Please note that the dividend is ¥0 if the total of a., b., c., and d. is negative.

The dividend shall be ¥0 for lump-sum payment whole life insurance and lump-sum payment annuities insurance, and their additional riders.

Necessary adjustments will be made to policies after conversion.

(3) Policyholder dividends on Former Postal Life Insurance Policies will be determined by the Management Network.

## 4. Investment Overview for the Fiscal Year Ended March 31, 2025 (General Account)

### (1) Investment Environment

#### 1) Investment environment

During the fiscal year ended March 31, 2025, despite some signs of stagnation in personal consumption, the Japanese economy saw a moderate recovery owing to the service industry, which continued to benefit from steady demand from international visitors, as well as strong corporate performance. While the U.S. economy remained steady, supported by a solid employment environment and strong personal consumption, personal consumption recently showed signs of a slowdown amid growing concerns over inflation stemming from tariff policies. The European economy witnessed a recovery in personal consumption backed by an improvement in household income supported by easing consumer prices, despite lingering political uncertainties. However, the pace of recovery slowed due to continued sluggishness in the manufacturing industry, particularly in Germany.

Under these economic circumstances, the investment environment was as follows.

#### Domestic Bond Market

The domestic long-term yield rose to the 1.1% level in July marking the highest level in 12 years, driven by anticipation that the Bank of Japan will normalize its monetary policy amid rising wages and prices. Although the Bank of Japan raised the policy interest rate to 0.25% at the end of July, the yield declined due to concerns about a slowdown in the economy stemming from factors such as rising unemployment rates in the U.S., and remained flat through September. Thereafter, fueled once again by anticipation that the Bank of Japan will move ahead with the normalization, the yield resumed its upward trend. In January, the Bank of Japan announced a further hike of the policy interest rate to 0.5%, and by the end of March, the domestic long-term yield stood at around 1.5%.

#### Domestic Stock Market

The Nikkei Stock Average rose in response to the solid U.S. economy as well as anticipation that the Japanese economy will depart from deflation and Japanese companies will reform their governance structure. It reached a new record high in July at the ¥42,000 level. Thereafter, the index was temporarily stagnant before quickly rebounding due to concerns over a downturn in the U.S. economy, but remained largely range-bound due to the impact of the moves of the Bank of Japan regarding its policy normalization on the Japanese economy, and ambiguity surrounding the policies of the new U.S. administration. At the end of March, the index declined to the ¥35,000 level amid concerns over economic deterioration caused by U.S. tariff policies.

#### Foreign Exchange Markets

Regarding the USD/JPY exchange rate, the dollar strengthened, driven by the U.S. central bank's stance to maintain its high policy interest rates, and reached the ¥160 level in July. Subsequently, the dollar weakened against the yen to reach the ¥140 level in September amid concerns that the U.S. economy will slow down and the U.S. central bank will begin interest rate cuts. However, given the outlook that the rate cuts will be gradual, the dollar rebounded against the yen, and reached the ¥158 level in December. The dollar then went on to weaken against the yen due to predictions of interest rate hikes by the Bank of Japan, and dropped to the ¥149 level at the end of March.

Regarding the EUR/JPY exchange rate, similar to USD/JPY, the euro appreciated against the yen on the back of the European Central Bank's stance to maintain its high policy interest rates, and rose to the ¥175 level in July. Subsequently, the euro depreciated against the yen due to ongoing interest rate cuts by the European Central Bank, and fell to the ¥162 level at the end of March.

#### 2) Investment Policies

The Company's operations are based on the concept of asset liability management (ALM) in order to maintain sound management and ensure the payment of insurance claims and others. Specifically, the approach is to match assets with liabilities, with a focus on yen-denominated interest-bearing assets with high affinity to the characteristics of liabilities. With this approach the Company aims to earn stable profits while mitigating interest rate risk.

Moreover, the Company makes an effort to increase revenues through the investment of "return-seeking assets" (which we previously referred to as "risk assets") such as foreign securities and stocks under appropriate risk management.

### 3) Performance Overview

#### [Assets]

As of March 31, 2025, total assets of the Company amounted to ¥59,555.5 billion, a decrease of ¥1,301.5 billion from ¥60,857.0 billion at the end of the previous fiscal year.

The balance of return-seeking assets including stocks and foreign securities remained at the same level as the end of the previous fiscal year due to the sale of unhedged foreign bonds amid yen depreciation and continued investments in alternative assets, which neutralized a decrease in unrealized gains on domestic stocks owing partly to the decline in the Nikkei Stock Average.

For domestic corporate and government bonds, the Company invested primarily in long-term and super long-term bonds, in view of their value as assets that secure stable income. However, the amounts of these bonds decreased due to redemption, etc.

For loans, the Company provided loans including loans to the Management Network, syndicated loans, loans to local governments and policy loans. The amount of loans decreased due to the repayment of loans to the Management Network.

#### [Investment Income and Expenses]

For the fiscal year ended March 31, 2025, invest income of the Company decreased by ¥17.1 billion from the previous corresponding period to ¥1,195.6 billion, due to a decrease in gains on sales of securities and interest and dividend income.

Investment expenses decreased by ¥3.4 billion from the previous corresponding period to ¥279.0 billion mainly due to a decrease in losses on derivative financial instruments.

As a result, investment income and expenses amounted to ¥916.5 billion, a decrease of ¥13.6 billion from the previous corresponding period.

# NOTES TO THE UNAUDITED NON-CONSOLIDATED FINANCIAL STATEMENTS AS OF AND FOR THE FISCAL YEAR ENDED MARCH 31, 2025

## (Notes to the Unaudited Non-Consolidated Balance Sheets)

### 1. Significant Accounting Policies

#### (1) Valuation Criteria and Methods for Securities

Securities including cash and deposits as well as monetary claims bought which are equivalent to securities, and securities invested in money held in trust, are recorded based on the following:

##### 1) Held-to-maturity Bonds

Held-to-maturity bonds are carried at amortized cost and the cost of these securities sold is calculated using the moving-average method. Amortization is calculated using the straight-line method.

##### 2) Policy-reserve-matching Bonds

In accordance with “Temporary Treatment of Accounting and Auditing Concerning Policy-reserve-matching Bonds in the Insurance Industry” (Japanese Institute of Certified Public Accountants (“JICPA”) Industry Audit Committee Report No. 21), policy-reserve-matching bonds are carried at amortized cost and the cost of these securities sold is calculated using the moving-average method. Amortization is calculated using the straight-line method.

##### 3) Equities of Subsidiaries and Affiliates (stocks issued by subsidiaries as defined in Article 2, Paragraph 12 of the Insurance Business Act and closely related parties (excluding subsidiaries) and affiliates as defined in Article 13-5-2, Paragraph 3 of the Order for Enforcement of the Insurance Business Act and affiliates as defined in Paragraph 4 of the same Article)

Carried at cost and the cost of these securities sold is calculated using the moving-average method.

