(1) Consolidated Operating Results

Economy and Market Conditions

During the three-month period ended June 30, 2020 (April 1, 2020 – June 30, 2020), the business environment surrounding the TAIYO YUDEN Group ("the Group") was extremely challenging for the global economy with economic activity restricted by the impact from the COVID-19 pandemic. As for the future outlook, the economy is expected to head toward a recovery from the extremely challenging conditions as economic activity gradually resumes, but it will be necessary to monitor infectious disease trends, trade issues in individual countries, and fluctuations in financial and capital markets.

Based on the Business Continuity Plan (BCP), we have implemented various measures to prevent the spread of COVID-19 and to ensure the health and wellbeing of stakeholders, including employees and suppliers. At production sites in Japan and overseas, we have continued production activities after ensuring thorough measures to prevent infection while following the instructions and guidance of national and local governments in each country. In addition, we are making efforts for non-production employees to carry out duties and reduce the risk of infection by implementing such measures as working from home in accordance with the instructions and requests on preventing the spread of infection from national and local governments in each country.

As a result of the current state of emergency due to COVID-19, there have been various changes in society and the management environment. The Group holds ¥58,706 million in cash and deposits, and has maintained a sound financial structure with an equity ratio of 60.3%. With commitment line agreements concluded with a number of financial institutions also standing at ¥30.0 billion, the Group has secured the means for responding to contingencies and will continue its business.

Company Actions Planned to Offset These Conditions

The Group aimed to achieve its medium-term targets and management vision by capturing focus markets such as automotive, IT infrastructure/industrial equipment, healthcare, the environment and energy centered on the solution business that leverages the Group's core technologies, in addition to cutting-edge products and high reliability products that draw on the Group's strengths of research and development and production technology. Moreover, the Group is strengthening its manufacturing capabilities in order to build a structure that can enhance profitability and meet the future increase in demand for components. In addition to enhancing production capacity, the Group is accelerating improvements in production efficiency by promoting advances in underlying technologies and transforming production methods.

Overview of Business Performance

Consolidated net sales for the three-month period ended June 30, 2020 totaled ¥60,493 million, which is a decrease of 11.9% compared to the corresponding period of the previous fiscal year. Operating income was ¥7,923 million, a decrease of 17.4%. The Group recorded a decline in sales and profit due to such factors as constraints on operations at production subsidiaries in the Philippines and Malaysia which occurred due to the impact of COVID-19 between March and May 2020. Ordinary income was ¥7,371 million, a decrease of 16.7%, mainly owing to foreign exchange losses of ¥446 million. Moreover, as a result of recording ¥1,513 million in extraordinary loss, including loss related to COVID-19 at overseas subsidiaries, net income attributable to owners of parent company amounted to ¥4,541 million, down by 36.5% from the corresponding period of the previous fiscal year.

Exchange Rate

The average foreign currency exchange rate for the three-month period ended June 30, 2020 was US\$1: \pm 107.61. This is an appreciation of \pm 3.34 as compared to the average realized in the corresponding period of the previous fiscal year of US\$1: \pm 110.95.

Net Sales by Product Classification

Capacitors

The capacitor product classification is comprised of multilayer ceramic capacitors.

Product sales for information equipment and IT infrastructure/industrial equipment were higher as compared to the corresponding period of the fiscal year while sales for consumer products, communication equipment, and automobiles were lower. As a result, net sales for the three-month period ended June 30, 2020 totaled ¥40,075 million, which is a decrease of 7.5% compared to the corresponding period of the previous fiscal year.

Ferrite and Applied Products

This product classification is comprised of various inductors including wire-wound inductors and multilayer chip inductors.

Product sales for communication equipment were higher as compared to the corresponding period of the previous fiscal year while sales for consumer products, information equipment, automobiles, and IT infrastructure/ industrial equipment were lower. As a result, in the three-month period ended June 30, 2020, sales decreased by 8.2% to \(\frac{1}{2}\)7,928 million as compared to the corresponding period of the previous fiscal year.

