatives to boost its market share. In addition, we broke ground on construction of a new plant in Suzaki Wharf, Chuo-ku, Fukuoka City in May 2012. When this plant comes online in February 2014, plants in Tosu and Chikugo will be closed. Through decisions like this, the flour milling business is and will continue to pursue low-cost operations by improving production system efficiency and productivity.

The processed food business will strive to accelerate the introduction of new products utilizing the company's proprietary technologies and achieve expansion in growth areas like commercial prepared mixes, while making accelerated efforts to seek a larger market share even for those items that have already attained the top share.

With an aging Japanese society and generally heightened awareness of health issues, the company continues to channel resources into development of the healthcare and biotechnology business, which is projected to grow. The goal in this sector is to develop business to the point where it provides a core business, on a par with flour milling and processed food. In particular, Oriental Yeast Co., Ltd. forms the nucleus of the Nisshin Seifun Group's biotech research strategy, which is expected to yield results across a variety of fields. In developing the healthcare foods business, we are placing emphasis on adopting a scientific approach, focusing on researching new ingredients, developing and launching original products, and implementing effective advertising and promotion measures, all in a bid to expand sales of consumer products.

In other businesses which include pet food, engineering and mesh cloths, the Group aims to develop a significant presence and growth within each industry.

2) Global Development Strategy

The Group seeks to achieve further growth by accelerating the expansion of its international network. We will adopt a focused approach toward the allocation of our expertise, personnel, assets and other management resources accumulated within the Group and nurture our overseas business as a pillar that is capable of driving Group growth.

Regarding existing businesses, we project a shortfall in production capacity due to the steady performance growth exhibited by Nisshin-STC Flour Milling Co., Ltd., which is engaged in flour milling operations in Thailand. As a result, we will push forward enhancement work during the current year with a view to increasing productivity by around 20%. Looking ahead, we will continue to boost sales through a variety of measures including business development in Thailand as well as the expansion of exports to surrounding countries in Southeast Asia.

Meanwhile, in the area of new business development, we purchased a 100% equity interest in Miller Milling Company, LLC, a flour milling company in the U.S. with two mills in close proximity to major consumption areas in both the eastern and western regions, in March 2012. During the current year, we will boost production capacity at each mill and further expand shipments. Moreover, in the yeast and biotechnology business, we will increase sales in the biotechnology business while aggressively

developing markets in the food business through our local company in India, established in January 2012.

The Nisshin Seifun Group will continue to cultivate new global businesses by undertaking investment activities that include alliances with other companies in areas where it can take full advantage of Group strengths such as flour milling and processed foods.

3) R&D Strategy and Cost Strategy

In addition to developing new products, the Group will continue to uncover basic and core technologies in new domains. High value-added, next-generation products that are novel and unique will be developed continuously. In research, we will increase efficiency and speed in order to promote the commercialization and practical application of research results. To this end, we will identify key fields and establish research themes closely aligned with business strategies. Accordingly, the Group will increase R&D investments for the year ending March 2013.

Regarding raw material and energy markets, for which significant fluctuations are expected to continue, the Nisshin Seifun Group will work to reduce production and procurement costs and build an operational foundation that is capable of securing earnings that properly reflect changing costs.

4) Measures Addressing Wheat Policy Reforms

In November 2011, the Japanese government indicated its intention to enter into negotiations with related countries as a part of its efforts to participate in Trans-Pacific Partnership (TPP) discussions. While the government's future response and details regarding TPP negotiations remain unclear, we anticipate discussions will have a major impact on our flour milling and processed food businesses and on wheat-flour-related industries, in general.

Since the introduction of the market-linked wheat pricing system, the government's sales prices for imported wheat have been repeatedly revised to reflect international wheat market movements, and the Group has revised its relevant product prices accordingly. Determining shifts in operating conditions including further anticipated changes in systems, we plan to increase the pace of structural reforms and our global business development program to accelerate the evolution of the Nisshin Seifun Group into a strong, globally competitive enterprise.

5) Corporate Social Responsibility (CSR)

Besides making steady progress on these strategic business issues, the Nisshin Seifun Group has fulfilled its responsibilities as a corporate citizen in all its business activities, with the aim of retaining its status as a corporate entity that plays an essential role in society. To this end, the Group established a Social Committee to study and develop basic attitudes and their actions with regard to all their stakeholders. In addition, and as a member of society, the company will place considerable emphasis on addressing social requirements including relief and reconstruction support for areas devastated by the Great East Japan Earthquake. The Nisshin Seifun Group has positioned CSR activities as one of its top management priorities and is taking thoroughgoing steps to ensure a Group-wide commitment. This includes adhering strictly to compliance, establishing traceability and other quality assurance (QA) procedures, and engaging in environmental protection activities.

Regarding its quality assurance (QA) procedures, the Nisshin Seifun Group continues to undertake the necessary expenditure required to implement various measures aimed at ensuring the safety and high quality of its products. The CR (Consumer Relations) Office, which is charged with the responsibilities of identifying consumer mind-sets and social trends while providing timely and

appropriate direction as to what actions need to be taken as a group, works closely with Group companies. In this manner, every effort is made to enhance Group customer relations.

Regarding CO₂ emission reductions to fight global warming, the Nisshin Seifun Group achieved its voluntary target of cutting its emissions by 8.6% relative to the 1990 level in both fiscal 2011 and fiscal 2012 in accordance with the Kyoto Protocol Target Achievement Plan. Going forward from the current fiscal year, we are aware that new initiatives are required to address concerns regarding the supply of electric power. While assessing conditions, we will continue to implement all necessary measures aimed at reducing CO₂ emissions.

The Nisshin Seifun Group engages in a broad range of social contribution activities. The Group plans to open the “Nisshin Seifun (Flour Milling) Museum” in Tatebayashi City, Gunma Prefecture, where the company that is currently Nisshin Seifun Group Inc. was founded, around autumn this year. In addition to providing invaluable information and first-hand experience on flour milling (wheat and wheat flour), recognized around the world as a precious resource, this museum will contribute to the growth and development of Tatebayashi City as a major tourist attraction and educational asset. Among a host of initiatives, we are also a supporter of the United Nations World Food Programme (WFP).

For internal control, the Group is doing more than what is required by the Financial Instruments and Exchange Law by extensively reconstructing its internal control systems group-wide. These systems are monitored by a dedicated department (the Internal Control Department) to maintain their integrity and seek further improvements.

The Nisshin Seifun Group will continue to take actions to fulfill its corporate social responsibilities.

(5) Going Concern Considerations

None.

(6) Basis of Presentation of Consolidated Financial Statements

1. Scope of consolidation

(1) Consolidated subsidiaries: 45

- Names of principal subsidiaries: Nisshin Flour Milling Inc., Miller Milling Company, LLC, Nisshin Foods Inc., Ma•Ma-Macaroni Co., Ltd., Initio Foods Inc., Oriental Yeast Co., Ltd., Nisshin Pharma Inc., Nisshin Petfood Inc., Nisshin Engineering Inc., NBC Meshtec Inc.
- Of the remaining subsidiaries, Nisshin Managerial Technology Center Co., Ltd. and four other companies are not consolidated. The assets, net sales, net income and retained earnings of each non-consolidated subsidiary are small, and the aggregate effect on the consolidated financial statements is immaterial.

