(Note) Nippon Express Co., Ltd. intends to change our fiscal year from March 31 to December 31, beginning with fiscal year ending December 31, 2021. With this change, the Nippon Express Group will have a unified December 31 fiscal year end. The first quarter of the previous consolidated fiscal year reflects profit and loss results from April 1, 2020 to June 30, 2020, for the company and consolidated subsidiaries with a March fiscal year end. We had consolidated profit and loss results for the period from January 1, 2020 to March 31, 2020, for consolidated subsidiaries with December fiscal year ends. However, for the first quarter of the current consolidated fiscal year, we have consolidated profit and loss results for the period from April 1, 2021 to June 30, 2021, for the company and all consolidated subsidiaries. We adjusted retained earnings to reflect the profit and loss results for the period from January 1, 2021 to March 31, 2021, for those consolidated subsidiaries with December fiscal year ends. As a result, percentage changes compared to the same period of the previous year are not stated herein.

## 1. Qualitative Information on Quarterly Financial Results

### (1) Explanation of Business Results

The global economy showed signs of improvement during the first quarter of the current consolidated fiscal year, as the major economies, including Japan, made progress in vaccinations leading to the resumption of economic activities. Governmental financial support in these countries also helped reduce the economic impact of COVID-19 infections. However, the economic impact of COVID-19 remained strong in many emerging and developing economies. With the addition of rising global inflation, the future of the economy remained uncertain.

Under these economic conditions, the resumption of production and sales activities in major countries drove an ongoing recovery in cargo movement in the logistics industry, which had fallen sharply. However, the Japanese logistics industry lacked strength overall, despite firm conditions for certain commercial products, including automobile-related, chemical non-ferrous metals, production machinery, and electrical machinery. Expansion in the U.S. and China are driving international trade. However, we continue to pay close attention to the trending shortages of transportation space due to the reductions or suspensions of flights, as well as the decrease in ocean transportation volume due to the global shortage of marine containers that has been ongoing since last year.

Given this business environment, Nippon Express Group business results for the first quarter of the current consolidated fiscal year were generally favorable across all segments. These results were due to growth in demand for international freight, mainly in air cargo.

As a result, the group posted revenues of ¥545.0 billion, operating income of ¥20.1 billion, ordinary income of ¥23.4 billion, and profit attributable to owners of parent of ¥15.2 billion.

Our adoption of Accounting Standard for Revenue Recognition (Accounting Standards Board of Japan (“ASBJ”) Statement No. 29, March 31, 2020) resulted in a decrease of ¥17.8 billion in revenues. However, the impact on operating income, ordinary income, and profit attributable to owners of the parent was minimal.

### (2) Explanation of Financial Position

Total assets as of the end of the consolidated first quarter amounted to ¥1,591.8 billion, a decrease of ¥39.9 billion, or 2.4%, compared to the end of the previous consolidated fiscal year.

Current assets amounted to ¥689.0 billion, a decrease of ¥82.8 billion, or 10.7%, from the end of the previous fiscal year. Non-current assets totaled ¥902.8 billion, an increase of ¥42.9 billion, or 5.0%, from the end of the previous fiscal year.

The main reason for the decrease in current assets was a decrease in short-term loans receivable related to the absorption-type split of our leasing business.

The increase in non-current assets was mainly attributable to an increase in tangible lease assets.

Current liabilities amounted to ¥422.9 billion, a decrease of ¥92.5 billion, or 17.9%, compared to the end of the previous consolidated fiscal year. Non-current liabilities amounted to ¥548.5 billion, an increase of ¥32.9 billion, or 6.4%.

The decrease in current liabilities was mainly attributable to a decrease in short-term loans payable and commercial paper.

The increase in non-current liabilities was mainly attributable to an increase in long-term lease obligations.

Net assets as of the end of the consolidated first quarter amounted to ¥620.3 billion, an increase of ¥19.6 billion, or 3.3%, compared to the end of the previous consolidated fiscal year.

### (3) Explanation of Consolidated Financial Results Forecasts and Other Forward-looking Information

2) Reasons for Revision of Financial Results Forecasts

We have made an upward revision to our consolidated and non-consolidated revenue forecasts for the first half and full year, as we expect revenues to be higher than announced previously. This upward revision is mainly due to growth in demand for international freight volume.

We revised our forecasts for non-consolidated operating income, ordinary income, quarterly net income and net income downward, as we expect these results to be lower than announced previously. This downward revision is mainly due to an increase in transportation expenses and fuel expenses. Meanwhile, we have left forecasts for consolidated operating income, ordinary income, profit attributable to owners of the parent company, and net income unchanged, we expect the performance of overseas subsidiaries to exceed the previous forecast due to growth in international freight volume.

The impact of the spread of COVID-19 on Nippon Express Group businesses should be limited, as indicated in our prior announcement.

We have not reflected lockdowns or other large-scale social restrictions due to the spread of COVID-19 in our forecasts.

**\*Note Regarding Financial Results Forecasts**

Results forecasts and other forward-looking statements in this document have been prepared according to judgments based on information available at the time. These statements contain elements of risk and uncertainties. Accordingly, results may differ from forecasts.

### (3) Notes to Consolidated Financial Statements

(Notes Regarding Going Concern Assumption)

Not applicable.

(Notes on Significant Changes in Shareholders' Equity)

Not applicable.

(Application of Special Accounting Treatments for Quarterly Consolidated Financial Statements)

(Calculation of Tax Expenses)

Tax expenses are calculated by reasonably estimating the effective tax rate following application of tax effect accounting to profit before income taxes for the consolidated fiscal year, which includes the first quarter ended June 30, 2021, and multiplying profit before income taxes by said estimated effective tax rate.

