

The 3-wheel electric counterbalance truck UniCarriers TX3 **wins the IFOY Award 2019**

Kyoto, Japan (May 16, 2019) - Mitsubishi Logisnext Co., Ltd. announces that its 3-wheel electric counterbalance truck UniCarriers TX3, a model offered in Europe, Asia, Middle East and Africa, has won first place in the Counter Balanced Truck category at International Intralogistics and Forklift Truck of the Year (IFOY) Award 2019.

The IFOY Award is an internationally influential prize launched in 2013. It is awarded to the year's best material handling products and solutions, selected in criteria such as the safety, technology, sustainability, cost efficiency, design and ergonomics.

The board of judges, made up of experienced specialist journalists from all over the world, was completely convinced by the TX3 and its ergonomic, safety features and excellent electric steering.

As far as safety is concerned, the IFOY testers emphasised the windows in the front panel, which are unique on the market to date. With them, UniCarriers improves visibility of the fork tips and the front corners of the load for precise and safe handling of goods.

The TX3 has already received the Red Dot Design Award 2018 for its special combination of design and functionality.