(2) Changes in the scope of consolidation

(New) 6 companies

- Effective from the fiscal year under review, the company newly acquired equity interests in Miller Milling Company, LLC and three other companies, and newly established Oriental Yeast India Pvt. Ltd. Accordingly, each company was included in the scope of consolidation of the company.
- The company acquired additional shares of Hanshin Silo Co., Ltd., an affiliate accounted for by the equity method, up to the previous fiscal year. Accordingly, Hanshin Silo was included in the scope of consolidation of the company.

2. Scope of the equity method

(1) Subsidiaries and affiliates accounted for by the equity method: 9 (one non-consolidated subsidiary and eight affiliates)

- Names of principal subsidiaries and affiliates accounted for by the equity method: Marubeni Nisshin Feed Co., Ltd., Japan Logistic Systems Corp.
- The contributions to consolidated net income and consolidated retained earnings of each of the four non-consolidated subsidiaries and eight affiliates not accounted for by the equity method are negligible and immaterial in the aggregate.

(2) Changes in the scope of the equity method

(New) 1 company

- Effective from the fiscal year under review, Eurogerm (Shanghai) Trading Co., Ltd., which was established as a joint-venture company with Eurogerm S.A., was included in the scope of the equity method.

(Excluded) 1 company

- Effective from the fiscal year under review, Hanshin Silo Co., Ltd. became a consolidated subsidiary and was accordingly excluded from the scope of the equity method.

(3) The financial statements for the accounting period of the company concerned are used in the cases of those subsidiaries and affiliates accounted for by the equity method whose accounting period differs from the consolidated accounting period.

3. Accounting periods of consolidated subsidiaries

The consolidated subsidiaries listed below have accounting periods that differ from the consolidated accounting period. Since the year-end of each of these companies is within three months of the consolidated year-end, the current financial statements at the year-end of each consolidated subsidiary are used. However, necessary adjustments are made for material transactions that occurred during the period between the subsidiary's year-end and the consolidated year-end.

Company name	Year-end
Rogers Foods Ltd.	January 31
Thai Nisshin Seifun Co., Ltd. and 12 others	December 31

The financial statements for the accounting period ended December 31, 2011 of Miller Milling Company, LLC and three other companies have been used after making the necessary adjustments for material transactions that occurred up to the March 2012 acquisition of equity interests. The financial statements as of the February 2012 payment of equity investment of Oriental Yeast India Pvt. Ltd. have also been used. As a result, these companies are not included in the number of companies listed above.

4. Significant accounting principles

(1) Valuation standards and methodology for material assets

a. Securities

Held-to-maturity debt securities are stated at amortized cost.

Other securities

Securities with a readily determinable market value are stated at fair market value based on the quoted market price at the fiscal year-end (with any unrealized gains or losses being reported directly as a component of shareholders' equity and the cost of any securities sold being computed by the moving average method).

Securities with no readily determinable market value are stated at cost, with cost being determined by the moving average method.

b. Derivatives

Derivative financial instruments are stated at fair market value.

c. Inventories

Wheat flour and bran are stated at cost, with cost being determined by the retail cost method, with balance sheet values reflecting write downs for decreased profitability; other products are stated at cost, with cost being determined by the periodic average method, with balance sheet values reflecting write downs for decreased profitability.

Raw materials are stated at cost, with cost being determined by the first-in, first-out method, and balance sheet values reflecting write downs for decreased profitability.

(2) Depreciation methods for material depreciable assets

a. Property, plant and equipment (excluding lease assets)

The company and domestic consolidated subsidiaries mainly apply the declining balance method. However, for buildings acquired on or after April 1, 1998 (excluding building fixtures), they apply the straight-line method.

Foreign consolidated subsidiaries mainly apply the straight-line method.

b. Intangible assets (excluding leased assets)

Depreciation is computed by the straight-line method. Software used in-house is depreciated over its estimated useful life (within five years) based on the straight-line method.

c. Lease assets

Lease assets related to finance lease transactions that do not transfer ownership are depreciated using the straight-line method with estimated useful lives equal to lease terms, and zero residual values.

Finance lease transactions that do not transfer ownership and began prior to the year in which the Accounting Standard for Lease Transactions Accounting Standards Board of Japan (ASBJ Statement No. 13, revised on March 30, 2007) was first applied (on March 31, 2008 or earlier) will continue to be accounted for in a manner similar to that for ordinary rental transactions.

(3) Basis of material allowances

a. Allowance for doubtful accounts

The company and domestic consolidated subsidiaries provide for possible credit losses stemming from trade notes and accounts receivable. Estimates of irrecoverable amounts are based on historical loan-loss ratios for general receivables, and on a consideration of feasibly recoverable amounts in individual cases of suspected bad debt or other specific dubious accounts. Specific claims are generally deemed irrecoverable in the case of foreign consolidated subsidiaries.

b. Provision for retirement benefits

The company and domestic consolidated subsidiaries provide for employees and already retired pension recipients based on the estimated amounts of projected benefit obligation and the market value of the pension plan assets at the fiscal year-end. Prior service cost is amortized on a straight-line basis over a period equaling the average remaining service period of employees expected to receive pension benefits as of the fiscal year-end. Actuarial differences are amortized on a straight-line basis from the following fiscal year over a period equaling the average remaining service period of employees expected to receive pension benefits as of the consolidated fiscal year-end.

(Additional Information)

The company and some of its consolidated subsidiaries traditionally provided a tax-qualified pension plan and a lump-sum retirement benefit plan. As of October 1, 2011, however, a lump-sum retirement benefit plan, a defined-contribution pension plan and a defined-benefit corporate pension plan limited to already retired pension recipients have been adopted instead of the aforementioned plans.

c. Provision for directors' retirement benefits

Ten domestic consolidated subsidiaries provide for the payment of retirement benefits to directors in accordance with internal regulations, based on projected benefits as of the fiscal year-end.

(4) Significant hedging transactions

a. Basis of accounting

Hedging transactions are accounted for on a deferred basis. However, the contracted exchange rates are applied in the case of any financial claims denominated in foreign currencies with assigned foreign currency forwards or other hedging instruments.

b. Hedging methods

The company uses derivative transactions (including forward exchange contracts and currency call options) to hedge currency risk exposure for any monetary receivables and payables and planned trading transactions that are denominated in foreign currencies.

c. Hedging policy

The company employs derivative financial instruments only for the aforementioned transactions purely to manage fluctuations in foreign currency exchange rates.

d. Hedging evaluation

Since hedging methods and the target of each hedging transaction share the same conditions that apply at the start of hedging activities and throughout subsequent periods, the company's hedging approach enables exchange rate fluctuations to be offset completely. Hence, the company considers its hedging method to be highly effective.

(5) Goodwill amortization and amortization periods

Goodwill is amortized using the straight-line method over a period of mainly 10 years beginning with the day on which it is realized. However, when the amount of goodwill is immaterial, it is amortized in total in the year it is realized.