Integrated Modules & Devices

This product classification is comprised of FBAR/SAW devices for mobile communications, a wide range of power supply and high frequency modules, embedded-parts multilayer wiring substrates "EOMINTM" and product mounting business done by a subsidiary company.

For the three-month period ended June 30, 2020, sales of FBAR/SAW devices for mobile communications etc. decreased year over year. This resulted in a 27.5% decrease in sales for this product classification year over year to ¥9,075 million.

Others

For this product classification, the Group manufactures and sells aluminum electrolytic capacitors and power storage devices.

Net sales in this classification increased to ¥3,413 million, down 17.5% year over year.

(2) Consolidated Financial Conditions

Assets

Total assets as of June 30, 2020 increased ¥9,953 million to ¥353,076 million compared with the end of the previous fiscal year. Current assets increased ¥4,090 million. This increase in current assets was mainly due to the increase in finished products of ¥3,611 million, work in process of ¥2,731 million, raw materials and supplies of ¥1,810 million, and the decrease in trade notes and accounts receivable of ¥4,372 million.

Fixed assets increased ¥5,862 million owing to the upswing in property, plant and equipment of ¥5,498 million.

Liabilities

Total liabilities as of June 30, 2020 were \(\frac{1}{2}\) 139,621 million, an increase of \(\frac{2}{2}\)6,953 million as compared to the balance at March 31, 2020. This was mainly due to an increase of \(\frac{1}{2}\)8,773 million in long-term borrowings, and decrease of \(\frac{1}{2}\)2,489 million in accrued bonuses for employees.

Net Assets

Net assets as of June 30, 2020 increased \(\frac{4}{2}\),999 million to \(\frac{4}{2}\)13,454 million compared with the end of the previous fiscal year.

(3) Forecasts of Consolidated Operating Results

Consolidated operating earnings forecasts for the year ending March 31, 2021 are as follows.

(millions of yen)

Period		ths ending er 30, 2020	Year ending March 31, 2021		
Item	Amount	YoY (%)	Amount	YoY (%)	
Net sales	130,000	(8.4)	265,000	(6.1)	
Operating income	15,000	(26.1)	27,000	(27.4)	
Ordinary income	14,000	(27.0)	26,000	(26.1)	
Net income attributable to the owners of parent company	8,500	(44.6)	17,000	(5.7)	

Because of the sharp downturn in the global economy due to the COVID-19 pandemic as well as the increasing uncertainty resulting from trade issues

and geopolitical risk for individual countries, it was difficult to calculate reasonable full-year forecasts of operating results for the fiscal year ending March 31, 2021 as of May 12, 2020. Accordingly, the Company only published the forecast of consolidated operating results for the first quarter of the fiscal year ending March 31, 2021. The Company will now publish the full-year forecasts of consolidated operating results for the fiscal year ending March 31, 2021 as shown above based on information and forecasts available as of the date of this report.

In the forecasts of operating results for the fiscal year ending March 31, 2021, sales and profit are forecast to decrease based on the assumption that the impact of COVID-19 will persist for the full year. During the first quarter (the three-month period ended June 30, 2020), there were constraints on operations at production subsidiaries in the Philippines and Malaysia due to the impact of COVID-19, but we have assumed that these production subsidiaries will be able to operate as normal from the second quarter onward. The forecast is based on an average foreign currency exchange rate of US\$1:¥107.

Despite the current uncertainty and downturn in demand due to the impact of COVID-19, we have assumed there will be no significant changes to the trend of increasing demand for electronic components over the medium term. We expect that demand for large, high reliability components will increase alongside advancing use of electronics and electronic components and enhancements in performance for automobiles and information infrastructure, such as base station communication devices and data centers. These are our focus markets. Moreover, there are ongoing enhancements in the functionality and performance of communication equipment, such as 5G smartphones, and we believe there will be an increase in cutting edge products that require advanced technical capabilities. The Company will continue to make the essential investment to prepare for this demand and for achieving future growth. Meanwhile, we will continue working to create a more resilient distributed production system and to improve production efficiency utilizing AI and other means as measures to address risks going forward.