##### 4) Available-for-sale Securities

###### (i) Available-for-sale Securities other than stocks, etc. with no market price

Available-for-sale securities other than stocks, etc. with no market price are carried at their market price at the end of the fiscal year. Cost of securities sold is calculated using the moving-average method.

###### (ii) Stocks, etc. with no market price

Stocks, etc. with no market price are carried at cost using the moving-average method.

Net unrealized gains (losses) on available-for-sale securities, net of income taxes, are included in net assets.

#### (2) Valuation Criteria and Methods for Derivative Transactions

All derivative transactions are valued at fair value.

#### (3) Depreciation Method for Fixed Assets

##### 1) Tangible Fixed Assets (excluding leased assets)

Depreciation of tangible fixed assets is calculated using the straight-line method based on the following useful lives:

(i) Buildings: 2-60 years

(ii) Other tangible fixed assets: 2-20 years

##### 2) Intangible Fixed Assets (excluding leased assets)

The capitalized development costs of software intended for internal use are amortized over the expected useful life of mainly 5 years using the straight-line method.

##### 3) Leased Assets

Finance lease transactions that do not transfer ownership are depreciated to a residual value of zero using the straight-line method over the lease term.

#### (4) Recognition of Reserves

##### 1) Reserve for Possible Loan Losses

Reserve for possible loan losses is provided pursuant to the Company’s standards for self-assessment of asset quality, and general allowance is provided using a rate based on historical collectability experience. In addition, specific allowances, which are determined based on individual collectability of accounts, are also recorded.

All loans and claims are assessed initially by the relevant departments based on internal rules for self-assessment of asset quality. The asset evaluation department, which is independent from the relevant departments, reviews these self-assessments. The above reserves and allowances are recorded based on the results of these assessments.

For loans and guaranteed loans that were extended to borrowers that have filed for bankruptcy including legal bankruptcy or civil rehabilitation, or that are considered substantially bankrupt, an allowance is provided

for in the amount of loans, net of collateral value or the amounts expected to be recoverable under guarantees. Reserve for possible loan losses also includes amounts set aside for other assets subject to valuation allowance. The amount written off for loans and other assets during the fiscal year ended March 31, 2025, was ¥44 million.

2) Reserve for Management Bonuses

To provide for the payment of bonuses to Executive Officers of the Company, a reserve for management bonuses is provided based on the projected amount of bonuses to be paid.

3) Reserve for Employees' Retirement Benefits

To provide for payment of retirement benefits to employees, a reserve for employees' retirement benefits is provided based on the projected amount of retirement benefit obligations at the end of the fiscal year.

(i) Method for Attributing Expected Benefits to Periods

In calculating the projected benefit obligation, the benefit formula basis is used to attribute the expected benefit to respective service period.

(ii) Method for Recognizing Actuarial Differences and Prior Service Cost

The actuarial difference is amortized using the straight-line method over a period of 14 years, which is less than the estimated average remaining service period for employees from the fiscal year following the respective fiscal year in which the difference is incurred.

Prior service cost is amortized using the straight-line method over a period of 14 years, which is less than the estimated average remaining service lives for employees in the fiscal year of incurrence.

4) Reserve for Management Board Benefit Trust

To provide for the granting of shares of the Company to Executive Officers of the Company in accordance with the Stock Benefit Rules, a reserve for management board benefit trust is provided in the projected amount of stock benefit obligations.

(5) Reserve for Price Fluctuations

Reserve for price fluctuations in security investments is calculated based on Article 115 of the Insurance Business Act.

(6) Translation of Assets and Liabilities Denominated in Foreign Currencies

Assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rates prevailing at the fiscal year-end.

(7) Hedge Accounting

1) Methods for Hedge Accounting

The Company applies deferred hedge accounting through currency swaps to hedge cash flow related to foreign exchange fluctuations for a portion of its foreign-currency-denominated bonds, and fair value hedge accounting for foreign currency exchange contracts to hedge foreign exchange fluctuation risk for a portion of its foreign-currency-denominated bonds in accordance with the "Accounting Standard for Financial Instruments" (Accounting Standards Board of Japan ("ASBJ") Statement No. 10, July 4, 2019; hereinafter referred to as "Financial Instruments Accounting Standard"), and also applies deferred hedge accounting through interest rate swaps to hedge interest rate risk for a portion of its insurance liabilities in accordance with the "Accounting and Auditing Treatment on the Application of the Financial Instruments Accounting Standard to the Insurance Industry" (JICPA Industry Committee Practical Guidelines No. 26).

2) Hedging Instruments and Hedged Items

(Hedging Instruments)	(Hedged Items)
Currency swaps	Foreign-currency-denominated bonds
Foreign currency exchange contracts	Foreign-currency-denominated bonds
Interest rate swaps	Insurance liabilities

3) Hedging Policies

Foreign currency exchange contracts are used to hedge foreign currency exchange risks of foreign-currency-denominated bonds within a predetermined range, while interest rate swap contracts are used to hedge interest rate risks of insurance liabilities within a predetermined range.

4) Assessment of Hedge Effectiveness

Hedge effectiveness is assessed primarily by ratio analysis which compares market fluctuations of hedged items and hedging instruments. The evaluation of hedge effectiveness is omitted in cases of foreign exchange contracts where there is a high correlation between hedged items and hedging instruments.

(8) Policy Reserves

To prepare for the fulfilment of future obligations under the insurance contracts with respect to policies that have commenced as of the fiscal year-end, policy reserves are calculated in accordance with the statement of calculation procedures for insurance premiums and policy reserves (Article 4, Paragraph 2, Item 4 of the Insurance Business Act) and accumulated, pursuant to Article 116, Paragraph 1 of the Insurance Business Act.

Among the policy reserves, insurance premium reserves are calculated based on the following procedures. The amount includes additional policy reserves accumulated for the portion of the reinsurance contracts issued to the Management Network and for lump-sum payment annuities, pursuant to Article 69, Paragraph 5 of the Ordinance for Enforcement of the Insurance Business Act.

- 1) Reserves for contracts subject to the standard policy reserves are calculated in accordance with the method prescribed by the Commissioner for Financial Services Agency (Public Notice No. 48 issued by the Ministry of Finance in 1996).
- 2) Reserves for other contracts are calculated based on the net level premium method.

In the fiscal year ended March 31, 2025, the Company accumulated additional policy reserves for the portion of reinsurance from the Management Network pursuant to Article 69, Paragraph 5 of the Ordinance for Enforcement of the Insurance Business Act. The amount of reserves accumulated totaled ¥598,226 million. However, as the same amount was reversed from the contingency reserve, there was no impact on ordinary profit or income before income taxes.

