New Headquarters Factory

- Flagship factory that will be the key to achieving consolidated net sales of ¥50 billion -

SHOFU INC. announces that it has started construction of a new plant at its head office in Kyoto.

Under the ongoing Fifth Medium-Term Management Plan, we have set a target of achieving consolidated net sales of ¥50 billion in the fiscal year ending March 31, 2028, the final fiscal year of the plan, and have made the strengthening of supply capacity an urgent task. On this occasion, the Company has decided to construct a new plant on a site at its head office as part of efforts to strengthen its supply system in response to increasing global demand. At the new plant, we plan to manufacture chemical products such as dental filling and restorative materials and hard resins for crowns, and by improving production efficiency

through the introduction of large-scale equipment, automation of manufacturing processes, and adoption of digital transformation at various parts of the production process it will be possible to increase production capacity by more than three times the current level. In addition, to providing a meticulously clean environment to improve quality, the factory will expand its shipping and receiving space to increase work efficiency and safety, and will be positioned as the Group's flagship factory that combines facilities and the environment to meet global demand.

By strengthening the supply structure, we will lead to market share expansion in Japan and overseas markets and contribute to global dental care.