(6) Cash and cash equivalents in the Consolidated Statements of Cash Flows

Cash and cash equivalents as stated in the Consolidated Statements of Cash Flows consist of cash in hand, readily available deposits, and any short-term liquid investments with a maturity not exceeding three months at the time of purchase whose value is not subject to significant fluctuation risk.

(7) Consumption tax

All accounting transactions are booked exclusive of any national or local consumption taxes.

(Changes in accounting policy)

Effective from April 1, 2011, the company applied the Accounting Standard for Earnings per Share (ASBJ Statement No. 2, released on June 30, 2010) and the Guidance on Accounting Standard for Earnings per Share (ASBJ Guidance No. 4, released on June 30, 2010).

We have changed the method of calculating diluted earnings per share. By the new method, the stock options—for which the vesting date comes after a certain period of service—are evaluated by including a portion of the estimated market value of the stock options that is relative to the future services given to the company in the amount of money to be paid in if the stock options are exercised.

There was no effect of this application during the period under review.

(Additional information)

Effective from April 1, 2011, the company applied the Accounting Standard for Accounting Changes and Error Corrections (ASBJ Statement No. 24, released on December 4, 2009) and the Guidance on Accounting Standard for Accounting Changes and Error Corrections (ASBJ Guidance No. 24, released on December 4, 2009).

(7) Notes to Consolidated Financial Statements

[Consolidated Balance Sheets]

All amounts have been rounded down to the nearest million yen.

1. Components of inventories

	Fiscal 2011	Fiscal 2012
Merchandise and finished goods	¥21,897 million	¥24,917 million
Work in process	¥2,602 million	¥3,061 million
Raw materials and supplies	¥18,559 million	¥34,304 million

2. Accumulated depreciation of property, plant and equipment

	Fiscal 2011	Fiscal 2012
	¥225,819 million	¥235,187 million

3. Reduction entry of depreciation of property, plant and equipment purchased with government subsidy

	Fiscal 2011	Fiscal 2012
Accumulated reduction entry of property, plant and equipment	¥359 million	¥359 million

4. Amounts corresponding to non-consolidated subsidiaries and affiliates are as follows.

	Fiscal 2011	Fiscal 2012
Investment securities	¥16,416 million	¥15,995 million
Others	¥125 million	¥164 million

5. Assets pledged as collateral

	Fiscal 2011	Fiscal 2012
Assets pledged as collateral		
Notes and accounts receivable – trade	–	¥1,134 million
Inventories	–	¥2,737 million
Buildings and structures	¥1,324 million	¥2,081 million
Machinery and equipment	¥592 million	¥2,057 million
Other	¥124 million	¥771 million
Secured debt		
Short-term loans payable	¥200 million	¥2,874 million
Long-term loans payable	–	¥1,582 million

6. Warranty liabilities

	Fiscal 2011	Fiscal 2012
	¥768 million	¥206 million

7. Notes with maturity dates as of the fiscal year-end are settled on subsequent clearance dates. As the fiscal year-end fell on a holiday for financial institutions, notes with maturity dates as of the fiscal year-end were included in the following accounting line items.

	Fiscal 2011	Fiscal 2012
Notes receivable	–	¥379 million
Notes payable	–	¥0 million

[Consolidated Statements of Income]

All amounts have been rounded down to the nearest million yen.

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

1. Impairment loss

The Nisshin Seifun Group has recorded for the following asset impairment losses for the fiscal year ended March 31, 2012.

Location	Purpose	Type
Kumagaya City, Saitama, etc.	Assets for business operations (Food business)	Buildings and structures, Machinery, equipment and vehicles, Land, etc.
Kobe City, Hyogo, etc.	Assets for lease	Buildings and structures, Land
Sasayama City, Hyogo, etc.	Idle assets	Buildings and structures, Land

The Nisshin Seifun Group determines asset groupings based on the smallest unit producing cash flow that is largely independent from cash flows for other assets or asset groups.

The assets for business operations and for lease shown above have recoverable values that are below their book values, so the book values have been written down to recoverable values. The amounts of the write-downs (the assets for business operations ¥2,410 million, assets for lease ¥475 million) have been recorded as impairment losses under extraordinary losses. Impairment losses on assets for business operations include ¥1,293 million for buildings and structures, ¥324 million for machinery, equipment and vehicles, ¥499 million for land, and ¥292 million for other. Impairment losses on assets for lease include ¥158 million for buildings and structures and ¥316 million for land.

For the idle assets shown above, market values have declined significantly, so book values were written down to recoverable values and impairment losses of ¥204 million were recorded under extraordinary losses. Impairment losses on idle assets include ¥1 million for buildings and structures and ¥202 million for land.

Recoverable values for the asset groups shown above were measured based on either value-in-use (at a discount rate of 5%) or net selling price (values based on real estate appraisals, etc.).

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

None.

[Consolidated Statements of Comprehensive Income]

All amounts have been rounded down to the nearest million yen.

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

1. Amount for reclassification adjustment pertaining to other comprehensive income and tax effect

Valuation difference on available-for-sale securities	
Gain in the current period	¥4,640 million
Reclassification adjustment	¥(6) million
Before tax effect adjustment	¥4,634 million
Tax effect	¥(73) million
Valuation difference on available-for-sale securities	¥4,561 million
Deferred gains or losses on hedges	
Gain in the current period	¥144 million
Reclassification adjustment	¥(21) million
Before tax effect adjustment	¥122 million
Tax effect	¥(42) million
Deferred gains or losses on hedges	¥80 million
Foreign currency translation adjustment	
Loss in the current period	¥(672) million
Share of other comprehensive income of associates accounted for by the equity method	
Loss in the current period	¥(71) million
Total other comprehensive income	¥3,898 million

[Consolidated Statements of Changes in Net Assets]

All amounts have been rounded down to the nearest million yen.

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

1. Type and number of issued shares and treasury stock

(Thousands of shares)

	Number of shares at the beginning of current fiscal year	Increase in shares during the current fiscal year	Decrease in shares during the current fiscal year	Number of shares at the end of current fiscal year
Issued shares Common stock	251,535	–	–	251,535
Treasury stock Common stock	3,059	77	91	3,045

Notes:

- Portion of the increase in common stock accounted for by treasury stock:
77 thousand shares, as a result of repurchasing less-than-one unit shares
- Portion of the decrease in common stock accounted for by treasury stock:
10 thousand shares, as a result of selling less-than-one-unit shares, and
81 thousand shares, as a result of the exercise of stock options

2. Subscription rights to shares and subscription rights to shares to treasury shares

Category	Composition of subscription rights to shares	Type of shares to be issued	Number of shares to be issued				Balance at the end of current fiscal year (¥ million)
			At the beginning of current fiscal year	Increase during the current fiscal year	Decrease during the current fiscal year	At the end of current fiscal year	
Nisshin Seifun Group Inc. (parent company)	Subscription rights to shares as stock options			–			138
Total				–			138

3. Dividends

(1) Dividends paid

The following resolution was made at the Ordinary General Meeting of Shareholders held on June 25, 2010.