Among the policy reserves, contingency reserves are accumulated to ensure the fulfilment of future obligations under insurance contracts in preparation of possible future risks, pursuant to Article 116 of the Insurance Business Act and Article 69, Paragraph 1, Item 3 of the Ordinance for Enforcement of the Insurance Business Act.

The Chief Actuary, pursuant to Article 121, Paragraph 1 of the Insurance Business Act and Article 80 of the Ordinance for Enforcement of the Insurance Business Act, confirms whether the policy reserves as of the fiscal year-end have been appropriately accumulated.

(9) Employees' Retirement Benefits Accounting

Unrecognized actuarial differences and unrecognized prior service cost related to retirement benefits are treated differently from the consolidated financial statements.

2. Transactions for Granting Shares and Others of the Company to Executive Officers of the Company through Trust

Notes to the transactions for granting shares and others of the Company to Executive Officers of the Company through trust are omitted as they are presented in NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS AS OF AND FOR THE FISCAL YEAR ENDED MARCH 31, 2025 (Notes to the Unaudited Consolidated Balance Sheets).

3. The balance sheet amount, fair value and the outline of the risk management policy of policy-reserve-matching bonds were as follows:

- (1) The balance sheet amount and fair value of policy-reserve-matching bonds amount to ¥7,243,771 million and ¥6,522,343 million, respectively.

- (2) The outline of the risk management policy of policy-reserve-matching bonds is as follows:

The Company categorizes its insurance products into the following sub-groups based on the attributes of each product in order to manage risks arising from fluctuations in interest rates of assets and liabilities, and adopts a management policy whereby the duration gap between policy-reserve-matching bonds and policy reserves by sub-groups are reconciled within a certain range and the duration gap is periodically checked.

- 1) Postal Life Insurance Contracts (excluding some insurance types)
- 2) Japan Post Insurance life insurance contracts (general) (all insurance policies)
- 3) Japan Post Insurance life insurance contracts (lump-sum payment) (excluding some insurance types)

From the fiscal year ended March 31, 2025, lump-sum payment whole life insurance has been added to the sub-group of Japan Post Insurance life insurance contracts (lump-sum payment). This change has no impact on profit and loss.

4. Securities lent under lending agreements in the amount of ¥1,390,979 million were included in "Securities" in the balance sheets as of March 31, 2025.

5. There were no bankrupt loans or quasi-bankrupt loans, doubtful loans, past due loans for three months or more, or restructured loans as of March 31, 2025.

Definitions for each of the respective loans are as follows:

Bankrupt or quasi-bankrupt loans are loans to borrowers who have fallen into bankruptcy for reasons such as the commencement of bankruptcy proceedings or reorganization proceedings, or the petition for commencement of rehabilitation proceedings, and loans similar to these.

Doubtful loans are loans to borrowers who are yet to have fallen into bankruptcy, but from whom the collection of principal and receipt of interest as committed under an agreement is unlikely to be achieved, due to the borrower's deteriorating financial conditions and business performance. This category excludes loans classified as bankrupt loans or quasi-bankrupt loans and doubtful loans.

Past due loans for three months or more are loans for which principal or interest payments are delinquent for three months or more under the term of the loans from the day following the contractual due date, excluding those classified as bankrupt loans or quasi-bankrupt loans.

Restructured loans are loans for which certain concessions favorable to borrowers, such as interest reduction or exemption, postponement of principal or interest payments, debt waiver or other arrangements, have been made for the purpose of assisting and supporting the borrowers in the restructuring of their business. This category excludes loans classified as bankrupt loans or quasi-bankrupt loans, doubtful loans and past due loans for three months or more.

6. Accumulated depreciation for tangible fixed assets as of March 31, 2025, was ¥63,379 million.
7. Total monetary claims and total monetary obligations with respect to subsidiaries and affiliates amounted to ¥174 million and ¥16,989 million, respectively.
8. Total deferred tax assets and total deferred tax liabilities were ¥1,546,041 million and ¥801,668 million, respectively. A deduction from deferred tax assets as valuation allowance was ¥16,009 million.  
Significant components of deferred tax assets include ¥1,025,316 million of policy reserves, ¥225,014 million of reserve for price fluctuations, ¥42,760 million of reserve for outstanding claims, ¥31,315 million of reserve for employees' retirement benefits, and ¥169,314 million of unrealized losses on available-for-sale securities.  
Significant components of deferred tax liabilities include ¥787,439 million of unrealized gains on available-for-sale securities.  
Deferred tax assets associated with policy reserves and reserve for price fluctuations have the effect of reducing the amount of tax burden through future taxable income over the long term.
9. The effective statutory tax rate for the fiscal year ended March 31, 2025, was 28.00%. The main factor contributing to the difference between the effective statutory tax rate and the actual income tax rate after applying tax effect accounting was -34.62% due to an upward adjustment of deferred tax assets at the end of the fiscal year resulting from a change in tax rate.
10. Following the enactment of the Act on Partial Revision of the Income Tax Act (Act No. 13 of 2025) by the Diet on March 31, 2025, the effective statutory tax rate used to calculate deferred tax assets and liabilities for the fiscal year ended March 31, 2025, has been changed from 28.00% in the previous fiscal year to 28.93% for amounts expected to be collected or paid on or after April 1, 2026. As a result, deferred tax assets (net of deferred tax liabilities) increased by ¥21,235 million, income taxes - deferred decreased by ¥40,725 million, and net unrealized gains on available-for-sale securities decreased by ¥19,745 million in the fiscal year ended March 31, 2025.

12. Equities, etc. of subsidiaries and affiliates were ¥187,582 million.

13. Assets pledged as collateral consisted of the following:

Securities	¥4,489,608 million
Liabilities corresponding to assets pledged as collateral consisted of the following:	
Payables under repurchase agreements	¥4,516,922 million
The above securities are those sold under repurchase agreements.	

In addition to the above, the following has been pledged as collateral for the transactions such as transactions under securities lending secured by securities and derivative transactions.

Securities	¥160,554 million
Margin deposits for futures transactions	¥4,437 million
Cash collateral paid for financial instruments	¥56,013 million

14. Reserve for outstanding claims for reinsured part defined in Article 71, Paragraph 1 of the Ordinance for Enforcement of the Insurance Business Act, which is referred to in Article 73, Paragraph 3 of the Ordinance (hereinafter referred to as “reserve for outstanding claims-ceded”), as of March 31, 2025, was ¥357 million. Policy reserves for reinsured part defined in Article 71, Paragraph 1 of the said Ordinance (hereinafter referred to as “policy reserves-ceded”) as of March 31, 2025, were ¥1,187,171 million.

15. Net assets per share were ¥8,470.75.

The Company has established a Board Benefit Trust (BBT). Shares of the Company held in trust, which were recorded as treasury stock under the category of shareholders’ equity, were included in treasury stock to be deducted from the calculation of the total number of shares issued at the end of the fiscal year, for the purpose of calculating net assets per share.

