## 1. Qualitative Information on Quarterly Consolidated Financial Performance

### (1) Explanation of Results of Operations

In the first nine months of the fiscal year ending on March 31, 2019, gradual economic recoveries continued to take place in Japan, Europe and the United States. However, the overall outlook remained uncertain because of slowing economic growth in emerging Asian countries, concerns about U.S. economic policies and other reasons. In the electronic equipment, automotive and industrial equipment manufacturing sectors, which are the major customer segments of the Zuken Group, there were clear signs of an aggressive approach to capital investments backed by recovering corporate earnings.

Net sales in the first nine months were 18,899 million yen, 16.8% higher than one year earlier, as growth in all solutions sales remained steady. In particular, there was a strong growth in sales of Circuit design solutions led by the E3.series of wire harness design systems. Significant growth in sales of IT solutions due to strong sales of our DS-CR design data management system and network systems also contributed to the sales growth.

Earnings increased significantly due to the growth in sales. Ordinary profit was 1,999 million yen, 130.2% higher than one year earlier, and profit attributable to owners of parent was 1,397 million yen, 191.4% higher than one year earlier.

### (2) Explanation of Financial Position

Total assets at the end of the third quarter of the current fiscal year increased 491 million yen from the end of the previous fiscal year to 44,138 million yen.

Current assets increased 123 million yen. The main factors include increases of 1,098 million yen in cash and deposits, 272 million yen in work in process and 212 million yen in other current assets due to an increase in prepaid expenses, while there was a decrease of 1,513 million yen in notes and accounts receivable-trade. Non-current assets increased 367 million yen. The main factors include an increase of 641 million yen in investments and other assets primarily due to an increase in investment securities and a decrease of 202 million yen in intangible assets.

Total liabilities decreased 731 million yen from the end of the previous fiscal year to 12,368 million yen. Current liabilities decreased 760 million yen mainly due to decreases of 444 million yen in income taxes payable and 269 million yen in provision for bonuses. Non-current liabilities increased 28 million yen mainly due to an increase in net defined benefit liability.

Net assets increased 1,223 million yen from the end of the previous fiscal year to 31,770 million yen, and the shareholders' equity ratio was 71.1%.

### (3) Explanation of Consolidated Forecast and Other Forward-looking Statements

We currently maintain the consolidated forecast for the fiscal year ending March 31, 2019 that was released on May 7, 2018.
