# Earnings Presentation

## (Overview)

**KURARAY CO., LTD.**

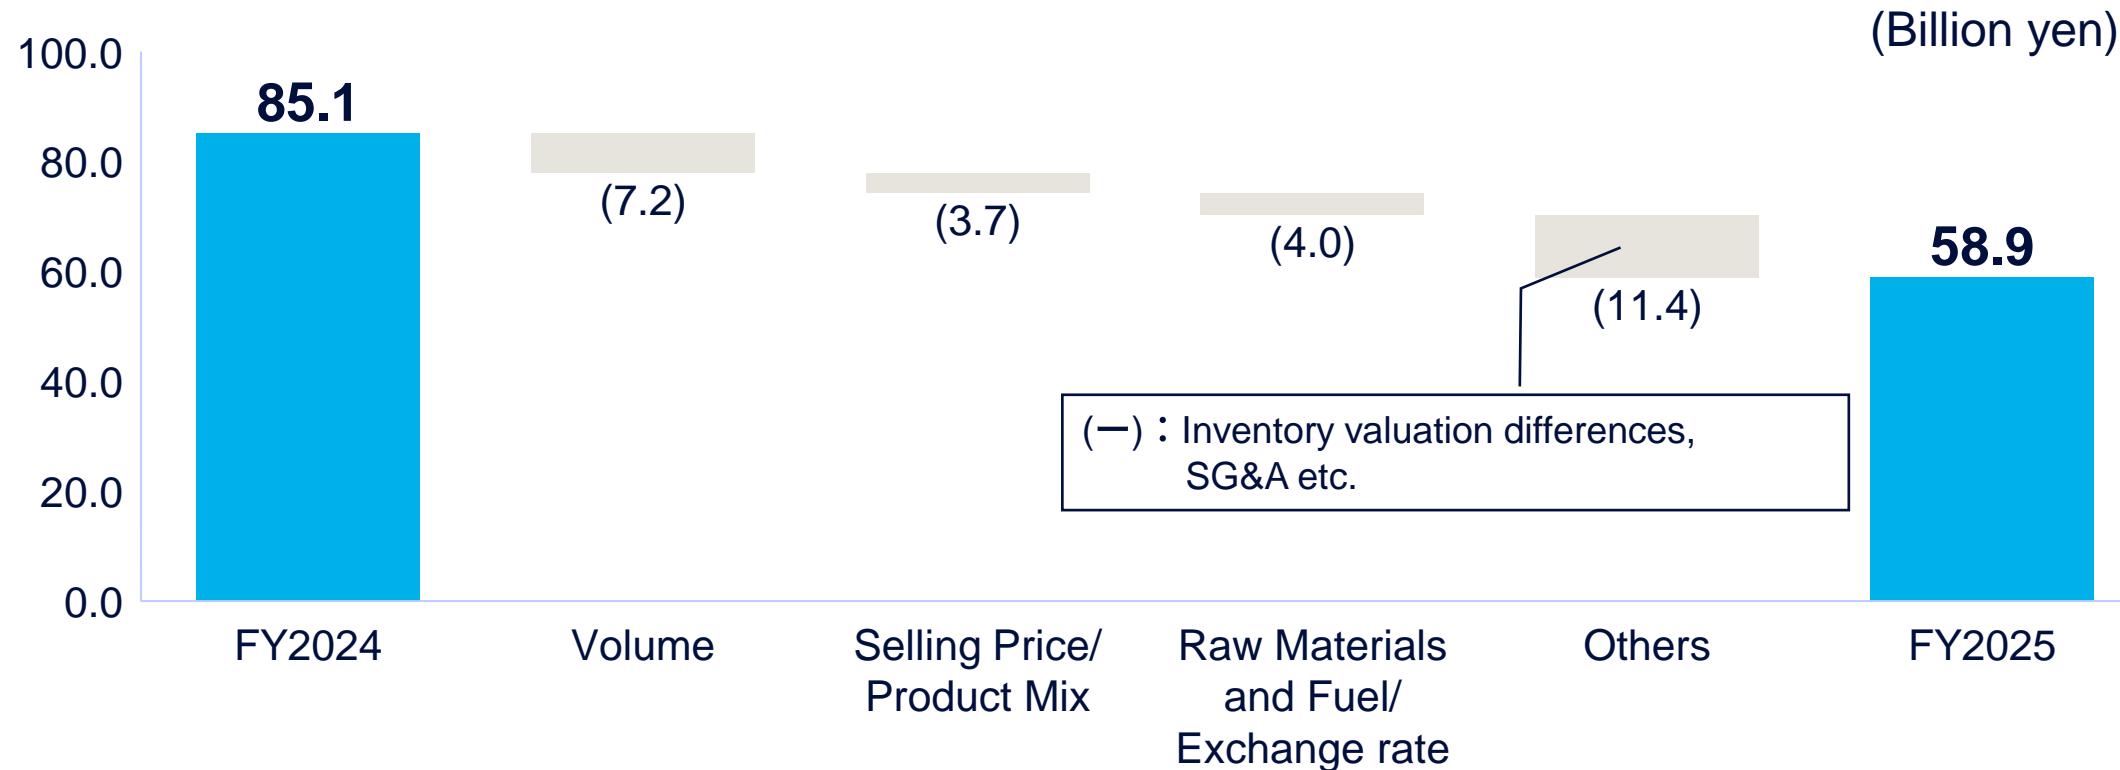

**February 10, 2026**

\*CAPEX(acceptance basis) on pages 6 and 17 have been revised. Revisions are underlined.

■ Operating income declined due to negative impacts from inventory valuation differences and a decrease in sales volume. Net income decreased, primarily reflecting the recognition of impairment losses in the Isoprene segment.

(Billion yen)

	FY2025	FY2024	Difference	FY2025 Previous Forecast (Nov. 12, 2025)	Difference
<b>Net Sales</b>	808.4	826.9	(18.4)	810.0	(1.6)

## FY2025 【Completed】

- Optimization of production capacity in methacrylate business
- Transfer of noncore businesses (Okayama Rinkoh Co., Ltd., Takarazuka Nakayamadai Newtown)

## 【Decided】

- Expansion of optical-use poval film production line
- Restructuring of polyester business
- End of production of KURARITY™ and VECSTAR™ FCCL
- Transfer of a methacrylic resin sheet manufacturing subsidiary in China and stamper business

---

## FY2026

- Execution of construction work for new EVAL™ plant in Singapore
- Further growth of genestar business and dental material business
- Decision to increase reactivated carbon production capacity in Europe and the U.S.
- Focused allocation of resources to core businesses, and downsize or withdraw from noncore businesses

## - Three Challenges -

- Setting new targets for reducing GHG emissions by 2035
- Virtual PPA\*1 signed in the U.S.
- Acquisition of SBT certification. Initiatives for post-PASSION 2026

(Establishment of technology development issues that contribute to GHG emission reductions, and creation of new value indicators combining the Kuraray PSA \*3 system and ICP \*4 )

- Acquisition of Nelumbo Inc.
- Co-creation with partner companies for industrialization and social implementation of regenerative medicine
- Drive global organizational structure and business process transformation
- Build a global HR function that contributes to business growth
- Challenge for new business models through the use of digital technology and collaboration with other companies

\*1 Virtual PPA(Power Purchase Agreement): A contract in which environmental value, in the form of renewable energy certificates, is purchased without directly receiving electricity from a renewable energy company.