Total number of treasury stock at the end of the fiscal year which was deducted from the calculation of net assets per share for the fiscal year ended March 31, 2025, was 394 thousand shares.

16. The Company has the right to sell or pledge securities received as collateral for transactions such as resale agreements, borrowing agreements and derivative transactions. The fair value of such securities held in hand was ¥109,672 million as of March 31, 2025.

17. Bonds payable are subordinated bonds stipulating that their priorities are ranked behind other obligations.

18. Policy reserves, excluding contingency reserve and including policy reserves-ceded, related to reinsurance contracts with the Management Network, amounted to ¥24,576,340 million and are provided at amounts calculated based on the statement of calculation procedures for the Company’s insurance premiums and policy reserves. The amounts calculated based on the foregoing procedures are not less than the amounts calculated based on the statement of calculation procedures for the Postal Life Insurance policy reserves in accordance with the Act on Organization for Postal Savings, Postal Life Insurance and Post Office Network (Act No. 101 of 2005).

In addition, contingency reserve and reserve for price fluctuations are provided in the amount of ¥915,558 million and ¥581,452 million, respectively, for the category of the reinsurance.

19. Deposits from the Management Network in the balance sheets refer to the amounts equivalent to the reserve for outstanding claims and reserve for losses on compensation for damages related to litigation or conciliation of the Management Network, which were deposited at the time of privatization based on the outsourcing agreements with the Management Network for the administrative operation of the Postal Life Insurance Policy and which remained unpaid as of the fiscal year ended March 31, 2025.

20. Notes to significant subsequent events are as follows:

**(Notes to the Unaudited Non-Consolidated Statements of Income)**

**1. Significant Accounting Policies**

**(1) Recognition of insurance premiums and others**

**1) Insurance premiums**

The first premium is recognized for premiums that have been collected and for which the policy has commenced, in the amount collected. Premiums thereafter are recognized in the amount of each collection.

Portions of collected insurance premiums corresponding to the unearned period as of the fiscal year-end are accumulated as policy reserves, pursuant to Article 116 of the Insurance Business Act and Article 69, Paragraph 1, Item 2 of the Ordinance for Enforcement of the Insurance Business Act.

**2) Reinsurance income**

Of the amounts that are paid as insurance claims pertaining to original insurance contracts in accordance with reinsurance contracts, the portions that correspond to reinsurance are recorded as reinsurance income at the time of payment of these insurance claims.

**(2) Recognition of insurance claims and others**

**1) Insurance claims and others (excluding reinsurance premiums)**

When an insured event occurs and payment is made in the amount calculated based on the insurance contract, insurance claims and others (excluding reinsurance premiums) are recognized in the amount of such payment.

Reserve for outstanding claims has been accumulated for insurance claims, etc. for which payment is due but has not been paid at the fiscal year-end, or insurance claims, etc. for which the occurrence of the insured event has not been reported but the Company deems that the insured event provided in the insurance contract has occurred, pursuant to Article 117 of the Insurance Business Act and Article 72 of the Ordinance for Enforcement of the Insurance Business Act.

**2) Reinsurance premiums**

Reinsurance premiums that have been agreed on based on reinsurance contracts are recorded when the said reinsurance contracts are concluded or when insurance premiums corresponding to original insurance contracts are collected, etc.

Some of the policy reserves and reserves for outstanding claims that correspond to reinsurance are not set aside pursuant to Article 71, Paragraph 1 and Article 73, Paragraph 3 of the Ordinance for Enforcement of the Insurance Business Act.

2. Total expenses from transactions with subsidiaries and affiliates amounted to ¥19,114 million.

3. Gains on sales of securities comprise domestic bonds of ¥31,104 million, domestic stocks of ¥23,280 million and foreign securities of ¥56,256 million.

4. Losses on sales of securities comprise domestic bonds of ¥160,749 million, domestic stocks of ¥2,381 million, foreign securities of ¥28,375 million and other securities of ¥1,964 million.

5. Gains on money held in trust include losses on valuation of ¥4,975 million.

6. Losses on derivative financial instruments include losses on valuation of ¥6,288 million.

7. The amount of reversal of reserve for outstanding claims-ceded that is deducted from the calculation of reversal of reserve for outstanding claims for the fiscal year ended March 31, 2025, was ¥69 million. The amount of provision for policy reserves-ceded that is added to the calculation of reversal of policy reserves for the fiscal year ended March 31, 2025, was ¥545,425 million.

8. Net income per share was ¥324.19.

The Company has established a Board Benefit Trust (BBT). Shares of the Company held in trust, which were recorded as treasury stock under the category of shareholders' equity, were included in treasury stock to be deducted from the calculation of the average number of shares during the fiscal year, for the purpose of calculating net income per share.

Average number of treasury stock during the fiscal year which was deducted from the calculation of net income per share for the fiscal year ended March 31, 2025, was 401 thousand shares.

10. Insurance claims based on reinsurance contracts with the Management Network included in insurance claims for the fiscal year ended March 31, 2025, were ¥2,065,061 million.

11. Provision for reserve for policyholder dividends, which is provided for the Management Network based on gains or losses and others arising in the category of the reinsurance due to the reinsurance contracts with the Management Network, was ¥86,029 million for the fiscal year ended March 31, 2025.

12. Transactions of the Company with related parties are as follows:

(1) Parent company, major shareholders (limited only to companies), and others

Type	Company name	Percentage of voting rights	Relationship	Transaction	Transaction amount	Account	Year-end balance
Parent company	Japan Post Holdings Co., Ltd.	Directly owned 49.85%	Group management Interlocking officers	Payment of brand royalty fees (*)	¥1,951 million	Accounts Payable	¥178 million

Conditions of transactions and policies to decide the conditions

(\*) Based on the concept that the benefits of brand value enjoyed by the Company from maintaining its membership in Japan Post Group is reflected on the Company's performance, brand royalty fees are calculated by multiplying the amount of insurance policies in force as of the end of the previous fiscal year, which is a financial indicator whereupon such benefits have been reflected, by a fixed rate.

(2) Companies, etc. sharing the same parent company and subsidiaries, etc. of other related companies

Type	Company name	Percentage of voting rights	Relationship	Transaction	Transaction amount	Account	Year-end balance
Subsidiary of parent company	Japan Post Co., Ltd.	None	Insurance agency Interlocking officers	Payments for commission of agency services (*1)	¥111,436 million	Agency accounts payable	¥9,916 million

Conditions of transactions and policies to decide the conditions

(\*1) The Company makes payments including commission of insurance solicitation calculated by multiplying the insurance amounts and insurance premiums of each contract by commission rates set for each class of insurance, and commission of maintenance and collection calculated by multiplying unit prices set for each type of outsourcing services, such as collection of insurance premiums and payments for insurance money, by the number of policies in force.

