1. Qualitative Information Concerning Financial Statements and Other

(1) Consolidated Operating Results

During the three-month period ended June 30, 2023 (April 1, 2023 to June 30, 2023), the business conditions surrounding the TAIYO YUDEN Group ("the Group") experienced a trend of moderate recovery although the uncertainty in the global economy continued. As for the future, although the moderate recovery is expected to continue, it will be necessary to monitor the international situation, as well as fluctuations in financial and capital markets and trends in the demand environment amid global monetary tightening.

Under the medium-term management plan 2025, the Group is aiming to increase the proportion of sales in focus markets, primarily automotive and IT infrastructure/industrial equipment, to 50%. Moreover, the Group will produce high valueadded electronic components with a focus on high-end and high reliability products to achieve further growth in multilayer ceramic capacitors, the Group's core business, in addition to strengthening inductor and communication device products to establish them as core businesses. We also plan capital investment of \$300.0 billion over five years to continuously expand capacity to meet increase in demand as well as to implement proactive initiatives in the areas of environmental measures and upgrading of IT.

Consolidated net sales for the three-month period ended June 30, 2023 totaled \$72,612 million, which is a decrease of 11.2% compared to the corresponding period of the previous fiscal year. Operating loss was \$577 million compared to operating profit of \$13,142 million in the same period of the previous fiscal year. Ordinary profit was \$1,159 million, a decrease of 93.3%, and profit attributable to owners of parent was \$903 million, a decrease of 92.6%. Net sales as well as operating profit, ordinary profit, and profit attributable to owners of parent declined due to a decrease in production volume and inventory adjustments, primarily in the information equipment and IT infrastructure/industrial equipment.

The average foreign currency exchange rate for the three-month period ended June 30, 2023 was US\$1: \$134.93. This is a depreciation of \$10.48 as compared to the average realized in the corresponding period of the previous fiscal year of US\$1: \$124.45.

Net Sales by Product Classification

[Capacitors]

The capacitor product classification is comprised of multilayer ceramic capacitors.

While product sales for use in communication equipment and automobiles increased year over year, sales for use in consumer products, information equipment, and IT infrastructure/industrial equipment declined. As a result, net sales for the three-month period ended June 30, 2023 totaled ¥47,133 million, a decrease of 13.6% compared to the corresponding period the previous fiscal year.

[Inductors]

This product classification is comprised of various inductors including wire-wound inductors and multilayer inductors.

In the three-month period ended June 30, 2023, product sales for use in information equipment, communication equipment, and automobiles were higher as compared to the corresponding period of the previous fiscal year while sales for use in consumer products and IT infrastructure/industrial equipment were lower. As a result, net sales for the three-month period ended June 30, 2023 totaled $\pm 10,976$ million, which is a decrease of 6.6% compared to the corresponding period of the previous fiscal year.

[Integrated Modules & Devices]

This product classification is comprised of FBAR/SAW devices for mobile communications, circuit modules, etc.

For the three-month period ended June 30, 2023, sales of FBAR/SAW devices for mobile communications increased year over year, but sales of circuit modules decreased. This resulted in a 10.7% decrease in sales for this product classification year over year to \$8,182 million.

[Others]

For this product classification, the Group manufactures and sells aluminum electrolytic capacitors, etc.

For the three-month period ended June 30, 2023, sales of aluminum electrolytic capacitors, mainly for use in automobiles, increased year over year. This resulted in a 1.1% increase in sales for this product classification year over year to $\frac{1}{2}6,320$ million.

(2) Consolidated Financial Conditions

Total assets as of June 30, 2023 increased $\frac{448,347}{48,347}$ million to $\frac{4551,810}{51,810}$ million compared with the end of the previous fiscal year. Current assets increased $\frac{430,501}{30,501}$ million. This increase in current assets was mainly due to the increase in cash and deposits of $\frac{426,310}{10,501}$ million, notes and accounts receivable - trade of $\frac{41,763}{10,501}$ million. Non-current assets increased $\frac{417,845}{10,501}$ million owing to the upswing in property, plant and equipment of $\frac{419,617}{10,501}$ million.

Total liabilities as of June 30, 2023 were \$229,900 million, an increase of \$44,915 million as compared to the balance at March 31, 2023. This was mainly due to the increase in long-term borrowings of \$33,450 million and notes and accounts payable - trade of \$2,550 million.

Net assets as of June 30, 2023 increased \$3,431 million. The main factors were a decrease in retained earnings of \$4,704 million due to profit attributable to owners of parent of \$903 million and dividends of surplus of \$5,607 million, in addition to an increase of \$8,139 million in foreign currency translation adjustment due to the impact of exchange rates, including the depreciation in the value of the yen.

(3) Forecasts of Consolidated Operating Results

There is no change in the forecasts of consolidated operating results for the fiscal year ending March 31, 2024 that was previously announced on May 9, 2023.

In the fiscal year ending March 31, 2024, we anticipate that net sales will increase with rising demand for electronic components due to increasing use of electronics and electric motors in automobiles and other factors. However, each stage of profit is expected to decrease as a result of such factors as cost increases because of higher commodity prices and aggressive investment to meet rising demand in the future. As for the future, it will be necessary to monitor the fluctuations in financial and capital markets and trends in the global demand environment amid global monetary tightening.

The forecast is based on an average foreign currency exchange rate of US\$1: ¥130.

*Disclaimer concerning forecasts of operating results:

The aforementioned forecasts of results are based on information available as of the date of this report. As a result, forecast information contained in this document may include potential risk and uncertainties. Accordingly, actual results may differ materially from forecasts due to a variety of factors.