\*2 SBT (Science Based Targets): Voluntary targets set by business corporations with regards to GHG emission reductions in a manner consistent with the levels required by the Paris Agreement.

\*3 PSA(Portfolio Sustainability Assessment): Product-portfolio metrics established by WBCSD (World Business Council for Sustainable Development)

\*4 ICP(Internal Carbon Pricing): A mechanism for creating economic incentives to reduce CO2 emissions and save energy, promoting low-carbon investment and encouraging climate change response by setting an internal carbon price and using it to calculate the monetary cost of emissions.

	FY2024	FY2025	Difference
Net Sales	414.9	404.5	(10.4)
Operating Income	87.6	62.5	(25.1)

## 【Factors Affecting the Change in Operating Income】

<b>PVOH resin</b>	Sales volume decreased due to weakened demand, especially in Europe and the United States, and due to the dissipation of the special demand that arose in the previous year to work around logistics disruptions to Europe. Profit was impacted by the rising raw material and fuel prices.
<b>Optical-use poval film</b>	Sales volume increased on the back of Chinese government measures to support home appliance replacement and demand for TV replacement ahead of international sports events. Inventory valuation differences had a negative impact on profit.
<b>Advanced Interlayer Solutions</b>	Although sales of SentryGlas™ remained favorable, especially in the Americas, the competitive environment for PVB film has intensified, particularly in Europe and Asia. As a result, sales volume has decreased for both construction and automotive applications.
<b>Water-soluble PVOH film MonoSol</b>	Sales volume increased due to higher demand for soluble-unit-dose detergent.
<b>EVAL™</b>	Although sales volume for food packaging applications did not increase as much as assumed in Europe and Asia, automotive applications held steady, resulting in an increase in the overall sales volume. Profit, however, was negatively affected by inventory valuation differences and rising raw material and fuel prices.
<b>Main reason of increase/ decrease</b>	Sales volume did not increase due to the European economic stagnation and other factors, and overall segment income decreased due to the negative impact of inventory valuation differences and higher raw material and fuel prices.