(\*2) In addition to the above, from the fiscal year ended March 31, 2020, out of the expenses required for the maintenance of the post office network, the expenses necessary to ensure universal service will be covered by the funds provided to Japan Post Co., Ltd. from the Management Network using the contributions from the Company and JAPAN POST BANK Co., Ltd. as funds, with the exception of the amount to be borne by Japan Post Co., Ltd., in accordance with the Act on Organization for Postal Savings, Postal Life Insurance and Post Office Network. In the fiscal year ended March 31, 2025, the contributions paid by the Company to the Management Network amounted to ¥56,300 million.

## NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS AS OF AND FOR THE FISCAL YEAR ENDED MARCH 31, 2025

### (Basis for Preparation of the Unaudited Consolidated Financial Statements)

#### 1. Scope of Consolidation

- (1) Number of consolidated subsidiaries: 1

Name of consolidated subsidiary: JAPAN POST INSURANCE SYSTEM SOLUTIONS Co., Ltd.

- (2) Major non-consolidated subsidiaries

The Company's major non-consolidated subsidiaries are Japan Post Insurance NEXT Partners Co., Ltd. and Spring Investment Limited Partnership.

Major non-consolidated subsidiaries are small in terms of total assets, ordinary income, net income or loss (an amount corresponding to ownership), retained earnings (an amount corresponding to ownership), cash flows, and other items. They are excluded from the scope of consolidation as they are not significant enough to interfere with rational judgement regarding the corporate group's financial conditions, business performance, and cash flows.

#### 2. Application of the Equity Method

- (1) Number of non-consolidated subsidiaries and affiliates accounted for under the equity method: 0

- (2) Number of affiliates accounted for under the equity method: 1

Company name: Daiwa Asset Management Co. Ltd.

Daiwa Asset Management Co., Ltd. has been included in the scope of application of the equity method from the fiscal year ended March 31, 2025, due to the acquisition of shares.

- (3) Non-consolidated subsidiaries (Japan Post Insurance NEXT Partners Co., Ltd., Spring Investment Limited Partnership and others) and affiliates (Japan Post Investment Corporation, MKAM Co., Ltd. and others) not accounted for under the equity method have been excluded from the scope of application of the equity method, as they are insignificant as a whole, with minimal influence on the consolidated financial statements, in terms of net income or loss (an amount corresponding to ownership), retained earnings (an amount corresponding to ownership) and other items.

#### 3. Fiscal Year-end Date of the Consolidated Subsidiary

The consolidated subsidiary has the same fiscal year-end date as that of consolidated financial statements.

### (Notes to the Unaudited Consolidated Balance Sheets)

#### 1. Significant Accounting Policies

- (1) Valuation Criteria and Methods for Securities

Securities including cash and deposits as well as monetary claims bought which are equivalent to securities, and securities invested in money held in trust, are recorded based on the following:

- 1) Held-to-maturity Bonds

Held-to-maturity bonds are carried at amortized cost and the cost of these securities sold is calculated using the moving-average method. Amortization is calculated using the straight-line method.

- 2) Policy-reserve-matching Bonds

In accordance with "Temporary Treatment of Accounting and Auditing Concerning Policy-reserve-matching Bonds in the Insurance Industry" (JICPA Industry Audit Committee Report No. 21), policy-reserve-matching bonds are carried at amortized cost and the cost of these securities sold is calculated using the moving-average method. Amortization is calculated using the straight-line method.

- 3) Stocks of subsidiaries and affiliates that are neither consolidated nor accounted for under the equity method

Stocks of subsidiaries and affiliates that are neither consolidated nor accounted for under the equity method are carried at cost using the moving-average method.

- 4) Available-for-sale Securities

- (i) Available-for-sale Securities other than stocks, etc. with no market price

Available-for-sale securities other than stocks, etc. with no market price are carried at their market price at the end of the fiscal year. Cost of securities sold is calculated using the moving-average method.

- (ii) Stocks, etc. with no market price

Stocks, etc. with no market price are carried at cost using the moving-average method.

Net unrealized gains (losses) on available-for-sale securities, net of income taxes, are included in net assets.

- (2) Valuation Criteria and Methods for Derivative Transactions  
All derivative transactions are valued at fair value.
- (3) Depreciation Methods for Significant Depreciable Assets
  - 1) Tangible Fixed Assets (excluding leased assets)  
Depreciation of tangible fixed assets is calculated using the straight-line method based on the following useful lives:
    - (i) Buildings: 2-60 years
    - (ii) Other tangible fixed assets: 2-20 years
  - 2) Intangible Fixed Assets (excluding leased assets)  
The capitalized development costs of software intended for internal use are amortized over the expected useful life of mainly 5 years using the straight-line method.
  - 3) Leased Assets  
Finance lease transactions that do not transfer ownership are depreciated to a residual value of zero using the straight-line method over the lease term.
- (4) Recognition of Significant Reserves
  - 1) Reserve for Possible Loan Losses  
Reserve for possible loan losses is provided pursuant to the Company's standards for self-assessment of asset quality, and general allowance is provided using a rate based on historical collectability experience. In addition, specific allowances, which are determined based on individual collectability of accounts, are also recorded.  
All loans and claims are assessed initially by the relevant departments based on internal rules for self-assessment of asset quality. The asset evaluation department, which is independent from the relevant departments, reviews these self-assessments. The above reserves and allowances are recorded based on the results of these assessments.  
For loans and guaranteed loans that were extended to borrowers that have filed for bankruptcy including legal bankruptcy or civil rehabilitation, or that are considered substantially bankrupt, an allowance is provided for in the amount of loans, net of collateral value or the amounts expected to be recoverable under guarantees. Reserve for possible loan losses also includes amounts set aside for other assets subject to valuation allowance. The amount written off for loans and other assets during the fiscal year ended March 31, 2025, was ¥44 million.
  - 2) Reserve for Management Bonuses  
To provide for the payment of bonuses to Executive Officers of the Company, a reserve for management bonuses is provided based on the projected amount of bonuses to be paid.
  - 3) Reserve for Management Board Benefit Trust  
To provide for the granting of shares of the Company to Executive Officers of the Company in accordance with the Stock Benefit Rules, a reserve for management board benefit trust is provided in the projected amount of stock benefit obligations.
- (5) Employees' Retirement Benefits Accounting
  - 1) Method for Attributing Expected Benefits to Periods  
In calculating the projected benefit obligation, the benefit formula basis is used to attribute the expected benefit to respective service period.
  - 2) Method for Recognizing Actuarial Differences and Prior Service Cost  
The actuarial difference is amortized using the straight-line method over a period of 14 years, which is less than the estimated average remaining service period for employees from the fiscal year following the respective fiscal year in which the difference is incurred.  
Prior service cost is amortized using the straight-line method over a period of 14 years, which is less than the estimated average remaining service lives for employees in the fiscal year of incurrence.
- (6) Reserve for Price Fluctuations  
Reserve for price fluctuations in security investments is calculated based on Article 115 of the Insurance Business Act.
- (7) Translation of Significant Assets and Liabilities Denominated in Foreign Currencies  
Assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rates prevailing at the fiscal year-end.