- Dividends on common stock:
 - i) Total dividends to be paid ¥ 2,982 million
 - ii) Dividend per share ¥12
 - iii) Record date March 31, 2010
 - iv) Effective date June 28, 2010

The following resolution was made at the meeting of the Board of Directors held on October 29, 2010.

- Dividends on common stock:
 - i) Total dividends to be paid ¥2,485 million
 - ii) Dividend per share ¥10
 - iii) Record date September 30, 2010
 - iv) Effective date December 3, 2010

(2) Dividends for which the record date came during the year ended March 31, 2011, but for which the effective date will come after said period

The following resolution was made at the Ordinary General Meeting of Shareholders to be held on June 28, 2011.

- Dividends on common stock:
 - i) Total dividends to be paid ¥2,485 million
 - ii) Source of dividends Retained earnings
 - iii) Dividend per share ¥10
 - iv) Record date March 31, 2011
 - v) Effective date June 29, 2011

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

1. Type and number of issued shares and treasury stock

(Thousands of shares)

	Number of shares at the beginning of current fiscal year	Increase in shares during the current fiscal year	Decrease in shares during the current fiscal year	Number of shares at the end of current fiscal year
Issued shares Common stock	251,535	–	–	251,535
Treasury stock Common stock	3,045	30	13	3,062

Notes:

1. Portion of the increase in common stock accounted for by treasury stock:
30 thousand shares, as a result of repurchasing less-than-one-unit shares
2. Portion of the decrease in common stock accounted for by treasury stock:
4 thousand shares, as a result of selling less-than-one-unit shares, and
9 thousand shares, as a result of exercise of stock options

2. Subscription rights to shares and subscription rights to shares to treasury shares

Category	Composition of subscription rights to shares	Type of shares to be issued	Number of shares to be issued				Balance at the end of current fiscal year (¥ million)
			At the beginning of current fiscal year	Increase during the current fiscal year	Decrease during the current fiscal year	At the end of current fiscal year	
Nisshin Seifun Group Inc. (parent company)	Subscription rights to shares as stock options			–			188
Total				–			188

3. Dividends

(1) Dividends paid

The following resolution was made at the Ordinary General Meeting of Shareholders held on June 28, 2011.

- Dividends on common stock:
 - i) Total dividends to be paid ¥2,485 million
 - ii) Dividend per share ¥10
 - iii) Record date March 31, 2011
 - iv) Effective date June 29, 2011

The following resolution was made at the meeting of the Board of Directors held on October 28, 2011.

- Dividends on common stock:
 - i) Total dividends to be paid ¥2,485 million
 - ii) Dividend per share ¥10
 - iii) Record date September 30, 2011
 - iv) Effective date December 5, 2011

(2) Dividends for which the record date came during the year ended March 31, 2012, but for which the effective date will come after said period

The following will be proposed at the Ordinary General Meeting of Shareholders to be held on June 27, 2012.

- Dividends on common stock:
 - i) Total dividends to be paid ¥2,485 million
 - ii) Source of dividends Retained earnings
 - iii) Dividend per share ¥10
 - iv) Record date March 31, 2012
 - v) Effective date June 28, 2012

[Consolidated Statements of Cash Flows]

All amounts have been rounded down to the nearest million yen.

1. The reconciliation between year-end balance of cash and cash equivalents and amounts stated in the consolidated balance sheets is as follows.

	(Millions of yen)	
	Fiscal 2011	Fiscal 2012
	(As of March 31, 2011)	(As of March 31, 2012)
Cash and deposits	57,938	59,020
Short-term investment securities	24,744	16,141
<u>Total</u>	<u>82,682</u>	<u>75,161</u>
Time deposits with maturities of more than three months	(26,799)	(26,042)
Debt securities with maturities of more than three months	(13,795)	(2,732)
<u>Cash and cash equivalents</u>	<u>42,087</u>	<u>46,387</u>

2. Breakdown of main assets and liabilities of companies that became consolidated subsidiaries as a result of the purchase of shares

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

A breakdown of the assets and liabilities of Miller Milling Company, LLC, Miller Milling Company, LP and Miller Trading Company, LLC at the time of consolidation as well as the acquisition costs of equity interests and net payments for purchase is presented as follows.

Current assets	¥4,404 million
Noncurrent assets	¥2,482 million
Goodwill	¥8,947 million
Current liabilities	¥(3,528) million
Noncurrent liabilities	¥(1,582) million
<u>Acquisition costs of new consolidated subsidiary equity interests</u>	<u>¥10,722 million</u>
Payable portion	¥(128) million
Cash and cash equivalents	¥(15) million
<u>Payment for the purchase of equity interests</u>	<u>¥(10,578) million</u>

[Segment information, etc.]

[Segment information]

1. Outline of reportable segment

The Nisshin Seifun Group's reportable segments and the other businesses are components of the Group, for which discrete financial information is available and the operating results are regularly reviewed by the company's Board of Directors to make decisions about resources to be allocated to and assess the performance of the segments.

The company, as the holding company of the Group, plans and determines group strategies for, allocates resources to and assesses the performance of each of its businesses, which are classified by type of products and services in Flour Milling, Processed Food and Others.

The Group designates the Flour Milling and Processed Food segments as its reportable segments. Major products of the reportable segments are as follows.

Flour Milling: Wheat flour, bran

Processed Food: Prepared mix, wheat flour for household-use, pasta, pasta sauce, frozen food, chilled food, cake and bread ingredients, biochemical products, life science business, healthcare foods

2. Calculation methods of net sales, profit (loss), assets and other items for each reportable segment

The accounting methods used for reportable segments are largely the same as those discussed under "Basis of Presentation of Consolidated Financial Statements." Segment income figures are the same as operating income figures. Intersegment sales and transfers are based on market prices.

3. Information about net sales, profit (loss), assets and other items for each reportable segment

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

(Millions of yen)

	Reportable segment			Others (Note 1)	Total	Adjustment (Note 2)	Carried on consolidated financial statements (Note 3)
	Flour Milling	Processed Food	Total				
Net sales

[Gains on negative goodwill by reportable segment]

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

Consolidated subsidiaries Oriental Yeast Co., Ltd (Processed Food Segment) and NBC Meshtec Inc. (Others Segment) were made into wholly owned subsidiaries and gains on negative goodwill were recorded as a result. Gains on negative goodwill related to the Processed Food Segment came to ¥175 million. Gains on negative goodwill related to the Others Segment came to ¥2,467 million.

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

None.

[Tax effect accounting]

1. The principal components of deferred tax assets and deferred tax liabilities are as follows.

(Millions of yen)

Fiscal 2012

(As of March 31, 2012)

Deferred tax assets:	
Provision for retirement benefits	5,110
Provision for bonuses	1,748
Accrued sales incentives	1,089
Investment securities, etc.	1,066
Impairment loss on noncurrent assets	1,053
Unrealized gains (losses) on noncurrent assets	1,020
Provision for repairs	527
Inventories	496
Accrued enterprise tax	432
Depreciation	318
Unrealized gains (losses) on inventories	266
Other	2,437
Gross deferred tax assets	15,569
Amount offset by deferred tax liabilities	(4,584)
Net deferred tax assets	10,985
Valuation allowance	(2,455)
Deferred tax assets, net	8,529
Deferred tax liabilities:	
Valuation difference on available-for-sale securities	(12,629)
Reserve for advanced depreciation of noncurrent assets	(2,336)
Securities returned from employee retirement benefits trust	(1,118)
Other	(317)
Gross deferred tax liabilities	(16,402)
Amount offset by deferred tax assets	4,584
Deferred tax liabilities, net	(11,818)

2. The reconciliation between the statutory effective tax rate and the actual effective tax rate after the application of tax effect accounting is as follows.