	FY2024	FY2025	Difference
Net Sales	76.4	<b>80.4</b>	4.0
Operating Income	(9.5)	<b>(4.9)</b>	4.6

#### 【Factors Affecting the Change in Operating Income】

**Isoprene Chemicals and Elastomers**

As a result of a pull-forward in demand in the first half of the year caused by U.S. tariff policies in addition to stagnant demand for construction applications in China, isoprene chemicals experienced a period of adjustment from the third quarter onward. In addition, elastomers faced intensified competition with Asian competitors in the European market and other regions due to U.S. tariff policies despite an increase in sales volume.

**GENESTAR™**

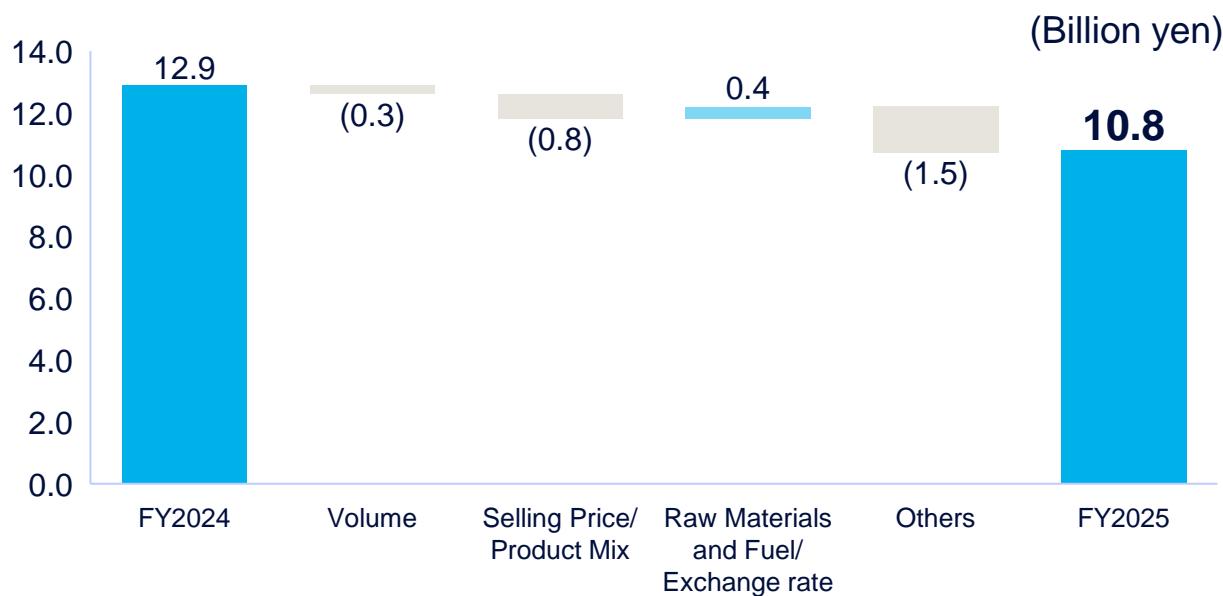

Sales volume increased due to expanded sales for both electric and electronic applications and automotive applications.

**Main reason of increase/ decrease**

Overall segment income increased thanks to the stabilization of operations at the Thai base, which was also leveraged to contribute to sales expansion.