## Significant Hedge Accounting

### 1) Methods for Hedge Accounting

The Company and its subsidiary (the “Group”) applies deferred hedge accounting through currency swaps to hedge cash flow related to foreign exchange fluctuations for a portion of its foreign-currency-denominated bonds, and fair value hedge accounting for foreign currency exchange contracts to hedge foreign exchange fluctuation risk for a portion of its foreign-currency-denominated bonds in accordance with the Financial Instruments Accounting Standard, and also applies deferred hedge accounting through interest rate swaps to hedge interest rate risk for a portion of its insurance liabilities in accordance with the “Accounting and Auditing Treatment on the Application of the Financial Instruments Accounting Standard to the Insurance Industry” (JICPA Industry Committee Practical Guidelines No. 26).

### 2) Hedging Instruments and Hedged Items

(Hedging Instruments)	(Hedged Items)
Currency swaps	Foreign-currency-denominated bonds
Foreign currency exchange contracts	Foreign-currency-denominated bonds
Interest rate swaps	Insurance liabilities

### 3) Hedging Policies

Foreign currency exchange contracts are used to hedge foreign currency exchange risks of foreign-currency-denominated bonds within a predetermined range, while interest rate swap contracts are used to hedge interest rate risks of insurance liabilities within a predetermined range.

### 4) Assessment of Hedge Effectiveness

Hedge effectiveness is assessed primarily by ratio analysis which compares market fluctuations of hedged items and hedging instruments. The evaluation of hedge effectiveness is omitted in cases of foreign exchange contracts where there is a high correlation between hedged items and hedging instruments.

## (8) Policy Reserves

To prepare for the fulfilment of future obligations under the insurance contracts with respect to policies that have commenced as of the fiscal year-end, policy reserves are calculated in accordance with the statement of calculation procedures for insurance premiums and policy reserves (Article 4, Paragraph 2, Item 4 of the Insurance Business Act) and accumulated, pursuant to Article 116, Paragraph 1 of the Insurance Business Act.

Among the policy reserves, insurance premium reserves are calculated based on the following procedures. The amount includes additional policy reserves accumulated for the portion of the reinsurance contracts issued to the Management Network and for lump-sum payment annuities, pursuant to Article 69, Paragraph 5 of the Ordinance for Enforcement of the Insurance Business Act.

- 1) Reserves for contracts subject to the standard policy reserves are calculated in accordance with the method prescribed by the Commissioner for Financial Services Agency (Public Notice No. 48 issued by the Ministry of Finance in 1996).
- 2) Reserves for other contracts are calculated based on the net level premium method.

In the fiscal year ended March 31, 2025, the Company accumulated additional policy reserves for the portion of reinsurance from the Management Network pursuant to Article 69, Paragraph 5 of the Ordinance for Enforcement of the Insurance Business Act. The amount of reserves accumulated totaled ¥598,226 million. However, as the same amount was reversed from the contingency reserve, there was no impact on ordinary profit or income before income taxes.

Among the policy reserves, contingency reserves are accumulated to ensure the fulfilment of future obligations under insurance contracts in preparation of possible future risks, pursuant to Article 116 of the Insurance Business Act and Article 69, Paragraph 1, Item 3 of the Ordinance for Enforcement of the Insurance Business Act.

The Chief Actuary, pursuant to Article 121, Paragraph 1 of the Insurance Business Act and Article 80 of the Ordinance for Enforcement of the Insurance Business Act, confirms whether the policy reserves as of the fiscal year-end have been appropriately accumulated.

## 2. Unadopted Accounting Standards, etc.

- “Accounting Standard for Leases” (ASBJ Statement No. 34, September 13, 2024)
- “Implementation Guidance on Accounting Standards for Leases” (ASBJ Guidance No. 33, September 13, 2024)

### (1) Outline

As with international accounting standards, the new standard requires lessees to record all leases as assets and liabilities.

### (2) Scheduled Date of Adoption

Scheduled to be adopted from the beginning of the fiscal year ending March 31, 2028.

### (3) Effects of the application of the accounting standard, etc.

The impact of the adoption of the above accounting standards, etc. is under assessment.

## 3. Transactions for Granting Shares and Others of the Company to Executive Officers of the Company through Trust

The Company has introduced a trust-based performance-linked stock compensation system and a non-performance-linked stock compensation system for Executive Officers of the Company.

The Company has adopted the “Practical Solution on Transactions of Delivering the Company’s Own Stock to Employees etc. through Trusts” (Practical Issues Task Force (“PITF”) No. 30, March 26, 2015) with respect to the accounting treatment of the aforementioned trust agreement.

### (1) Outline of the Transaction

In accordance with the predetermined Stock Benefit Rules, the Company shall grant its Executive Officers points pursuant to 1) and 2) below, and after the time of their retirement shall have the Board Benefit Trust (BBT) grant Executive Officers who meet the requirement for eligibility a number of shares of the Company equivalent to the number of such points accumulated up to their retirement, as well as the amount of money equivalent to a certain portion of such number of shares, as calculated by the fair value.

#### 1) Performance-linked stock compensation system

After the end of the last fiscal year of the Medium-Term Management Plan, Executive Officers will be granted points based on basic points for their corresponding responsibilities, multiplied by a variable payout rate arrived at based on the degree to which they have met the performance targets in the Medium-Term Management Plan.

#### 2) Non-performance-linked stock compensation system

After the end of each fiscal year, Executive Officers will be granted basic points based on their corresponding responsibilities.

Shares to be granted to Executive Officers, including the portion of shares to be granted in the future, are managed separately as trust assets through purchases by the trust bank from the stock market using the fund held in trust in advance by the Company.

### (2) Shares of the Company Held in Trust

Shares of the Company held in trust are recorded as treasury stock under the category of net assets at book value in the Trust (excluding accompanying expenses). Book value of such treasury stock at the end of the fiscal year ended March 31, 2025, was ¥877 million, while the number of such treasury stock was 394 thousand shares.

## 4. Matters Regarding Financial Instruments were as follows:

### (1) Matters Regarding Status of Financial Instruments

#### 1) Policy for handling financial instruments

The Company promotes matching between assets and liabilities using yen-denominated interest-bearing assets, taking into consideration the characteristics of liabilities so as to maintain sound management and ensure payments for insurance claims and others. The Company endeavors to invest in yen-denominated bonds such as Japanese local government bonds and Japanese corporate bonds, of which yield is expected to be relatively higher than that of Japanese government bonds, as well as in “return-seeking assets” (which we previously referred to as “risk assets”) including foreign bonds and stocks from the perspective of improving profitability as well as to strengthen the risk management system.