The reconciliation between the statutory effective tax rate and the actual effective tax rate after the application of tax effect accounting is not shown, because the difference between the statutory and actual effective tax rates was less than five hundredths of the statutory rate.

3. Revisions to the amounts of deferred tax assets and deferred tax liabilities resulting from a change in income taxes

Following the promulgation of the Act for Partial Revision of the Income Tax Act, etc. for the Purpose of Creating a Taxation System Responding to Changes in Economic and Social Conditions (Act No. 114 of 2011) and the Act on Special Measures for Securing the Financial Resources Necessary to Implement Measures for Reconstruction following the Great East Japan Earthquake (Act No. 117 of 2011), the corporate tax rate will be reduced while a special corporate tax for reconstruction will be imposed. As a result, the effective tax rates used for the calculation of deferred tax assets and deferred tax liabilities will be 37.9% for temporary differences as of the end of the fiscal year under review expected to be used up to the fiscal year ending March 31, 2015, and 35.5% for fiscal years beginning on or after April 1, 2015. Due to these changes in tax rates, the amount of

deferred tax liabilities (the amount after deducting the amount of deferred tax assets) as of the end of the fiscal year under review decreased ¥991 million. Income taxes – deferred charged as an expense for the fiscal year under review increased ¥822 million.

[Financial instruments]

1. Status of Financial Instruments

(1) Policies on financial instruments

The Group observes a fund management policy that standby funds for future strategic investments and temporary surplus funds shall be managed in the form of time deposits with a fixed yield of interest and securities, and it shall not manage these funds to gain marginal gains in trades or for speculative purposes. As for fund procurement, the Group complies with the policy of financing with the most appropriate means, such as bank borrowings for short-term financial requirements, and bank borrowings, the issuance of corporate bonds and an increase in capital for long-term financial requirements, while taking into account market conditions and other factors.

The Group acquires and holds, in principle, investment securities for shares of the counterparties with which the Group has business or capital alliance relationships.

The Group utilizes derivative financial instruments to hedge its exposure to various risks described below and abides by a policy of not using them separately to gain marginal gains in trades or for speculative purposes.

(2) Description of financial instruments, related risks and risk management system

Cash is mainly managed as term deposits, and securities are mainly operated in the form of bonds. Both cash and securities are exposed to the credit risk of the relevant depository or issuer and the fluctuation risk of market prices. These risks are intended to be minimized and diversified using internal regulations at the respective Group companies by limiting such items as the target assets of fund management, the depository or the issuer, the period for management and the upper limit for management at each depository or issuer.

Notes and accounts receivable – trade as operating receivables are exposed to the credit risk of the respective customers. To cope with this risk, the Group conducts maturity management and balance management by counterparty in accordance with the internal regulations at the respective Group companies and has established a system for periodically measuring the creditworthiness of major counterparties to quickly determine and mitigate any concerns on the collection of claims that might be caused by deteriorated financial conditions at a counterparty.

Investment securities, which primarily consist of the shares relating to business or capital alliance relationships with the counterparties, are exposed to the risk of market price fluctuations. The Group has established a system of periodically measuring their market value.

Although notes and accounts payable – trade as operating payables are exposed to liquidity risk, most of them have a maturity for payment within one year. The Group therefore manages them by making each Group company prepare a cash-flow projection.

As for derivative transactions, the Group uses forward foreign exchange contracts, currency options and the like to hedge against the adverse impact of future fluctuations in foreign currency exchange rates on specific foreign currency denominated assets and liabilities including notes and accounts receivable – trade and notes and accounts payable – trade. Meanwhile, some foreign consolidated subsidiaries use commodity futures and other financial instruments targeting wheat to hedge against the risk of future fluctuations in the market for wheat and other risks. These derivative transactions often entail a general market risk due to the fluctuation of rates.

To reduce the exposure to market risk, derivative transactions beyond the targeted, real demand are forbidden by the internal regulations of each Group company, and the regulations set forth a certain percentage of allowable derivative transactions against the total relevant underlying trading amounts. Currency options are limited only to buying call options (long position) in accordance with the respective internal regulations. These transactions are traded by the Finance and Accounting Division mainly based on the instructions given by the governing department of the operating company that might suffer from the exchange-rate fluctuation risk. At several consolidated subsidiaries, they are traded by the department in charge of financial affairs at the company mainly based on the instructions given by the governing department. In managing the derivative transactions, the aforementioned Finance and Accounting Division of the company or the department in charge of financial affairs at each company receives a notice of position balances on derivative transactions every month from the correspondent bank, checks how these balances agree with performance figures and reports the monitored results to the Division Executive of the Finance and Accounting Division of the company or the director of the department in charge of financial affairs and the responsible director of the governing department. The Group believes that the risk that counterparty to its derivative transactions could default is almost insignificant as the Group enters into derivative transactions only with financial institutions of high caliber.

(3) Supplemental explanation on the market value of financial instruments, etc.

The market value of financial instruments includes the value reasonably calculated for those without market value, in addition to the value based on the market price. As several variable factors are incorporated in calculating the market value, the resulting amount may vary depending on the different preconditions employed. The contract amounts, etc., regarding derivative transactions in “2. Market Value of Financial Instruments, etc.,” are not necessarily indicative of the market risk with regard to derivative transactions.

2. Market Value of Financial Instruments, etc.

Carrying values in the consolidated balance sheets, market values and the unrealized gains (losses) are presented as follows. Assets and liabilities, for which it is deemed difficult to measure the market value, are not included in the following table. (Refer to Note 2.)

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

	(Millions of yen)		
	Carrying value	Market value	Unrealized gains (losses)
(1) Cash and deposits	57,938	57,938	–
(2) Notes and accounts receivable – trade	57,919	57,919	–
(3) Short-term investment securities and investment securities			
1) Held-to-maturity debt securities	2,000	2,000	–
2) Other securities	71,026	71,026	–
Total assets	188,884	188,884	–
(1) Notes and accounts payable – trade	36,634	36,634	–
Total liabilities	36,634	36,634	–
Derivative transactions*			
1) Transactions for which hedge accounting has not been adopted	7	7	–
2) Transactions for which hedge accounting has been adopted	114	114	–
Total derivative transactions	121	121	–

* Net receivables and payables, which were derived from derivative transactions, are presented in net amounts, and any item for which the total becomes a net liability is indicated in parentheses.