	FY2024	FY2025	Difference
Net Sales	208.0	<b>206.9</b>	(1.0)
Operating Income	12.9	<b>10.8</b>	(2.1)

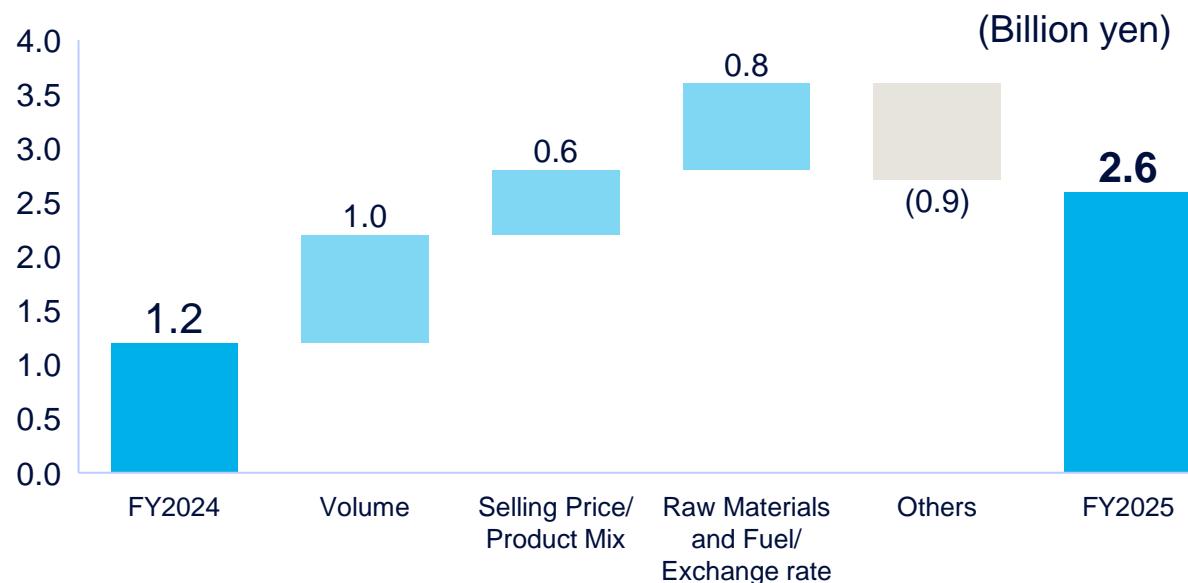

## 【Factors Affecting the Change in Operating Income】

<b>Methacrylate</b>	Sales volume fell due to temporary production difficulties in addition to reduced production capacity for methyl methacrylate and some downstream products from July 2025.
<b>Medical</b>	Sales of cosmetic dental materials, mainly in Europe and the U.S., remained brisk. We continued strengthening marketing aimed at expanding sales.
<b>Environmental Solutions</b>	Although the sales volume of activated carbon increased, mainly for drinking water application, a trend has emerged among some customers of revising purchasing timing due to U.S. tariff policies and an uncertain economic outlook, resulting in sales volume failing expectation. In addition, the diatomite and perlite business were transferred in December 2024, resulting in a decrease in sales. Profit was negatively impacted by a cold wave and production difficulties in the United States.
<b>Main reason of increase/decrease</b>	Overall segment income decreased due in part to the negative effects of a cold wave in the U.S. and production difficulties.

	FY2024	FY2025	Difference
Net Sales	62.7	60.7	(1.9)
Operating Income	1.2	2.6	1.4

## 【Factors Affecting the Change in Operating Income】

<b>CLARINO™</b>	Although the performance of shoes applications remained steady due to the effects of new recruitment efforts, sales volume decreased, especially for luxury and automotive applications due in part to the effects of production adjustments in EVs, stagnant demand in the European market, and slowing growth in the Chinese economy.
<b>Fibers and Industrial Materials</b>	Sales in Europe for construction material applications remained weak, but the sales composition continued to improve due in part to expanded sales of the liquid crystal polymer fiber VECTRAN™.
<b>Main reason of increase/ decrease</b>	Despite impacts from the European economic slowdown and EV production adjustments, overall segment income increased due to contributions from improvements in sales composition and other factors.

- All figures are rounded to the nearest hundred million yen.
- This presentation contains various forward-looking statements which are based on the current expectations and assumptions of future events. All figures and statements with respect to the future performance, projections, and business plans of Kuraray and its group companies constitute forward-looking statements. Although Kuraray believes that its expectations and assumptions are reasonable, actual results and trends of Kuraray's performance could differ materially from those expressed or implied by such figures or statements due to risks and uncertainties in the future business circumstances. The factors which may cause such difference include, without limitation: (1) general market and economic conditions in Asia including Japan, the U.S., Europe and other regions; (2) fluctuations of currency exchange rates, especially between the Japanese yen and the U.S. dollar and other foreign currencies; (3) changes in raw material and fuel costs; (4) industrial competition and price fluctuations in Japan and international markets; (5) advance or delay in the construction of new plants and production lines; (6) successful development of new products and technologies; and (7) changes in laws and regulations (including tax and environmental) and legal proceedings.