Derivative transactions are used mainly as a hedging method against foreign exchange fluctuation risk to our investment assets.

## 2) Features and risks of financial instruments

Financial assets owned by the Company consist mainly of securities and loans, and are managed by using an asset liability management (ALM) framework. Such securities are exposed to the credit risk of their issuing bodies as well as market price fluctuation risk and interest rate risk. In addition, foreign-currency-denominated bonds are exposed to the foreign exchange risk.

Derivative transactions which the Company uses are mainly foreign exchange contracts. Derivative transactions are identified as a key hedging method against foreign exchange fluctuation risk. Other derivative transactions are used mainly for the purpose of hedging, and the market-related risk of derivative transactions is therefore reduced and limited.

As a hedging method against interest rate fluctuation risk for a portion of insurance liabilities, interest rate swap transactions are used in accordance with the “Accounting and Auditing Treatment on the Application of the Financial Instruments Accounting Standard to the Insurance Industry” (JICPA Industry Committee Practical Guidelines No. 26).

## 3) Risk management framework for financial instruments

### (i) Management of market risk

Market risk is the risk of losses resulting from fluctuation in the value of assets and liabilities held that include off-balance sheet assets and liabilities due to fluctuations in various market risk factors such as interest rates, foreign exchange rates, and stock prices. Market risk is categorized into interest rate risk and market price fluctuation risk for its management. Interest rate risk is the risk of losses resulting from fluctuation in the value of interest-bearing assets denominated in yen and insurance liabilities due to fluctuations in yen interest rates, and the risk arises as the Company has a certain limit in matching assets with liabilities, as an insurance company with a mission to offer universal service products including endowment insurance and whole life insurance. Market price fluctuation risk is any market risk other than interest rate risk.

Among the company-wide risks including the market risk, the Company identifies those that can be quantified and manages the company-wide risks by comparing the capital amount and the company-wide integrated risk amount calculated based on the amount of quantified risks.

### (ii) Management of credit risk

Credit risk is the risk of losses resulting from a decline or elimination in the value of assets including off-balance sheet assets due to deterioration in financial conditions of borrowers and other reasons.

In order to control investment and lending to borrowers with high credit risk, the Company manages its investment and lending by prescribing credit eligibility rules based on internal rating. Moreover, to prevent concentration of credit risk on a particular borrower, group or industry, the Company establishes credit limits corresponding to internal rating and standards of credit shares by industry.

The results of their activities are reported to the risk management committee regularly.

## 4) Additional notes concerning the fair value of financial instruments

The fair value of a financial instrument includes prices based on market quotations as well as rationally calculated prices for those whose market prices are not readily available. In calculating prices, certain premises and assumptions are adopted, and the use of different assumptions may lead to changes in pricing.

The contract amounts of derivative transactions in “(6) Derivative Transactions” do not indicate the market risk related to derivative transactions.

(2) Fair Values of Financial Instruments

Amounts carried on the consolidated balance sheets, fair values and the difference between them as of March 31, 2025, were as follows.

Stocks, etc. with no market price and investments in partnership are not included in the following table and are described in the “Note 1” to the table. In addition, cash, as well as deposits, call loans, receivables under resale agreements, and payables under repurchase agreements, whose fair value approximates book value because they are settled within a short term, have been omitted from the Notes.

(3) Breakdown, etc. of the fair value of financial instruments by level

The Company has classified the fair values of financial instruments into the following three levels according to the observability and materiality of the inputs used for fair value measurement.

- Level 1 Fair Values: Fair values measured using observable inputs that are quoted prices for identified assets or liabilities in active markets
- Level 2 Fair Values: Fair values measured using observable inputs other than those included within Level 1
- Level 3 Fair Values: Fair values measured using unobservable inputs

In cases where multiple inputs with a material impact on fair value measurement are used, fair value is classified into the level to which the input with the lowest priority in fair value measurement belongs.

Total liabilities	-	477,490	-	477,490

Note 1: Calculation methods for fair values of financial instruments and explanation of inputs used in fair value measurement

Assets
Monetary claims bought

The fair value of monetary claims bought that are securitized instruments is based on the appraised values submitted by brokers and other third parties. For monetary claims bought that are not securitized instruments, book value is used as their fair value as they are settled within a short term and their fair value approximates book value.

Among monetary claims bought, securitized instruments are classed in Level 3, and all others are classed in Level 2.

Money held in trust

Among trust asset components that are securities, the fair value of stocks and mutual funds with a transaction price on the market is based on the price quoted by the exchange for shares, and they are classed in Level 1 based on market activity. In addition, for mutual funds with no transaction price on the market, in cases where there are no material restrictions that would require market participants to compensate for the risk associated with cancellation or repurchase requests, the net asset value is used as the fair value and they are classed in Level 2.

For trust asset components that are not securities, book value is used as fair value as their fair value approximates book value, and they are classed in Level 2.

Moreover, money held in trust is described in “(5) Money Held in Trust” in accordance with the purpose of the holdings.

Securities

The fair value of stocks is based on the price quoted by the exchange and classed in Level 1, based on the activeness of the market.

Among bonds and other securities, primarily, the fair value of Japanese government bonds is based on the published quoted price and classed in Level 1 based on the activeness of the market. Even if there is a published quoted price, in cases such as when the market is not active or if it is based on appraised values obtained from information vendors and other third parties (excluding cases where material, unobservable inputs are used), fair value is classed in Level 2. This includes Japanese local government bonds, Japanese corporate bonds, and foreign bonds.

If it is calculated with appraised values obtained from brokers and other third parties, and material, unobservable inputs are used, fair value is classed in Level 3. In addition, for mutual funds with no transaction price on the market, in cases where there are no material restrictions that would require market participants to compensate for the risk associated with cancellation or repurchase requests, the net asset value is used as the fair value and they are classed in Level 2.

Moreover, securities are described in “(4) Securities” in accordance with the purpose of the holdings.

#### Loans

For policy loans and those included in loans to the Management Network of Postal Life Insurance Contracts, book values are used as fair values because amounts are limited to the values of corresponding cash surrender value and their fair value approximates book value considering their short maturities and interest conditions. For industrial and commercial loans with floating interest rates, whose future cash flows follow market interest rates, book value is used as fair value as their fair value approximates book value.

For industrial and commercial loans with fixed interest rates or loans to the Management Network (excluding policy loans), fair value is based on a net discounted present value of future cash flows at an interest rate that is the market interest rate as of the valuation date to which certain adjustments have been made.

The fair value of loans is classed in Level 3.