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

	(Millions of yen)		
	Carrying value	Market value	Unrealized gains (losses)
(1) Cash and deposits	59,020	59,020	–
(2) Notes and accounts receivable – trade	65,015	65,015	–
(3) Short-term investment securities and investment securities			
1) Held-to-maturity debt securities	1,000	1,000	–
2) Other securities	74,710	74,710	–
Total assets	199,747	199,747	–

Total liabilities	50,003	50,003	–
Derivative transactions*			
1) Transactions for which hedge accounting has not been adopted	10	10	–
2) Transactions for which hedge accounting has been adopted	227	227	–
Total derivative transactions	237	237	–

* Net receivables and payables, which were derived from derivative transactions, are presented in net amounts, and any item for which the total becomes a net liability is indicated in parentheses.

(Note 1) Calculation method of the market value of financial instruments and matters relating to securities and derivative transactions

Assets

(1) Cash and deposits and (2) Notes and accounts receivable – trade

As these assets are settled within a short time, the market value thereof is almost equal to the carrying value. Accordingly, the calculation of the market value of these assets is based on the carrying value concerned.

(3) Short-term investment securities and investment securities

The calculation of the market value of stocks is based on the prices traded at the stock exchange. The calculation of the market value of bonds is based on the prices traded at the stock exchange or the prices presented by the correspondent financial institution. Refer to the Notes to [Securities] with regard to the noteworthy matters regarding securities held by holding purpose.

Liabilities

(1) Notes and accounts payable – trade

As these liabilities are settled within a short time, the market value is almost equal to the carrying value. Accordingly, the calculation of the market value of these liabilities is based on the carrying value concerned.

Derivative transactions

Refer to the Notes to [Derivative transactions].

(Note 2) Carrying value of financial instruments for which it is deemed difficult to measure the market value

(Millions of yen)

Classification	Fiscal 2011 (As of March 31, 2011)	Fiscal 2012 (As of March 31, 2012)
Unlisted stocks	18,773	18,332

The above unlisted stocks have no market prices and relevant future cash flows cannot be easily estimated due to the anticipated huge estimation cost, and it is therefore deemed difficult to measure their market value. Accordingly, they are not included in (3) Short-term investment securities and investment securities.

(Note 3) Redemption schedule for monetary receivables and securities with maturity dates after the consolidated closing date (March 31)

Fiscal Year Ended March 31, 2011 (As of March 31, 2011)

(Millions of yen)

	Due within one year	Due after one year but within five years
Cash and deposits	57,938	–
Notes and accounts receivable – trade	57,919	–
Short-term investment securities and investment securities		
Held-to-maturity debt securities	2,000	–
Other securities with maturity dates	22,749	–
Total	140,607	–

Fiscal Year Ended March 31, 2012 (As of March 31, 2012)

(Millions of yen)

	Due within one year	Due after one year but within five years
Cash and deposits	59,020	–
Notes and accounts receivable – trade	65,015	–
Short-term investment securities and investment securities		
Held-to-maturity debt securities	1,000	–
Other securities with maturity dates	15,148	–
Total	140,185	–

[Securities]

1. Debt securities classified as held-to-maturity securities

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

(Millions of yen)

	Item	Carrying value	Market value	Unrealized gains (losses)
Securities whose market value exceeds their carrying value	(1) Government and municipal bonds	—	—	—
	(2) Corporate bonds	—	—	—
	(3) Other	—	—	—
	Subtotal	—	—	—
Securities whose market value does not exceed their carrying value	(1) Government and municipal bonds	—	—	—
	(2) Corporate bonds	—	—	—
	(3) Other	2,000	2,000	—
	Subtotal	2,000	2,000	—
Total		2,000	2,000	—

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

(Millions of yen)

	Item	Carrying value	Market value	Unrealized gains (losses)
Securities whose market value exceeds their carrying value	(1) Government and municipal bonds	—	—	—
	(2) Corporate bonds	—	—	—
	(3) Other	—	—	—
	Subtotal	—	—	—
Securities whose market value does not exceed their carrying value	(1) Government and municipal bonds	—	—	—
	(2) Corporate bonds	—	—	—
	(3) Other	1,000	1,000	—
	Subtotal	1,000	1,000	—
Total		1,000	1,000	—

2. Short-term investment securities classified as other securities
 Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

(Millions of yen)

	Item	Carrying value	Market value	Unrealized gains (losses)
Securities whose market value exceeds their carrying value	(1) Equity securities	42,187	10,537	31,649
	(2) Bonds			
	1) Government and municipal bonds	—	—	—
	2) Corporate bonds	—	—	—
	3) Other	—	—	—
	(3) Other	—	—	—
	Subtotal	42,187	10,537	31,649
Securities whose market value does not exceed their carrying value	(1) Equity securities	6,094	6,811	(716)
	(2) Bonds			
	1) Government and municipal bonds	22,744	22,746	(1)
	2) Corporate bonds	—	—	—

Total		74,710	39,144	35,566

Note: The above “other securities” do not include unlisted stocks with a carrying value of ¥4,813 million because they have no market value and may require excessive cost to estimate their future cash flows, and it is therefore regarded as extremely difficult to identify their current market value.

3. Sale of short-term investment securities classified as other securities

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

(Millions of yen)

Type	Proceeds from sales	Total gain on sales	Total loss on sales
Equity securities	74	24	–

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

(Millions of yen)

Type	Proceeds from sales	Total gain on sales	Total loss on sales
Equity securities	32	13	(0)

4. Securities for which write downs were recorded

For the fiscal year under review, other securities were written down ¥91 million.

[Derivative transactions]

1. Derivative transactions for which hedge accounting is not adopted

(1) Currency-related

Fiscal Year Ended March 31, 2011 (As of March 31, 2011)

(Millions of yen)

Classification	Type of transactions	Contract amounts	Portion due after	Market value	Unrealized gains (losses)
			one year		
Market transactions	Currency futures: Buy: Canadian dollar	467	–	7	7
Non-market transactions	Forward foreign exchange contracts: Sell: U.S. dollar	148	–	(1)	(1)
	Buy: U.S. dollar	439	–	(1)	(1)
	Euro	23	–	0	0
	Yen	1	–	0	0
Total		1,080	–	5	5

Note: Calculation of market value is based on the closing prices of the relevant futures markets and the prices and other information presented by associated financial institutions and others.

Fiscal Year Ended March 31, 2012 (As of March 31, 2012)

(Millions of yen)

Classification	Type of transactions	Contract amounts	Portion due after	Market value	Unrealized gains (losses)
			one year		
Market transactions	Currency futures: Buy: Canadian dollar	283	–	5	5
Non-market transactions	Forward foreign exchange contracts: Sell: U.S. dollar	178	–	(8)	(8)
	Buy: U.S. dollar	178	–	4	4
	Euro	6	–	(0)	(0)
	Yen	0	–	0	0
Total		646	–	1	1

Note: Calculation of market value is based on the closing prices of the relevant futures markets and the prices and other information presented by associated financial institutions and others.

(2) Commodity-related

Fiscal Year Ended March 31, 2011 (As of March 31, 2011)

(Millions of yen)

Classification	Type of transactions	Contract amounts	Portion due after	Market value	Unrealized gains (losses)
			one year		
Market transactions	Commodity futures:				
	Sell: wheat	7	–	(0)	(0)
	Buy: wheat	188	–	2	2
Total		195	–	1	1

Note: Calculation of market value is based on the closing prices of the relevant futures markets.