(Additional Information)

(Matters related to change in scope of consolidation)

Effective as of the current consolidated fiscal year, the company and consolidated subsidiaries having March fiscal year ends will change their respective fiscal year ends from March 31 to December 31. At the same time, we will change our consolidated fiscal year end from March 31 to December 31. The main objectives of this change are to improve management transparency through timely and accurate disclosure of management information and to facilitate comparisons with overseas competitors. The current consolidated fiscal year, which is the transitional period for the change in fiscal year, will be the nine-month period from April 1, 2021 to December 31, 2021.

As a result of this change, we adjusted retained earnings to reflect the profit and loss results for the three-month period from January 1, 2021 to March 31, 2021, for those consolidated subsidiaries with December fiscal year ends.

(Changes in Accounting Policies)

(Changes in important hedge accounting methods)

In the past, we adopted the allocation method for foreign exchange forward contracts related to monetary receivables and payables denominated in foreign currencies. However, having reviewed our system of management related to the assessment of foreign exchange risk and foreign exchange forward contracts, we have changed to valuing foreign exchange forward contracts (a hedging instrument) at fair value beginning with the first quarter of the current consolidated fiscal year. The objective of this change is to more reflect the status of monetary receivables and payables denominated in foreign currencies and derivative transactions more appropriate on our consolidated financial statements.

The impact of this change in accounting policy on profit and loss, financial position, and per share information after retrospective application was minimal.

(Adoption of fair value measurement accounting standard)

We adopted Accounting Standard for Fair Value Measurement (ASBJ Statement No.30, July 4, 2019) ("Fair Value Measurement Standard," below) as of the beginning of the first quarter of the current consolidated fiscal year. In accordance with the transitional treatment provided in Paragraph 19 of the Fair Value Measurement Standard and Paragraph 44-2 of the Accounting Standard for Financial Instruments (ASBJ Statement No. 10,

July 4, 2019), we will apply the new accounting policy provided in Fair Value Measurement Standard prospectively. The application of this accounting standard will have no impact on quarterly consolidated financial statements.

(Adoption of revenue recognition accounting standard)

At the beginning of the current consolidated first quarter, we adopted Accounting Standard for Revenue Recognition (ASBJ Statement No.29, March 31, 2020) ("Revenue Recognition Standard," below). With the adoption of this standard, the company now recognizes revenue when the control of promised goods or services is transferred to the customer in the amount expected to be received in exchange for said goods or services.

The major changes associated with the adoption of the Revenue Recognition Standard will be as follows.

(1) Revenue recognition for agent transactions

We previously recognized revenue mainly related to logistics finance transactions on a gross basis. However, having determined the roles (principal versus agent) in providing goods and services to customers, we have changed our revenue recognition method to a net basis.

(2) Revenue recognition for amounts to be collected for third parties

The Nippon Express Group previously recognized revenue for the sale of light oil based on the total amount received from customers, including the light oil excise tax. However, since our customers are the parties to pay the light oil excise tax, and the Nippon Express Group is deemed to be collecting the tax on behalf of third parties, we have changed our revenue recognition method to recognizing the amount received from customers less the light oil excise tax.

(3) Performance obligations to be fulfilled over a defined period of time

We previously recognized revenue from international ocean transportation and other transactions on a shipment basis. However, having determined that the control over goods or services will be transferred to the customer over a defined period of time, we have changed our revenue recognition method that reflects the estimated period of the satisfaction of our performance obligation, recognizing revenue based on said period.

In adopting the change in question, the company follows the transitional treatment as prescribed in the proviso of Paragraph 84 of the Revenue Recognition Standard. The cumulative effect of applying the new accounting policy retrospectively for periods prior to the beginning of the first quarter of the current consolidated fiscal year has been added to or deducted from retained earnings at the beginning of the first quarter of the current consolidated fiscal year, and the new accounting policy has been applied beginning with the relevant beginning balance. However, we applied the method as prescribed in Paragraph 86 of the Revenue Recognition Standard, and we have not applied the new accounting policy retrospectively to contracts in which almost all revenue amounts were recognized in accordance with the previous treatment prior to the beginning of the first quarter of the current consolidated fiscal year. In addition, we applied the proviso of Paragraph 86 (1) of the Revenue Recognition Standard, accounting for contract changes made prior to the beginning of the first quarter of the current consolidated fiscal year based on contract terms reflecting all changes, adding or subtracting the cumulative effect of such changes to retained earnings as of the beginning of the first quarter of the current consolidated fiscal year.

As a result, revenues for the first quarter of the current fiscal year decreased by ¥17,853 million and operating costs decreased by ¥17,840 million. The impact of this change on selling, general and administrative expenses, operating income, ordinary income, and profit before income taxes was minimal.

As a result of the application of Revenue Recognition Standard, *accounts receivable-trade presented under*

*current assets* in our consolidated balance sheet for the previous consolidated fiscal year will be included under *accounts receivable-trade and contract assets* beginning with the first quarter of the current consolidated fiscal year. In accordance with the transitional treatment prescribed in Paragraph 89-2 of the Revenue Recognition Standard, we have not reclassified the previous consolidated fiscal under the new presentation method.

### 3. Overview of reportable segments

As described in *Changes in Accounting Policies*, we applied the Revenue Recognition Standard as of the beginning of the first quarter of the current consolidated fiscal year, changing our accounting method for revenue recognition. In so doing, we changed the calculation method for segment income as well.

As a result of this change, revenues by segment for the first quarter of the current consolidated fiscal year decreased by ¥523 million and ¥17,329 million for Logistics (Japan) and Logistics Support, respectively, when compared with the previous accounting method. The impact of this change on segment income was minimal.
