Isetan Mitsukoshi Holdings Ltd. Receives the Highest Rating in the "CDP Climate Change" for 2025

Isetan Mitsukoshi Holdings Ltd. (Shinjuku-ku, Tokyo; Toshiyuki Hosoya, Director, President and CEO, hereinafter "Isetan Mitsukoshi HDS") has been recognized by CDP, the global environmental non-profit, for its leadership in corporate transparency and performance on climate change, securing a place on CDP's respected annual 'A' List.

1.About CDP

CDP, founded in 2000, is an international non-profit organization that operates a global information disclosure system enabling companies, financial institutions and municipalities to manage their environmental impacts. CDP surveys and analyzes how organizations address environmental issues such as climate change, forests and water, and publishes the resulting scores. In 2025,more than 22,100 companies disclosed through CDP's platform. CDP's environmental disclosure and its assessment process are widely recognized as the global standard for corporate environmental disclosure.

Each year, CDP evaluates companies using a detailed and independent methodology that comprehensively considers the inclusiveness of disclosure, understanding and management of environmental risks, and the setting of ambitious and meaningful targets, and assigns scores on an eight-point scale from A to D-.

Achieving an 'A' places Isetan Mitsukoshi HDS among the global leaders demonstrating comprehensive disclosure, mature environmental governance, and meaningful progress towards environmental resilience.

2.Isetan Mitsukoshi Group's initiatives to address climate

The Isetan Mitsukoshi Group aims to put sustainability management into practice by addressing various social issues through its business activities and reinvesting the profits generated as management capital to help solve the next set of social issues. Climate change is one of the Group's key issues, and we are advancing efforts toward realizing a decarbonized society. In August 2025,our greenhouse gas reduction targets through 2030 have been validated by the Science Based Targets initiative (SBTi).※

<2030 Greenhouse gas emissions Reduction >

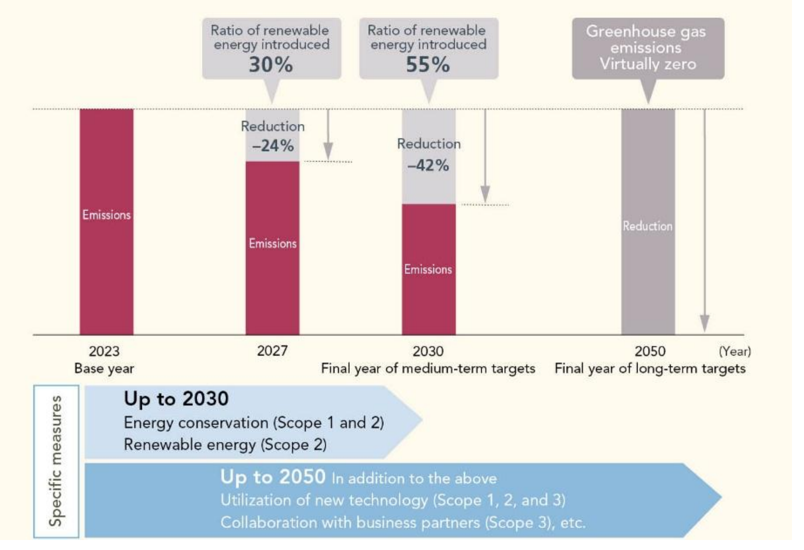
Scope	Reduction Targets
Scope1＋2	Reduce by 42% compared to fiscal 2023
Scope3 Part of category1	Reduce by 25% compared to fiscal 2023

※See also our press release dated September 25,2025:
https://pdf.irpocket.com/C3099/K2Hn/s5ZQ/LQxO.pdf

We are also focusing on concrete measures to reduce greenhouse gas emissions.
As part of our Scope 1 + 2 reduction measures, since fiscal 2024 we have been progressively expanding the number of stores introducing renewable energy. During fiscal 2024, the main building and new building of the Iwataya Main Store, and from April 2025 the main building of the Mitsukoshi Nihombashi Main Store, have been operated on electricity that is effectively 100% renewable. In procuring renewable energy, we also place importance on the additionality of power sources; at the main building of the Mitsukoshi Nihombashi Main Store, we combine electricity derived from solar generation under an off-site corporate PPA (Power Purchase Agreement) model with electricity that is effectively derived from renewable energy.

Efforts to reduce Scope 3 emissions are also important. In procurement activities, we advance supply chain management based on Isetan Mitsukoshi Group Procurement Policy and Isetan Mitsukoshi Group Code of Conduct for Suppliers to consider environmental and other social issues. Going forward, we will continue to work with our suppliers to reduce emissions across the entire supply chain.

Toward our long-term environmental goals for 2050



Disclosure on our response to climate change is also disclosed in our Annual Securities Report and Integrated Report in line with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

Throughout its 350-year history, the Isetan Mitsukoshi Group has responded to the changing times and offered proposals that anticipate customer needs. The Company will continue to carry forward this legacy while fulfilling its social responsibilities through initiatives to mitigate climate change, working together with its stakeholders toward a sustainable future.