Fiscal Year Ended March 31, 2012 (As of March 31, 2012)

(Millions of yen)

Classification	Type of transactions	Contract amounts	Portion due after	Market value	Unrealized gains (losses)
			one year		
Market transactions	Commodity futures:				
	Sell: wheat	1,170	–	72	72
	Buy: wheat	1,418	–	(31)	(31)
	Options:				
	Sell put:				
	Wheat	19	–	14	5
Total		2,608	–	55	46

Note: Calculation of market value is based on the closing prices of the relevant futures markets.

(3) Interest rate-related

Fiscal Year Ended March 31, 2012 (As of March 31, 2012)

(Millions of yen)

Classification	Type of transactions	Contract amounts	Portion due after	Market value	Unrealized gains (losses)
			one year		
Non-market transaction	Interest rate swap transaction				
	Pay fixed / receive floating	3,104	–	(46)	(46)
Total		3,104	–	(46)	(46)

Note: Calculation of market value is based on the prices and other information presented by associated financial institutions and others.

2. Derivative transactions for which hedge accounting is adopted

(1) Currency-related

Fiscal Year Ended March 31, 2011 (As of March 31, 2011)

(Millions of yen)

Method of hedge accounting	Type of transactions	Major hedged items	Contract amounts	Portion due	Market value
				after one year	
Deferral hedge accounting	Forward foreign exchange contracts:	Accounts payable			
	Buy: U.S. dollar		2,965	–	46
	Thai baht		1,340	–	25
	Euro		338	–	18
	Canadian dollar		70	–	2
Options:					
Purchase call:					
U.S. dollar		11	–	20	
Appropriation treatment	Forward foreign exchange contracts:	Accounts payable			
	Buy: U.S. dollar		78	–	–
	Euro		227	–	–
Total			5,031	–	114

Notes: 1. Calculation of market value is based on the prices and other information presented by associated financial institutions and others.

2. Because forward foreign exchange contracts subject to appropriation are handled as a unit with accounts payable to be hedged, the market value of those is included in the market value of the relevant accounts payable.

Fiscal Year Ended March 31, 2012 (As of March 31, 2012)

(Millions of yen)

Method of hedge accounting	Type of transactions	Major hedged items	Contract amounts	Portion due	Market value	
				after one year		
Deferral hedge accounting	Forward foreign exchange contracts:	Anticipated foreign currency transactions

	Buy: U.S. dollar		54	–	–	
Total			3,839	–	227	

Notes: 1. Calculation of market value is based on the prices and other information presented by associated financial institutions and others.

2. Because forward foreign exchange contracts subject to appropriation are handled as a unit with accounts payable to be hedged, the market value of those is included in the market value of the relevant accounts payable.

[Retirement benefits]

Fiscal Year Ended March 31, 2011 (April 1, 2010 to March 31, 2011)

1. Outline of retirement benefit plans

The company and domestic consolidated subsidiaries primarily provide a tax-qualified pension plan together with a lump-sum retirement benefit plan. The company and some domestic consolidated subsidiaries have also established a retirement benefit trust. In some cases, employees leaving the company may receive an additional severance payment beyond that computed on the basis of the actuarial retirement benefit calculated using the relevant accounting standard.

2. Retirement benefit obligation

	As of March 31, 2011 (Millions of yen)
(A) Project benefit obligation	(45,290)
(B) Market value of plan assets	36,718
(C) Unfunded retirement benefit obligation [(A) + (B)]	(8,571)
(D) Unrecognized actuarial loss	5,768
(E) Unrecognized prior service cost	(1,734)
(F) Net amount recorded on the consolidated balance sheets [(C) + (D) + (E)]	(4,537)
(G) Prepaid pension cost	4,823
(H) Provision for retirement benefits [(F) – (G)]	(9,360)

Note: Certain subsidiaries adopt a simplified method for calculating the retirement benefit obligation.

3. Retirement benefit expenses

	Fiscal 2011 (Millions of yen)
(A) Service cost	1,756
(B) Interest cost	1,031
(C) Expected return on plan assets	(868)
(D) Amortization of actuarial loss	621
(E) Amortization of prior service cost	(198)
(F) Net retirement benefit expenses [(A) + (B) + (C) + (D) + (E)]	2,344

Note: The retirement benefit expenses incurred by the consolidated subsidiaries that adopt simplified method are recorded under “(A) Service cost.”

4. Assumptions used in retirement benefit obligation calculations

(A) Method adopted for periodic distribution of projected retirement benefits	Equal amounts per period
(B) Discount rate	Principally 2.5%
(C) Expected rate of return on plan assets	Principally 2.5%
(D) Amortization period of actuarial differences* ¹	Principally 15 years
(E) Amortization period for prior service cost* ²	Principally 15 years

Notes:1. Actuarial differences are amortized on a straight-line basis from the following fiscal year based on the average remaining service period of employees expected to receive pension benefits as of the consolidated fiscal year-end.

2. Prior service cost is amortized on a straight-line basis over a period equaling the average remaining service period of employees expected to receive pension benefits as of the consolidated fiscal year-end.

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

1. Outline of retirement benefit plans

The company and its consolidated subsidiaries provide for a lump-sum retirement benefit plan and a defined-contribution pension plan. In addition, the company and some of its consolidated subsidiaries provide for a defined-benefit corporate pension plan limited to already retired pension recipients. Moreover, employees leaving the company may in some cases receive an additional severance payment beyond that computed on the basis of the actuarial retirement benefit calculated using the relevant accounting standard.

The company and certain of its consolidated subsidiaries transferred to a lump-sum retirement benefit plan, a defined-contribution pension plan and a defined-benefit corporate pension plan limited to already retired pension recipients from a tax-qualified pension plan and a lump-sum retirement benefit plan in October 2011.

Regarding the accounting treatment of these transfers as well as other consolidated subsidiary retirement benefit plan transfers, the Guidance on Accounting for Transfers between Retirement Benefit Plans (ASBJ Guidance No. 1, released on January 31, 2002) has been applied and a loss on revisions to retirement benefit plans of ¥1,290 million recorded for the fiscal year under review.

2. Retirement benefit obligation

	As of March 31, 2012 (Millions of yen)
(A) Project benefit obligation	(31,936)
(B) Market value of plan assets	13,711
<hr/>	
(C) Unfunded retirement benefit obligation [(A) + (B)]	(18,224)
(D) Unrecognized actuarial loss	6,360
(E) Unrecognized prior service cost	(2,552)
<hr/>	
(F) Net amount recorded on the consolidated balance sheets [(C) + (D) + (E)]	(14,417)
(G) Prepaid pension cost	4,002
<hr/>	
(H) Provision for retirement benefits [(F) – (G)]	(18,420)

Note: 1. Certain subsidiaries adopt a simplified method for calculating the retirement benefit obligation.

2. Plan assets pertain to a defined-benefit corporate pension plan limited to already retired pension recipients.

3. The effect of the company and its consolidated subsidiaries shifting to a lump-sum retirement benefit plan, a defined-contribution pension plan and a defined-benefit corporate pension plan limited to already retired pension recipients from a tax-qualified pension plan and a lump-sum retirement benefit plan is presented as follows.