#### Liabilities

##### Bonds payable

The published quoted prices are used as fair value for bonds issued by the Company, which is classed in Level 2.

##### Derivative transactions

There are no published quoted prices for derivative transactions as they are over-the-counter transactions. The fair values of interest rate swap and forward foreign exchange transactions are classed in Level 2 if they are based on appraised values obtained from information vendors and other third parties (excluding cases where material, unobservable inputs are used), or if they are calculated with observable inputs, such as exchange rates.

Note 2: Information regarding the fair value of financial instruments carried at fair value in the consolidated balance sheets that is classed in Level 3

(\*) Included in “Net unrealized gains (losses) on available-for-sale securities” of “Other comprehensive income (loss)” in the consolidated statements of comprehensive income.

3) Explanation of fair value valuation process

The Company’s fair value valuation department establishes policies and procedures for the measurement of fair value, conducts the calculations, and determines the classification of fair value level. Because the risk management department establishes procedures for the verification of fair value of financial instruments and, in cases where quoted prices obtained from third parties are used, verifies the validity of those prices via appropriate means, such as confirming the valuation methods and inputs used and comparing them with the fair value of similar financial instruments, the appropriateness of fair value valuation, etc. of financial instruments is ensured.

4) Explanation of impact on fair value of changes to material, unobservable inputs

Not provided, as the Company itself does not estimate unobservable inputs.

5. The consolidated balance sheet amount, fair value and the outline of the risk management policy of policy-reserve-matching bonds were as follows:

(1) The consolidated balance sheet amount and fair value of policy-reserve-matching bonds amount to ¥7,243,771 million and ¥6,522,343 million, respectively.

(2) The outline of the risk management policy of policy-reserve-matching bonds is as follows:

The Company categorizes its insurance products into the following sub-groups based on the attributes of each product in order to manage risks arising from fluctuations in interest rates of assets and liabilities, and adopts a management policy whereby the duration gap between policy-reserve-matching bonds and policy reserves by sub-groups are reconciled within a certain range and the duration gap is periodically checked.

1) Postal Life Insurance Contracts (excluding some insurance types)

2) Japan Post Insurance life insurance contracts (general) (all insurance policies)

3) Japan Post Insurance life insurance contracts (lump-sum payment) (excluding some insurance types)

From the fiscal year ended March 31, 2025, lump-sum payment whole life insurance has been added to the sub-group of Japan Post Insurance life insurance contracts (lump-sum payment). This change has no impact on profit and loss.

6. Securities lent under lending agreements in the amount of ¥1,390,979 million were included in “Securities” in the consolidated balance sheets as of March 31, 2025.

7. There were no bankrupt loans or quasi-bankrupt loans, doubtful loans, past due loans for three months or more, or restructured loans as of March 31, 2025.

Definitions for each of the respective loans are as follows:

Bankrupt or quasi-bankrupt loans are loans to borrowers who have fallen into bankruptcy for reasons such as the commencement of bankruptcy proceedings or reorganization proceedings, or the petition for commencement of rehabilitation proceedings, and loans similar to these.

Doubtful loans are loans to borrowers who are yet to have fallen into bankruptcy, but from whom the collection of principal and receipt of interest as committed under an agreement is unlikely to be achieved, due to the borrower's deteriorating financial conditions and business performance. This category excludes loans classified as bankrupt loans or quasi-bankrupt loans and doubtful loans.

Past due loans for three months or more are loans for which principal or interest payments are delinquent for three months or more under the term of the loans from the day following the contractual due date, excluding those classified as bankrupt loans or quasi-bankrupt loans.

Restructured loans are loans for which certain concessions favorable to borrowers, such as interest reduction or exemption, postponement of principal or interest payments, debt waiver or other arrangements, have been made for the purpose of assisting and supporting the borrowers in the restructuring of their business. This category excludes loans classified as bankrupt loans or quasi-bankrupt loans, doubtful loans and past due loans for three months or more.

### 1. Significant Accounting Policies

#### (1) Recognition of insurance premiums and others

##### 1) Insurance premiums

The first premium is recognized for premiums that have been collected and for which the policy has commenced, in the amount collected. Premiums thereafter are recognized in the amount of each collection.

Portions of collected insurance premiums corresponding to the unearned period as of the fiscal year-end are accumulated as policy reserves, pursuant to Article 116 of the Insurance Business Act and Article 69, Paragraph 1, Item 2 of the Ordinance for Enforcement of the Insurance Business Act.

##### 2) Reinsurance income

Of the amounts that are paid as insurance claims pertaining to original insurance contracts in accordance with reinsurance contracts, the portions that correspond to reinsurance are recorded as reinsurance income at the time of payment of these insurance claims.

#### (2) Recognition of insurance claims and others

##### 1) Insurance claims and others (excluding reinsurance premiums)

When an insured event occurs and payment is made in the amount calculated based on the insurance contract, insurance claims and others (excluding reinsurance premiums) are recognized in the amount of such payment.

Reserve for outstanding claims has been accumulated for insurance claims, etc. for which payment is due but has not been paid at the fiscal year-end, or insurance claims, etc. for which the occurrence of the insured event has not been reported but the Company deems that the insured event provided in the insurance contract has occurred, pursuant to Article 117 of the Insurance Business Act and Article 72 of the Ordinance for Enforcement of the Insurance Business Act.

##### 2) Reinsurance premiums

Reinsurance premiums that have been agreed on based on reinsurance contracts are recorded when the said reinsurance contracts are concluded or when insurance premiums corresponding to original insurance contracts are collected, etc.

Some of the policy reserves and reserves for outstanding claims that correspond to reinsurance are not set aside pursuant to Article 71, Paragraph 1 and Article 73, Paragraph 3 of the Ordinance for Enforcement of the Insurance Business Act.

- Notes:
1. Bankrupt or quasi-bankrupt loans are loans to borrowers who have fallen into bankruptcy for reasons such as the commencement of bankruptcy proceedings or reorganization proceedings, or the petition for commencement of rehabilitation proceedings, and loans similar to these.
  2. Doubtful loans are loans which principal and interest are unlikely to be collected or received as stipulated in an agreement due to the borrower's deteriorating financial conditions and results even though the borrower is not fallen into bankruptcy (excluding the loans noted in 1).
  3. Past due loans for three months or more are loans for which principal or interest payments are delinquent for three months or more under the term of the loans from the day following the contractual due date (excluding the loans noted in 1 and 2).
  4. Restructured loans are loans for which certain concessions favorable to borrowers, such as interest reduction or exemption, postponement of principal or interest payments, debt waiver or other arrangements, have been made for the purpose of assisting and supporting the borrowers in the restructuring of their business (excluding the loans noted in 1 to 3).
  5. Normal loans are loans which do not fall under the loans noted in 1 to 4 above as there are no particular problems found with the borrower's financial conditions and results.