	(Millions of yen)
Decrease of project benefit obligation	14,105
Unrecognized actuarial loss	(4,500)
Unrecognized prior service cost	460
Decrease of market value of plan assets	(20,546)
Decrease of prepaid pension cost	1,778
<hr/>	
Increase of provision for retirement benefits	(8,702)

3. Retirement benefit expenses

	Fiscal 2012 (Millions of yen)
(A) Service cost	1,471
(B) Interest cost	768
(C) Expected return on plan assets	(340)
(D) Amortization of actuarial loss	660
(E) Amortization of prior service cost	(221)
<u>(F) Net retirement benefit expenses [(A) + (B) + (C) + (D) + (E)]</u>	<u>2,337</u>
<u>(G) Loss on the transfer to a defined-contribution pension plan</u>	<u>1,290</u>
<u>(H) Other</u>	<u>375</u>
<u>Total</u>	<u>4,003</u>

Note: 1. The retirement benefit expenses incurred by the consolidated subsidiaries that adopt simplified method are recorded under “(A) Service cost.”

2. (H) Other is the amount of contribution payment to a defined contribution pension.

4. Assumptions used in retirement benefit obligation calculations

(A) Method adopted for periodic distribution of projected retirement benefits	Equal amounts per period
(B) Discount rate	Principally 1.7%
(C) Expected rate of return on plan assets	Principally 1.2%
(D) Amortization period of actuarial differences ^{*1}	Principally 15 years
(E) Amortization period for prior service cost ^{*2}	Principally 15 years

Notes: 1. Actuarial differences are amortized on a straight-line basis from the following fiscal year based on the average remaining service period of employees expected to receive pension benefits as of the consolidated fiscal year-end.

2. Prior service cost is amortized on a straight-line basis over a period equaling the average remaining service period of employees expected to receive pension benefits as of the consolidated fiscal year-end.

[M&A Activity]

Fiscal Year Ended March 31, 2012 (April 1, 2011 to March 31, 2012)

(Business acquisition)

1. Names and business activities of the companies acquired, rationale for acquisition, date of acquisition, legal form of acquired business, names of the companies after acquisition, percentage of voting rights acquired and rationale behind determining the companies to be acquired

(1) Names and business activities of the companies to be acquired

- 1) Miller Milling Company, LLC Manufacture and sale of wheat flour and semolina
- 2) Miller Milling Company, LP Management of the assets of Miller Milling Company, LLC
- 3) Miller Trading Company, LLC Trading of the raw grain of Miller Milling Company, LLC

(2) Rationale for business combination

The company has long had the expansion of its overseas business as a top priority in order to sustain the continued growth of the Group. Through the acquisition, the company decided to launch the Group into the U. S. flour milling market, the largest flour milling market in the developed world.

Miller Milling Company, which is the 9th largest miller in the U.S., * owns two durum/hard wheat milling facilities strategically located in areas close to large flour/semolina consumption regions in the Eastern and Western United States. The acquisition of Miller Milling Company will enable the company to take advantage of the highly experienced and technical capabilities of Miller Milling that operates its core business centered on durum semolina, bakery flour and tortilla flour products. The company plans to further expand its presence in the U.S. by expanding Miller Milling Company's existing operations as a part of the Group organization into new markets. Toward that goal, the company will utilize the Group's outstanding product development, techniques and capabilities to supply wheat flour that is consistent in quality.

The acquisition of Miller Milling is not the Group's first foray into the North American market; the Group had already entered the North American market in the form of its subsidiary, Rogers Foods Ltd., a wheat-flour and prepared mix manufacturer in British Columbia, Canada. The company is confident that its acquisition of Miller Milling Company will realize synergies both with Rogers Foods and other Group companies that will serve to greatly accelerate the expansion of its presence in the U.S. market.

In addition to the expansion of its business presence in North America, the company is excited about the opportunity for the Group to gain valuable wheat-related know-how from its new operations in the U.S. market, which is the largest supplier of wheat to Japan, and substantial experience in the U.S. wheat and wheat-flour business under free trade. Through this experience, the Group will obtain significant benefits and capabilities for further expanding its flour milling operations in the global market.

*Source: Grain & Milling Annual 2011 published by Sosland Publishing Co.

(3) Date of acquisition

March 20, 2012

(4) Legal form of acquisition

Equity interests acquired through the payment of cash

(5) Names of the companies after acquisition

- 1) Miller Milling Company, LLC
- 2) Miller Milling Company, LP
- 3) Miller Trading Company, LLC

(6) Percentage of voting rights acquired

100%

(7) Rationale behind determining the companies to be acquired

The Nisshin Seifun Group acquired a 100% equity interest in each company through the payment of cash.

2. The period for which acquired company results are included in consolidated financial statements
The balance sheets as of December 31, 2011 have been consolidated after undertaking adjustments for material transactions that occurred up to the share acquisition date in March 2012.

3. Acquisition costs and their details of the companies to be acquired

Compensation for the acquisition	¥10,164 million
Direct costs for acquisition	¥558 million
Acquisition costs	¥10,722 million

4. Amount of goodwill that arose, reasons for incidence and amortization method and period

(1) Amount of goodwill that arose

¥8,947 million

(2) Reasons for incidence

The incidence of goodwill is attributable to the rational estimation of excess earnings power anticipated by future business development.

(3) Amortization method and period

Amortized using the straight-line method over a period of 10 years

5. Amounts of assets received and liabilities undertaken on the date of business combination and their breakdown

Current assets	¥4,404 million
Noncurrent assets	¥2,482 million
Total assets	¥6,886 million
Current liabilities	¥3,528 million
Noncurrent liabilities	¥1,582 million
Total liabilities	¥5,111 million

Note: The amount of goodwill identified in 4. (1) above is not included in asset and liability amounts.

6. Allocation of acquisition costs

The allocation of acquisition costs had not been completed as of the end of the fiscal year under review. As a result, accounting treatment has been undertaken on a provisional basis in accordance with readily available information at that time.

7. The impact of estimated amounts on the consolidated statements of income for the fiscal year under review on the assumption that the business combination was completed on the commencement date of the consolidated fiscal year, and calculation methods

Net sales	¥17,789 million
Net income	¥148 million

(Calculation methods for estimated amounts)

The impact of estimated amounts is the difference between net sales and net income calculated on the assumption that the business combination was completed on the commencement date of the consolidated fiscal year and net sales and net income recorded on the company's consolidated statements of income. This note has not been certified by way of audit.

(Changes in accounting policy)

Effective from April 1, 2011, the company applied the Accounting Standard for Earnings per Share (ASBJ Statement No. 2, released on June 30, 2010) and the Guidance on Accounting Standard for Earnings per Share (ASBJ Guidance No. 4, released on June 30, 2010).

We have changed the method of calculating diluted earnings per share. By the new method, the stock options—for which the vesting date comes after a certain period of service—are evaluated by including a portion of the estimated market value of the stock options that is relative to the future services given to the company in the amount of money to be paid in if the stock options are exercised.

There was no effect of this application during the period under review.

[Notable subsequent events]

None.
